## : ©hipsmall

Chipsmall Limited consists of a professional team with an average of over 10 year of expertise in the distribution of electronic components. Based in Hongkong, we have already established firm and mutual-benefit business relationships with customers from,Europe,America and south Asia,supplying obsolete and hard-to-find components to meet their specific needs.

With the principle of "Quality Parts,Customers Priority,Honest Operation, and Considerate Service",our business mainly focus on the distribution of electronic components. Line cards we deal with include Microchip,ALPS,ROHM,Xilinx,Pulse,ON,Everlight and Freescale. Main products comprise IC,Modules,Potentiometer,IC Socket,Relay,Connector.Our parts cover such applications as commercial,industrial, and automotives areas.

We are looking forward to setting up business relationship with you and hope to provide you with the best service and solution. Let us make a better world for our industry!

## FPP06R001

75V/60A Synchronous Rectifier Module

## General Features

- Very High Rectification Efficiency at Output 12V
- Integrated Solution for Saving Board Space
- Improved Driving Capability with Prominent Internal Driver IC
- RoHS Compliant

## Sync-Rectifier Switch Features

- $\mathrm{R}_{\mathrm{DS}(\mathrm{ON})}=3.5 \mathrm{~m} \Omega$ (Typ.), $\mathrm{V}_{\mathrm{IN}}=10 \mathrm{~V}, \mathrm{I}_{\mathrm{D}}=40 \mathrm{~A}$
- Low Miller Charge
- Low $Q_{r r}$ Body Diode
- UIS Capability (Single Pulse and Repetitive Pulse)

## Driver IC Features

- 2.5A Max Current Driving Capability
- Low Propagation Delay Time
- Optimized for Increasing Driving Capability Using General Low-Current Gate Driver with a Minimum Delay Time

## General Description

The FPP06R001 is one product in the Power-SPM ${ }^{\text {TM }}$ family that Fairchild has newly developed and designed to be most suitable for more compact and more efficient synchronous rectification applications such as internet server power supplies and telecom system power supplies. For higher efficiency, it includes built-in very low $R_{D S(O N)}$ MOSFETs. In addition, it includes the superior gate driver that supports higher driving capability to be more suitable for these low $R_{D S(O N)}$ MOSFETs. This Power-SPM device can be used in the secondary side of the PWM transformer of forward/bridge converter to provide high current rectification at output voltages ranging from 12 Volts down to 5 Volts. With this product, it is possible to design the secondary side of power supply systems with reduced parasitic elements resulting in minimized voltage spike and EMI noise.

## Applications

- High Current Isolated Converter
- Distributed Power Architectures

## DISCLAIMER

FAIRCHILD SEMICONDUCTOR RESERVES THE RIGHT TO MAKE CHANGES WITHOUT NOTICE TO ANY PRODUCTS HEREIN TO IMPROVE RELIABILITY，FUNCTION，OR DESIGN．FAIRCHILD DOES NOT ASSUME ANY LIABILITY ARISING OUT OF THE APPLICATION OR USE OF ANY PRODUCT OR CIRCUIT DESCRIBED HEREIN；NEITHER DOES IT CONVEY ANY LICENSE UNDER ITS PATENT RIGHTS，NOR THE RIGHTS OF OTHERS．THESE SPECIFICATIONS DO NOT EXPAND THE TERMS OF FAIRCHILD＇S WORLDWIDE TERMS AND CONDITIONS，SPECIFICALLY THE WARRANTY THEREIN，WHICH COVERS THESE PRODUCTS．

## LIFE SUPPORT POLICY

FAIRCHILD＇S PRODUCTS ARE NOT AUTHORIZED FOR USE AS CRITICAL COMPONENTS IN LIFE SUPPORT DEVICES OR SYSTEMS WITHOUT THE EXPRESS WRITTEN APPROVAL OF FAIRCHILD SEMICONDUCTOR CORPORATION．

As used herein：

1．Life support devices or systems are devices or systems which，（a）are intended for surgical implant into the body，or （b）support or sustain life，and（c）whose failure to perform when properly used in accordance with instructions for use provided in the labeling，can be reasonably expected to result in significant injury to the user

2．A critical component is any component of a life support device or system whose failure to perform can be reasonably expected to cause the failure of the life support device or system，or to affect its safety or effectiveness．
