Environmental Performance

Operating case temperature: 0°C to +70°C
 Operating humidity: 0% -95% RH non-condensing

Fibers and Connectors

The transponder has SC receptacles for both Tx and Rx. The transponder is designed for single mode SC cables, 0° polished endface (PC).

70-pin Connector

The module interface connector is a 70-pin, printed circuit board edge connection with a 0.5 mm pitch. The appropriate mating connector for the customer PCB is a 70-pin SMT, dual row, right angled, edge connector, 0.5 mm pitch (Tyco Electronics part number 1367337-1, Molex part number 74441-0003 or equivalent).

Rail Requirement

The XENPAK rail system required to mount the XENPAK module is fully defined by the MSA.

Aqueous Wash

Finisar XENPAK transponders are neither solderable nor aqueous washable and are not intended for these processes.
