Fiberwash™ AQ Precision Fiber Optic Cleaner

Nonflammable, aqueous fiber optic cleaner

PRODUCT DESCRIPTION

FOCCUS™ Fiber-Wash™ AQ Precision Fiber Optic Cleaning Pen contains a nonflammable, water-based cleaning solution that quickly and safely cleans the end face of fiber optic connectors, splices and ribbons. It also dissipates static charge, which prevents attracting airborne contamination that cling to the end face surface. The cleaning formulation has low odor, is plastic safe, and residue free. Because it is water-based, it has the environmental benefits of low VOC and GWP (Global Warming Potential). This non-pressurized container can be easily and safely transported. For best results, use with the QbE® Cleaning Platform or CCT™ Clear Connection Tool and the Combination Cleaning™ process.

USAGE INSTRUCTIONS

Read MSDS carefully prior to use.

1. Hold pen vertically and depress tip. For surfaces other than endfaces, rub pen on surface to be cleaned.
2. For endface cleaning, use with QbE® Cleaning Platform. When using with a QbE Cleaning System, pull one QbE wipe over the Fiber-Safe foam platen and depress the pen tip onto the wipe to start liquid flow.
3. Apply a small amount (1" diameter) of Fiberwash NF Precision Fiber Optic Cleaner onto the wipe. Follow the Combination Cleaning process as follows:
 - Hold the end-face at 90° perpendicular to the QbE platen; allow the end-face to glide over wipe. Remember to adjust for APC connections
 - Draw the end-face lightly over the platen in a smooth linear motion
 - Do not press too hard
 - Do not retrace your cleaning procedure in the same area
 - Do not use a figure-eight motion; do not use a "twist & turn" motion
 - Check your work with a fiber scope or measuring device
