

Chipsmall Limited consists of a professional team with an average of over 10 year of expertise in the distribution of electronic components. Based in Hongkong, we have already established firm and mutual-benefit business relationships with customers from,Europe,America and south Asia,supplying obsolete and hard-to-find components to meet their specific needs.

With the principle of “Quality Parts,Customers Priority,Honest Operation,and Considerate Service”,our business mainly focus on the distribution of electronic components. Line cards we deal with include Microchip,ALPS,ROHM,Xilinx,Pulse,ON,Everlight and Freescale. Main products comprise IC,Modules,Potentiometer,IC Socket,Relay,Connector.Our parts cover such applications as commercial,industrial, and automotives areas.

We are looking forward to setting up business relationship with you and hope to provide you with the best service and solution. Let us make a better world for our industry!

SPECIFICATION

PATENT PENDING

Part No: **FXUB65.07.0180C**

Product Name: Minima
Embedded Flexible 4G LTE Wide Band Antenna
700-960MHz, 1700-2700MHz

Features: Flexible Wideband Antenna
Covers worldwide 2G/3G/4G Bands
Isotropic Radiation Pattern
Highest efficiency in smallest size
67.0x58.0x0.2 mm
IPEX 1.37 coaxial cable
RoHS Compliant

1. Introduction

The patent pending Minima FXUB65 flexible antenna has been designed to cover 4G bands in the 700-2700 MHz spectrum, but also optimally covers 2G and 3G. The antenna has a compact, flexible, modern design, with excellent efficiencies on all target bands. The Minima comes standard with 180mm IPEX cable and connector for easy installation and can also be configured for different cable lengths and terminations. The 67x58x0.2mm FXUB65 is made from flexible polymer material, which is ultra-thin, compact and highly efficient across the 3G and 4G bands. It is installed by a simple “peel and stick” process, attaching securely to non-metal surfaces via adhesive backing. The Minima has been designed with excess bandwidth so that performance is not affected by thicker or thinner plastic surfaces to which it is adhered. It enables designers to use only one antenna that covers all cellular communication frequencies in the IoT market.

The Minima antenna has a unique compact geometric design, which has excellent efficiency for its size and isotropic pattern at both low and high bands. This antenna if integrated optimally with enough clearance, can in most cases pass US operator requirements.

The antenna performs well at a reasonable distance, typically 20mm, from a ground and has demonstrated ease of integration into complex end user equipment.

The FXUB65 Minima antenna has a typical efficiency of more than 50% across the low bands and 64% across the high bands. The Minima is designed to be mounted directly onto a plastic or glass cover. It is an ideal choice for any device maker that desires ease of integration and needs to keep manufacturing costs down over the lifetime of a product. Cable and connector can be customized, contact your regional Taoglas sales office for support.

2. Specification

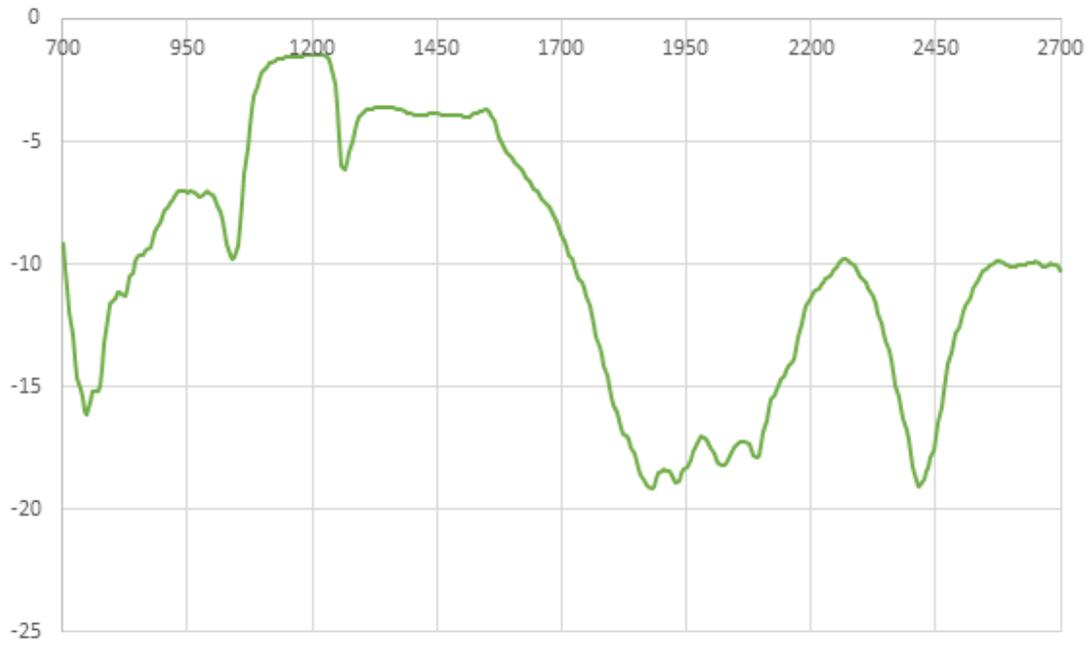

ELECTRICAL								
Standard	LTE 700	GSM 850	GSM 900	DCS	PCS	UMTS1	WiFi	LTE 2600
Frequency (MHz)	698~ 803	824~ 894	880~ 960	1710~ 1880	1850~ 1990	1920~ 2170	2400~ 2480	2490~ 2690

5. Mechanical Drawing (Unit: mm)

NOTES:

- 1.No dregs or insufficient soldering. Solder thickness 0.3~1.7mm
- 2.The solder must be smooth and full to the edges of the pad.
The solder must not extend outside of the pad area.
- 3.The connector position has special orientation to the PCB as per drawing.
- 4.All material must be RoHS compliant.
- 5.Open/short QC, VSWR required.
- 6.Soldered area.

	Name	P/N	Material	Finish	QTY
1	FXUB65 FPCB	100115D000000A	Polymer	Black	1
2	1.37 Coaxial Cable	300515C010000A	FEP	Black	1
3	IPEX MHFHT	204511G000013A	Brass	Gold	1

6. Packaging

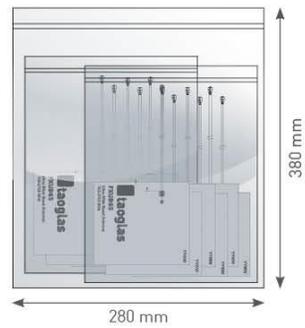

FXUB65.07.0180C

Packaging Specifications

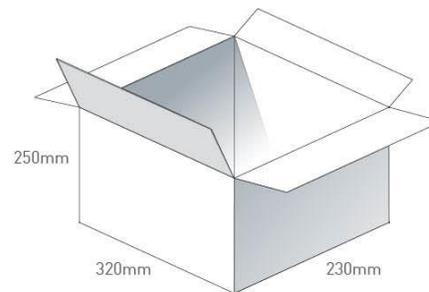

100pcs FXUB65.07.0180C per PE Bag
Bag Dimensions - 300 x 160mm
Weight - 241g

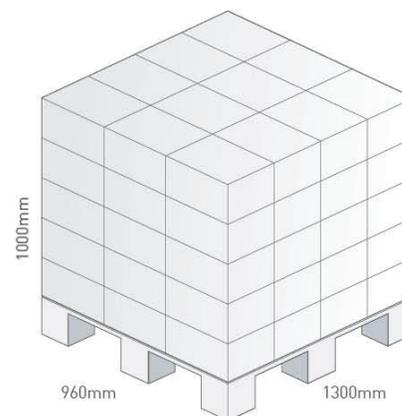

1000pcs FXUB65.07.0180C per PE Large Bag
Bag Dimensions - 380 x 280mm
Weight - 2.6kg

5,000 pcs FXUB65.07.0180C per carton
Carton - 320 x 250 x 230mm
Weight - 13.5Kg

Pallet Dimensions 960 x 1000 x 1300mm
60 Cartons per Pallet
12 Cartons per layer
5 Layers

7. Application Note

Like all flex antennas, the FXUB65 Minima antenna performance is somewhat sensitive to the routing of the cable during integration. The preferred routing is a "full wrap" or "half wrap", as shown below where the cable is routed around the long side of the device. Routing over the lower part of the device as shown will also work well. An integration where the cable runs straight off will work, but the performance in the 900MHz band may not be optimal. Avoid running the cable up along the short side or wrapping it around the short side, as these will not work. If a longer cable is needed to wrap around the long side and still reach the module, this is ok, and a longer cable can be easily built. Keep the antenna at least 20mm away from conductors in the end user device.

The FXUB65 can be integrated into assemblies over a small ground plane such as a PCB. The efficiency in these cases can sometimes be higher than the antenna alone.
