

Chipsmall Limited consists of a professional team with an average of over 10 year of expertise in the distribution of electronic components. Based in Hongkong, we have already established firm and mutual-benefit business relationships with customers from,Europe,America and south Asia,supplying obsolete and hard-to-find components to meet their specific needs.

With the principle of “Quality Parts,Customers Priority,Honest Operation,and Considerate Service”,our business mainly focus on the distribution of electronic components. Line cards we deal with include Microchip,ALPS,ROHM,Xilinx,Pulse,ON,Everlight and Freescale. Main products comprise IC,Modules,Potentiometer,IC Socket,Relay,Connector.Our parts cover such applications as commercial,industrial, and automotives areas.

We are looking forward to setting up business relationship with you and hope to provide you with the best service and solution. Let us make a better world for our industry!

Output filters FN 5010

Universal sine wave output filter for motor drives

- Smoothing of PWM drive output voltage
- Efficient motor protection
- Increase of motor service life
- Reduction of audible motor noise
- Reduction of parasitic losses
- Improvement of system reliability

Approvals

Technical specifications

Nominal operating voltage:	3x 400/230VAC $\pm 10\%$
Motor frequency:	0 to 70Hz
Switching frequency:	4 to 16kHz
Rated currents:	2.5 to 610A @ 40°C
Motor cable length:	400m max.
Impedance (uk):	10% @ nominal voltage, 50Hz & rated current
Residual ripple voltage:	<5%
High potential test voltage:	P $\rightarrow$ E 3000VAC for 3 sec P $\rightarrow$ P 2000VAC for 3 sec
Protection category:	IP00 (filters up to 150A according to VBG 4)
Overload capability:	2x rated current at switch on for 30 seconds, 1.5x rated current for 1 minute, once per hour
Temperature range (operation and storage):	-25°C to +85°C (25/085/21)
Insulation class:	T40/F (155°C)
Flammability corresponding to:	UL 94V-2 or better
Design corresponding to:	EN 61558-2-20 (VDE 0570-2-20)

Typical electrical schematic

Features and benefits

- Conversion of the PWM output signal (symmetrical voltage components) of motor drives into a smooth sine wave with low residual ripple.
- Elimination of premature motor damage caused by high dv/dt, overvoltages, motor overheating and eddy current losses.
- Significantly increased service life of electric motors.
- Reduction of the pulse load of motor drive IGBTs and the parasitic losses on long shielded motor cables.
- Cost-effective and space-saving open frame filter design.
- Vacuum impregnation ensures less humming noise and high durability.

Typical applications

- Motor drive applications with long motor cables
- Pumps
- Conveyors
- HVAC applications
- Elevators
- General automation tasks
- Applications with multiple motors in parallel

Filter selection table

Filter	Rated current @ 40°C	Typical motor power rating*	Nominal inductance	Nominal capacitance	Typical power loss**	Input/Output connections		Total	Cu.	Weight Al.

* General purpose four-pole (1500r/min) AC induction motor rated 400V/50Hz.
** Exact value depends upon the motor cable type and length, switching frequency, motor frequency and further stray parameters within the system.
