Chipsmall Limited consists of a professional team with an average of over 10 year of expertise in the distribution of electronic components. Based in Hongkong, we have already established firm and mutual-benefit business relationships with customers from,Europe,America and south Asia,supplying obsolete and hard-to-find components to meet their specific needs.

With the principle of "Quality Parts,Customers Priority,Honest Operation,and Considerate Service",our business mainly focus on the distribution of electronic components. Line cards we deal with include Microchip,ALPS,ROHM,Xilinx,Pulse,ON,Everlight and Freescale. Main products comprise IC,Modules,Potentiometer,IC Socket,Relay,Connector.Our parts cover such applications as commercial,industrial, and automotives areas.

We are looking forward to setting up business relationship with you and hope to provide you with the best service and solution. Let us make a better world for our industry!

GP1UE26RK/GP1UE27RK Series
GP1UE28RK/GP1UE28QK Series

Low Voltage Operation, Anti Electromagnetic Induction Noise Type, Compact IR Detecting Unit for Remote Control
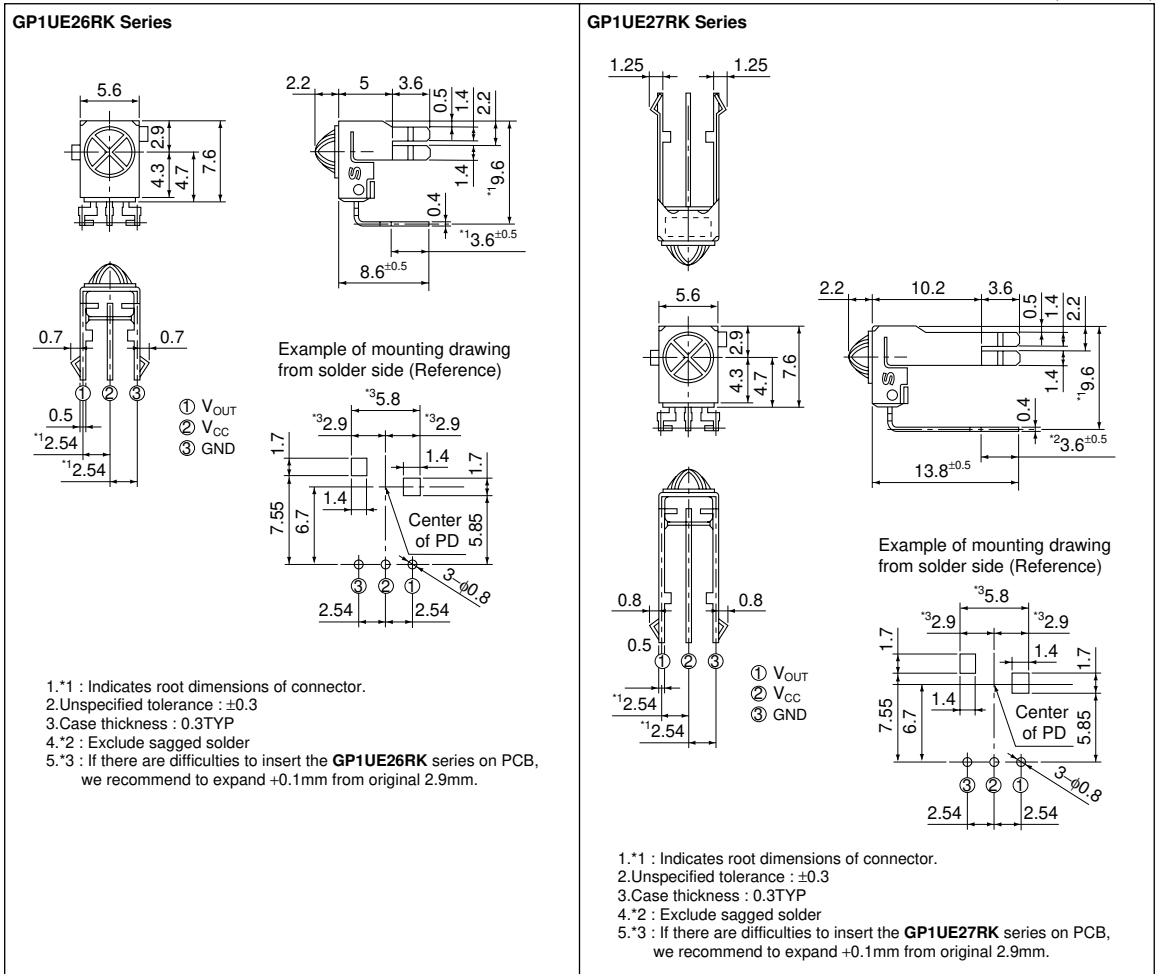

■ Features

1. Low dissipation current:MAX.0.6mA (at V_{CC}=3V)

2. Low operating voltage:2.4 to 3.6V

3. Anti electromagnetic induction noise type.

4. Compact (case volume).

5. Various B.P.F. (Band Pass Frequency) frequency to meet different user needs.

### ■ Applications

1. AV equipments

2. Home appliances

■ Outline Dimensions   (Unit : mm)

GP1UE26RK Series

① V_{OUT}
② V_{CC}
③ GND

Example of mounting drawing from solder side (Reference)

Center of PD

1.*1 : Indicates root dimensions of connector.
2.Unspecified tolerance : ±0.3
3.Case thickness : 0.3TYP
4.*2 : Exclude sagged solder
5.*3 : If there are difficulties to insert the **GP1UE26RK** series on PCB, we recommend to expand +0.1mm from original 2.9mm.

GP1UE27RK Series

① V_{OUT}
② V_{CC}
③ GND

Example of mounting drawing from solder side (Reference)

Center of PD

1.*1 : Indicates root dimensions of connector.
2.Unspecified tolerance : ±0.3
3.Case thickness : 0.3TYP
4.*2 : Exclude sagged solder
5.*3 : If there are difficulties to insert the **GP1UE27RK** series on PCB, we recommend to expand +0.1mm from original 2.9mm.

■ Outline Dimensions

(Unit : mm)

GP1UE28RK Series

Example of mounting drawing
from solder side (Reference)

① V_OUT
② V_CC
③ GND

1.*1 : Indicates root dimensions of connector.
2.Unspecified tolerance : ±0.3
3.Case thickness : 0.3TYP
4.*2 : Exclude sagged solder
5.*3 : If there are difficulties to insert the **GP1UE28RK** series on PCB,
    we recommend to expand +0.1mm from original 2.9mm.

GP1UE28QK Series

① V_OUT
② V_CC
③ GND

Example of mounting drawing
from solder side (Reference)

Top of lenz

1.*1 : Indicates root dimensions of connector.
2.Unspecified tolerance : ±0.3
3.Case thickness : 0.3TYP
4.*2 : Exclude sagged solder
5.*3 : If there are difficulties to insert the **GP1UE28QK** series on PCB,
    we recommend to expand +0.1mm from original 2.9mm.

■ Model Line-up

Diversified models with a different B.P.F. frequency are also available.

B.P.F. center frequency	Model No.				Unit
40	GP1UE26RK	GP1UE27RK	GP1UE28RK	GP1UE28QK	
36	GP1UE260RK	GP1UE270RK	GP1UE280RK	GP1UE280QK	
38	GP1UE261RK	GP1UE271RK	GP1UE281RK	GP1UE281QK	kHz
36.7	GP1UE262RK	GP1UE272RK	GP1UE282RK	GP1UE282QK	
56.8	GP1UE267RK	GP1UE277RK	GP1UE287RK	GP1UE287QK	

■ Internal Block Diagram
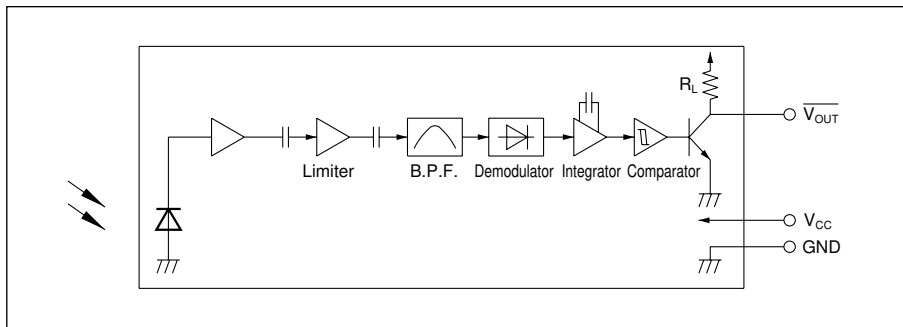

■ Absolute Maximum Ratings (T$_a$=25°C)

Parameter	Symbol	Rating	Unit
Supply voltage	V$_{CC}$	0 to +6.0	V
[*1] Operating temperature	T$_{opr}$	−10 to +70	°C
Storage temperature	T$_{stg}$	−20 to +70	°C
[*2] Soldering temperature	T$_{sol}$	260	°C

*1 No dew condensation is allowed
*2 For 5s (At mounting on PCB with thickness of 1.6mm)

■ Recommended Operating Conditions

Parameter	Symbol	Operating conditions	Unit
Supply voltage	V$_{CC}$	2.4 to 3.6	V

■ Electro Characteristics

(T$_a$=25°C, V$_{CC}$=+3V)

Parameter	Symbol	Conditions	MIN.	TYP.	MAX.	Unit
Dissipation current	I$_{CC}$	No input light	−	0.4	0.6	mA
High level output voltage	V$_{OH}$		V$_{CC}$ −0.5	−	−	V
Low level output voltage	V$_{OL}$	[*3] I$_{OL}$=1.6mA	−	−	0.45	V
High level pulse width	T$_1$		600	−	1 200	μs
Low level pulse width	T$_2$		400	−	1 000	μs
B.P.F. center frequency	f$_0$	−	−	[*4]	−	kHz
Output pull-up resistance	R$_L$	−	70	100	130	kΩ

*3 The burst wave as shown in the following figure shall be transmitted by the transmitter shown in Fig. 1
   The carrier frequency of the transmitter, however, shall be same as *4, and measurement shall be from just after starting the transmission until 50 pulse
*4 The B.P.F. center frequency f$_0$ varies with model, as shown in ■ **Model Line-up**

Burst wave

600μs   1 000μs
f$_0$=(*4)
Duty 50%

■ Performance

Using the transmitter shown in Fig. 1, the output signal of the light detecting unit is good enough to meet the following items in the standard optical system in Fig. 2.

1. Linear reception distance characteristics

   When L=0.2 to 8.0(6.5)[*7]m, [*5]E_V<10 lx and ϕ=0˚ in Fig.2, the output signal shall meet the electrical characteristics in the attached list.

2. Sensitivity angle reception distance characteristics

   When L=0.2 to 6.0(4.5)[*7]m, [*5]E_V<10 lx and ϕ≤30˚ in Fig.2, the output signal shall meet the electrical characteristics in the attached list.

3. Anti outer peripheral light reception distance characteristics

   When L=0.2 to 4.0(3.0)[*7]m, [*6]E_V≤ 300 lx and ϕ=0˚ in Fig.2, the output signal shall meet the electrical characteristics in the attached list.

[*5] It refers to detector face illuminance
[*6] Outer peripheral light source: CIE standard light source A shall be used and placed at 45˚ from perpendicular axis at the detector face center
[*7] In case of B.P.F. center frequency: 56.8kHz model

Fig.1 Transmitter
In the above figure, the transmitter should be set so that the output $V_{OUT (P-P)}$ can be 40mV.

However, the **PD49PI** to be used here should be of the short-circuit current I_{SC}=2.6μ A at E_V =100 lx.

(E_V is an illuminance by CIE standard light source A (tungsten lamp).)

Fig.2 Standard Optical System

(ϕ indicates horizontal and vertical directions.)
■ Precautions for Operation

1. When this infrared remote control detecting unit shall be adopted for wireless remote control, please use it with the signal format of transmitter, which total duty ratio D_t (Emitting time $\sum_{N=1}^{n} t_N$ / Transmitting time for 1 block T) is 40% or less. ON signal time T_{ON} (Pulse width of the presence of modulated IR) should be 250(200:In case of B.P.F center frequency:56.8kHz model)μs or more. In case that the signal format of total duty and ON signal time is out of above conditions, there is a case that reception distance is much reduced or output is not appeared.

$$D_t = (\sum_{N=1}^{n} t_N / T) \times 100 \ (\%)$$
2. Use the light emitting unit (remote control transmitter), in consideration of performance, characteristics, operating conditions of light emitting device and the characteristics of the light detecting unit.

3. Pay attention to a malfunction of the light detecting unit when the surface is stained with dust and refuse.

   Care must be taken not to touch the light detector surface.

   If it should be dirty, wipe off such dust and refuse with soft cloth so as to prevent scratch. In case some solvents are required, use methyl alcohol, ethyl alcohol or isopropyl alcohol only.

   Also, protect the light detecting unit against flux and others, since their deposition on the unit inside causes reduction of the function, fading of markings such as the part number.

4. The shield case should be grounded on PCB pattern.

   (The area across the shield case and the GND terminal is internally conductive in some cases and non-conductive in some other cases.)

5. Do not apply unnecessary force to the terminal and the case.

6. Do not push the light detector surface (photodiode) from outside.

7. To avoid the electrostatic breakdown of IC, handle the unit under the condition of grounding with human body, soldering iron, etc.

8. Do not use hole and groove set in the case of the light detecting unit for other purposes, since they are required to maintain the specified performance.

9. External Circuit Examples (Mount the outer parts as near the unit as possible).

(Circuit parameters)
$R_1 = 47\Omega \pm 5\%$
$C_1 = 47\mu F$
In setting R_1 and C_1, use suitable values after considering under the real condition

The circuit constant is a example. It is difference from mounting equipment. Please select it by your mounting equipment. This device has a transistor as protection element between V_{CC} and GND to improve anti-static electricity proof.

Please be carefully not to apply exceeding the absolute maximum ratings of applying voltage and continuous high voltage spike noise because there is cases that transistor will be short by secondary breakdown generally.

In order to do difficultly, Please add CR filter (47Ω (1/10W), $10\mu F$ or more) such as external circuit example above near V_{CC}.

10. There is a possibility that noise on output may be caused by environmental condition (Disturbing light noise, Electromagnetic noise, Power supply line noise, etc.) even if there is no input transmission signal.

11. Please shall confirm operation or your actual machine. Because the output pulse width of this product is fluctuated by environmental conditions such as signal format, temperature, distance from transmitter, and so on.

12. In case that this product is kept in high humidity condition, it may be hard to solder, please be careful enough about storage method.

    Depend on the flux you select, there are different solderabilities, so please select a suitable flux and use it.

13. Please use this device away from the dew drop.

    Be aware that the dew drop rusts shield case and others, may affect the electric characteristics.

NOTICE

- The circuit application examples in this publication are provided to explain representative applications of SHARP devices and are not intended to guarantee any circuit design or license any intellectual property rights. SHARP takes no responsibility for any problems related to any intellectual property right of a third party resulting from the use of SHARP's devices.

- Contact SHARP in order to obtain the latest device specification sheets before using any SHARP device. SHARP reserves the right to make changes in the specifications, characteristics, data, materials, structure, and other contents described herein at any time without notice in order to improve design or reliability. Manufacturing locations are also subject to change without notice.

- Observe the following points when using any devices in this publication. SHARP takes no responsibility for damage caused by improper use of the devices which does not meet the conditions and absolute maximum ratings to be used specified in the relevant specification sheet nor meet the following conditions:

  (i) The devices in this publication are designed for use in general electronic equipment designs such as:
    --- Personal computers
    --- Office automation equipment
    --- Telecommunication equipment [terminal]
    --- Test and measurement equipment
    --- Industrial control
    --- Audio visual equipment
    --- Consumer electronics

  (ii) Measures such as fail-safe function and redundant design should be taken to ensure reliability and safety when SHARP devices are used for or in connection with equipment that requires higher reliability such as:
    --- Transportation control and safety equipment (i.e., aircraft, trains, automobiles, etc.)
    --- Traffic signals
    --- Gas leakage sensor breakers
    --- Alarm equipment
    --- Various safety devices, etc.

  (iii) SHARP devices shall not be used for or in connection with equipment that requires an extremely high level of reliability and safety such as:
    --- Space applications
    --- Telecommunication equipment [trunk lines]
    --- Nuclear power control equipment
    --- Medical and other life support equipment (e.g., scuba).

- If the SHARP devices listed in this publication fall within the scope of strategic products described in the Foreign Exchange and Foreign Trade Law of Japan, it is necessary to obtain approval to export such SHARP devices.

- This publication is the proprietary product of SHARP and is copyrighted, with all rights reserved. Under the copyright laws, no part of this publication may be reproduced or transmitted in any form or by any means, electronic or mechanical, for any purpose, in whole or in part, without the express written permission of SHARP. Express written permission is also required before any use of this publication may be made by a third party.

- Contact and consult with a SHARP representative if there are any questions about the contents of this publication.
