Environmental Data

Operating Temperature Range: -40°C through +85°C (-40°F through +185°F)

Processing

Soldering: **Manual Soldering:** 390°C maximum for 4 seconds maximum
Reflow Soldering: Preheat temperature: 180°C ~ 200°C; Preheat time: 120 seconds; Heating temperature: 230°C; Heating time: 60 seconds; Peak temperature (surface): 250°C.
Cleaning: These devices are not process sealed. Hand clean locally using alcohol based solution.
 Note: After soldering, use caution to prevent mechanical stress on the terminal area and to avoid warpage of the circuit board.

Distinctive Characteristics

Ultra-miniature size allows high density mounting and utilizes reduced space for surface mounting.

Greaseless condition contributes to resistance of harsh conditions, including wider operating temperatures.

Cap and plunger are one unit, simplifying soldering and cleaning processes and eliminating need to remove and replace the cap. Plunger without cap is an alternate option.

Heat resistant resin used for housing, base and plunger allows vapor phase and infrared convection reflow soldering.

Actual Size

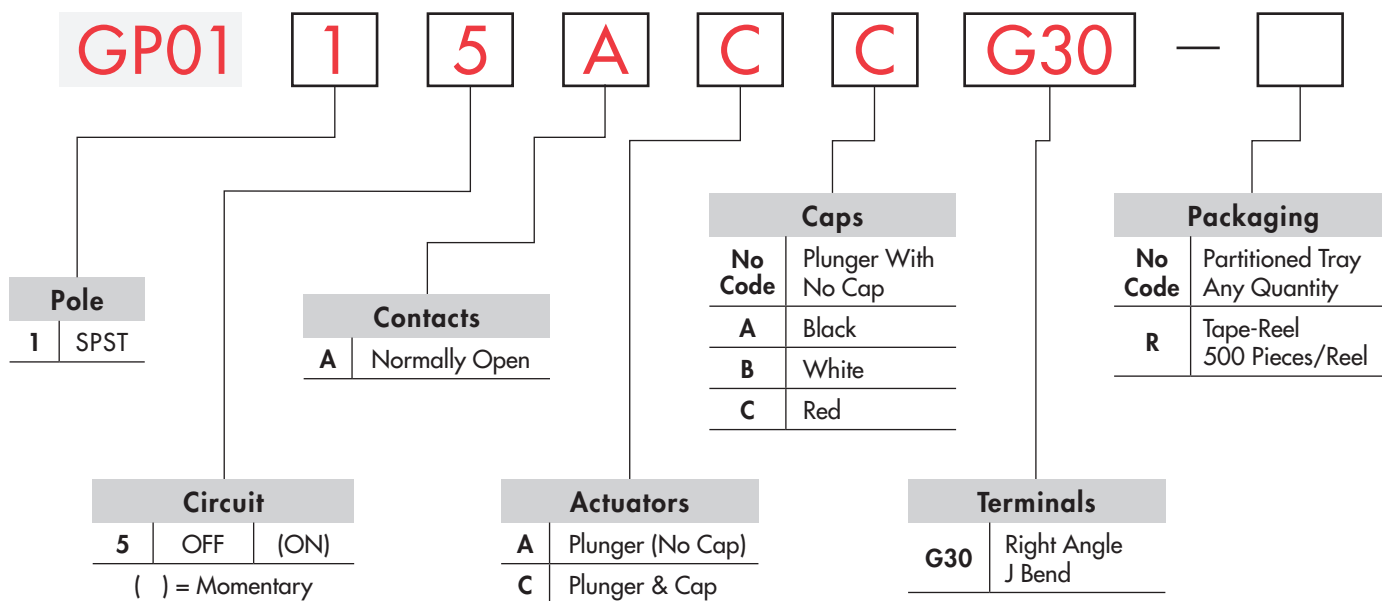

Highly reliable gold plated contacts provide stable contact performance throughout long term use.

J bend terminals lend to easy surface mounting and mechanical stability during soldering and simplified solder joint inspection.

Remarkably precise coplanarity: all considered surfaces lying between two parallel planes are a maximum distance apart of .0039" (0.1mm).
