

Chipsmall Limited consists of a professional team with an average of over 10 year of expertise in the distribution of electronic components. Based in Hongkong, we have already established firm and mutual-benefit business relationships with customers from,Europe,America and south Asia,supplying obsolete and hard-to-find components to meet their specific needs.

With the principle of “Quality Parts,Customers Priority,Honest Operation,and Considerate Service”,our business mainly focus on the distribution of electronic components. Line cards we deal with include Microchip,ALPS,ROHM,Xilinx,Pulse,ON,Everlight and Freescale. Main products comprise IC,Modules,Potentiometer,IC Socket,Relay,Connector.Our parts cover such applications as commercial,industrial, and automotives areas.

We are looking forward to setting up business relationship with you and hope to provide you with the best service and solution. Let us make a better world for our industry!

# Automotive Power Selection Guide 2018

Ultimate power – perfect control

[www.infineon.com/automotivepower](http://www.infineon.com/automotivepower)

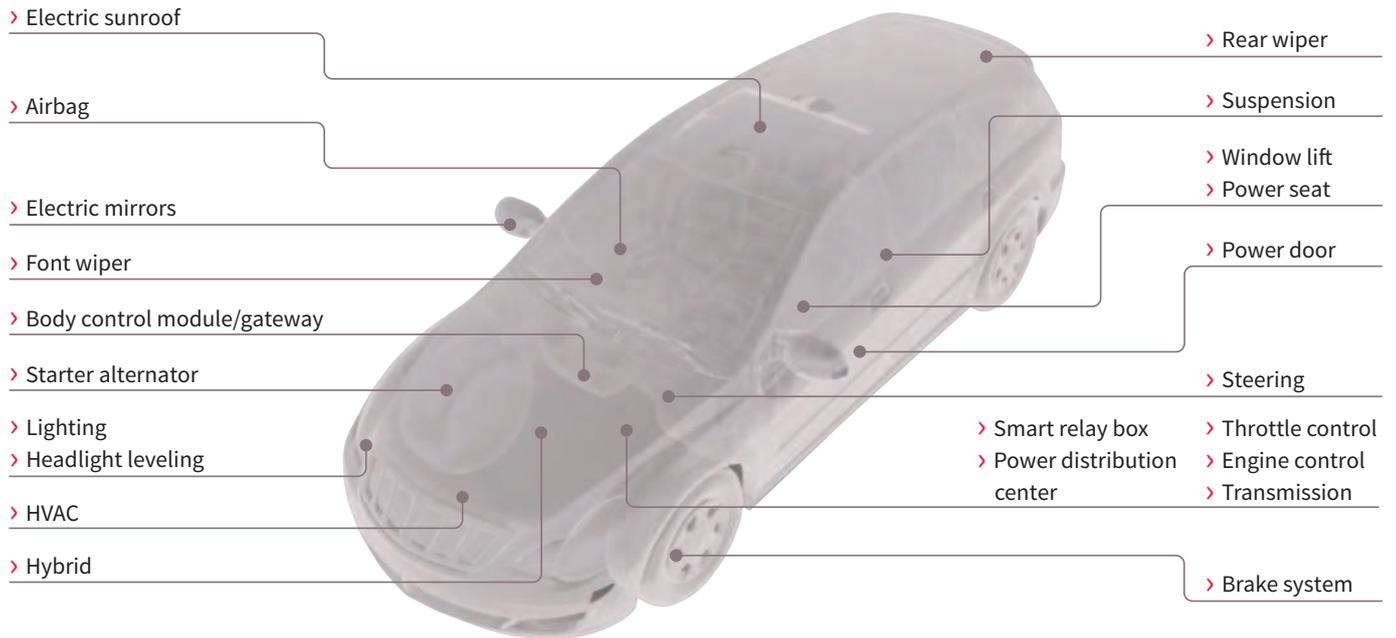

The ultimate power to control your applications including automotive, transportation, industrial, lighting and motor control.

For a comprehensive and reliable portfolio of products for automotive and other applications, look no further than the product range from Infineon. We have used our 40 years of experience of developing and producing products to meet the demands of the automotive market, and our innovative technologies to design and produce a large number of power products that meet all requirements of the automotive industry and also the transportation, lighting and motor-drive industries.

Our commitment to quality is demonstrated through our focus on automotive excellence, the most rigorous zero defect program in the industry.

This selection guide provides an overview of our ICs and their packages, which are automotive qualified (AEC-Q100 or AEC-Q101) and available for your current and future electronic system designs.

## Automotive applications

## Automotive power components used in other applications

# We shape the future of mobility

With microelectronics enabling clean, safe, smart cars

For leading solutions in automotive electronics from the pioneer in the industry, turn to Infineon Technologies. Choose our semiconductors for your body, powertrain, safety, and hybrid and electric vehicle applications and profit from products resulting from nearly 40 years of experience in automotive applications and standards. Our commitment to innovation and high quality means you can count on us to successfully drive your applications into the tomorrow and beyond.

# Automotive MOSFETs do contribute to your success

We offer you high quality beyond AEC-Q101

The amount of power MOSFETs per car continuously increases, as more features are embedded in every new car sold worldwide. The amount of MOSFETs becomes even higher in electric high-end cars where up to 400 MOSFETs can be found in a single car. For this reason it gets more and more important to use high quality Automotive MOSFETs.

All Automotive qualified MOSFETs are following the AEC-Q101 qualification standard. Infineon does more than that in order to achieve more robust products and a very low dpm rate.

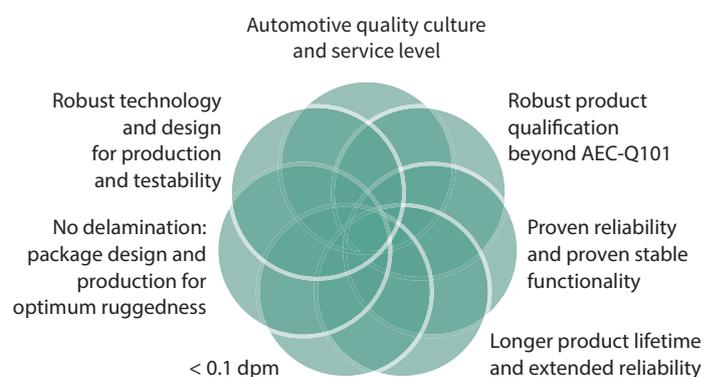

Why is AEC-Q101 not enough for us?

- > It may not cover “untypical or stringent” mission profiles
- > It does not provide any indication on the stability of the manufacturing process over the years
- > It doesn’t prove any dpm below 10 000

How do we achieve the best quality you can get in the market?

- > Robustness
  - Strong application know-how, good requirement capturing for product, technology and process roadmaps
  - Dedicated Automotive Design Goals based on 40 years of experience in automotive
  - Stringent product monitoring/process controls
  - Enhanced test coverage
- > Enhanced testing and qualification
  - More than just the datasheet parameters
  - Qualification beyond AEC-Q101
  - Usage of PAT (Part Average Testing) in front-end and back-end for power MOSFET

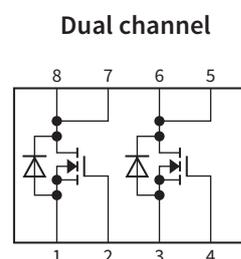

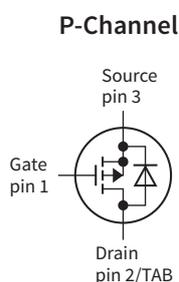

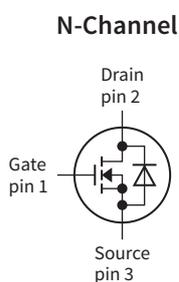

What have we achieved so far?

# OptiMOS™ Automotive MOSFETs

Infinion automotive MOSFET portfolio offers benchmark quality, wide voltage range and diversified package

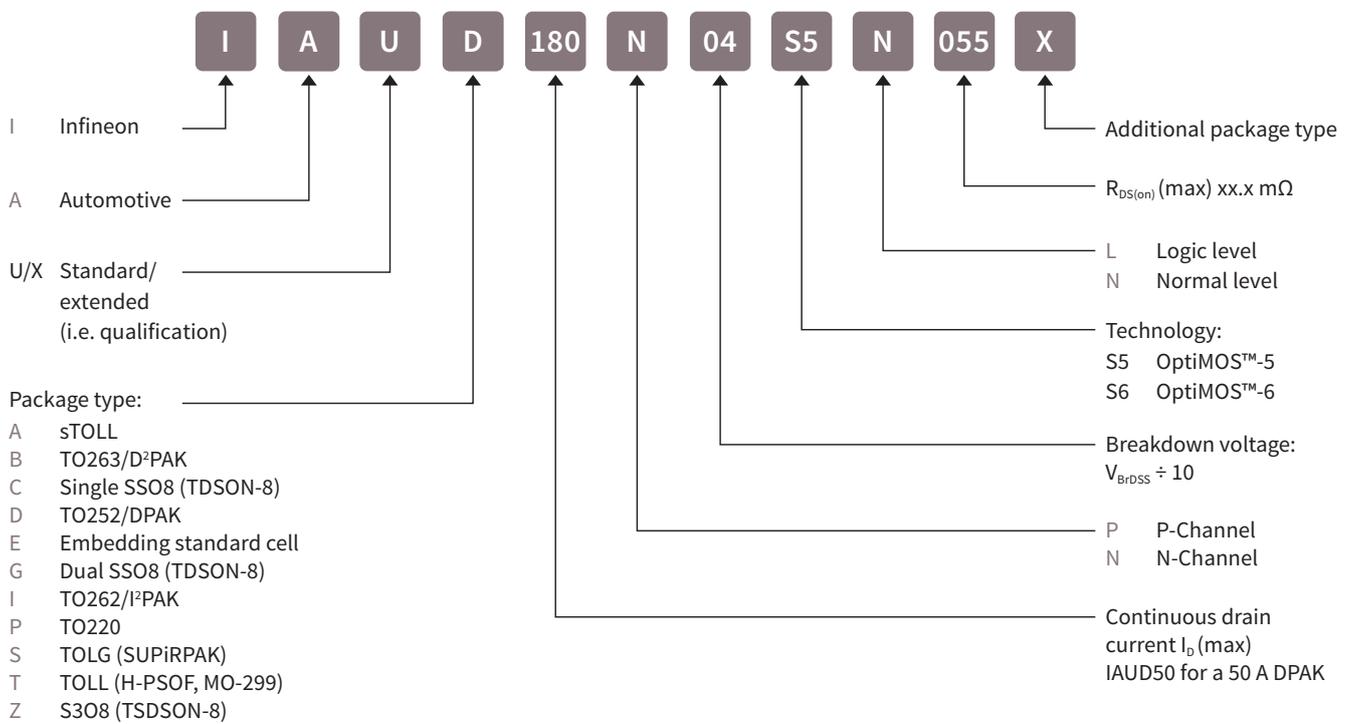

- › Best in class  $R_{DS(on)}$  performance for increased system efficiency
- › Lowest switching and conduction power losses for increased thermal system reliability
- › Benchmark for quality and reliability
- › Wide voltage range from 24 to 300 V for N-Channel FET, and from 20 to 150 V for P-Channel FET
- › Robust green package for easy process handling
- › Diversified package portfolio caters to customers' needs for
  - Package size minimization (down to 11 mm<sup>2</sup> in S308)
  - High current capability (up to 300 A in TOLL)

# Small Signal MOSFETs

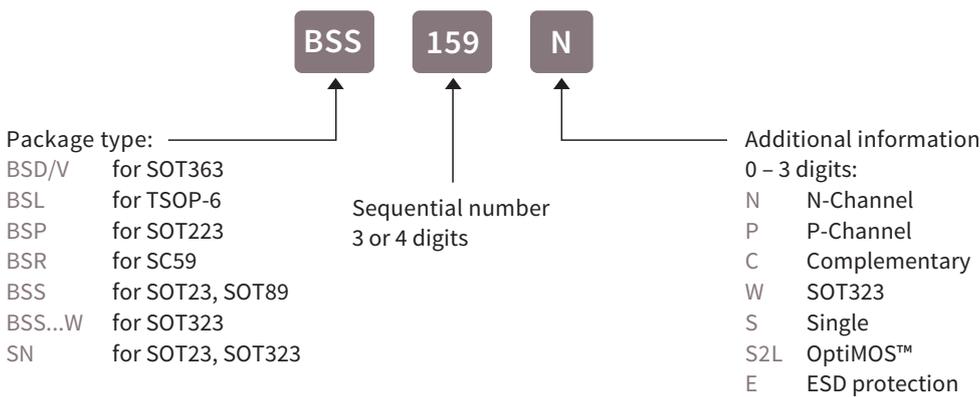

Infineon offers a full range of Small Signal MOSFETs qualified according AEC-Q101.

## The portfolio includes

- > Polarity: N-Channel enhancement, N-Channel depletion and P-Channel MOSFETs
- > Voltage classes: -250 ... 800 V
- >  $V_{GS}$  rating: 10 V (normal level), 4.5 V (logic level), 2.5 V (super logic level), 1.8 V (ultra logic level)
- > Packages: SOT223, SOT89, TSOP-6 (single and dual), SC59, SOT23, SOT323, SOT363 (single and dual)
- > Configuration: single, dual, complementary (n+p pairs)
- > Additional features: the products with names ending with "E" have an Integrated ESD protection

SC59 is an enhanced version of the SOT23: it's footprint compatible with SOT23, but allows a bigger chip inside, therefore a lower  $R_{DS(on)}$ .
