**Comments:**

The use of lead-free and high temperature solders has increased the amount of oxidation on soldering tips. The FT-700 is a complete maintenance kit for renewing oxidized soldering tips. It uses rotating brushes to polish oxidized tips. The rotating brass brushes will remove tip oxides without damaging tip plating. The FT-700 includes the FS-100 Chemical Paste. The paste is a lead-free solder paste that does not incorporate an extremely harsh flux but still removes tip oxides. The rotating brushes can be easily replaced.
