# imall

Chipsmall Limited consists of a professional team with an average of over 10 year of expertise in the distribution of electronic components. Based in Hongkong, we have already established firm and mutual-benefit business relationships with customers from, Europe, America and south Asia, supplying obsolete and hard-to-find components to meet their specific needs.

With the principle of "Quality Parts, Customers Priority, Honest Operation, and Considerate Service", our business mainly focus on the distribution of electronic components. Line cards we deal with include Microchip, ALPS, ROHM, Xilinx, Pulse, ON, Everlight and Freescale. Main products comprise IC, Modules, Potentiometer, IC Socket, Relay, Connector. Our parts cover such applications as commercial, industrial, and automotives areas.

We are looking forward to setting up business relationship with you and hope to provide you with the best service and solution. Let us make a better world for our industry!

Development Department II Lighting Device Business Unit Electronic Components And Devices Company SHARP CORPORATION

1. These specification sheets include materials protected under copyright of Sharp Corporation ("Sharp"). Please handle with great cares and do not reproduce or cause anyone to reproduce them without Sharp's consent.

 When using this Sharp product, please observe the absolute maximum ratings, other conditions and instructions for use described in the specification sheets, as well as the precautions mentioned below.
 Sharp assumes no responsibility for any damages resulting from use of the product which does not comply with absolute maximum ratings, other conditions and instructions for use included in the specification sheets, and the precautions mentioned below.

(Precautions)

- (1) In making catalogue or instruction manual based on the specification sheets, please verify the validity of the catalogue or instruction manuals after assembling Sharp products in customer's products at the responsibility of customer.
- (2) This Sharp product is designed for use in the following application areas ;
  - Computers OA equipment Telecommunication equipment (Terminal) Measuring equipment
  - Tooling machines Audio visual equipment Home appliances

If the use of the Sharp product in the above application areas is for equipment listed in paragraphs (3) or (4), please be sure to observe the precautions given in those respective paragraphs.

- (3) Appropriate measures, such as fail-safe design and redundant design considering the safety design of the overall system and equipment, should be taken to ensure reliability and safety when Sharp product is used for equipment in responsibility of customer which demands high reliability and safety in function and precision, such as ;
  - Transportation control and safety equipment (aircraft, train, automobile etc.)
  - Traffic signals Gas leakage sensor breakers Rescue and security equipment
  - Other safety equipment
- (4)Sharp product is designed for consumer goods and controlled as consumer goods in production and quality. Please do not use this product for equipment which require extremely high reliability and safety in function and precision, such as ;
  - Space equipment Telecommunication equipment (for trunk lines)
  - Nuclear power control equipment 
     Medical equipment
- (5) Please contact and consult with a Sharp sales representative if there are any question regarding interpretation of the above four paragraphs.

#### 3. Disclaimer

The warranty period for Sharp product is one (1) year (or six (6) months in case of generalized product) after shipment. During the period, if there are any products problem, Sharp will repair (if applicable), replace or refund. Except the above, both parties will discuss to cope with the problems.

The failed Sharp product after the above one (1) year (or six (6) month for generalized product) period will be coped with by Sharp, provided that both parties shall discuss and determine on sharing responsibility based on the analysis results thereof subject to the above scope of warranty.

The warranty described herein is only for Sharp product itself which are purchased by or delivered to customer. Damages arising from Sharp product malfunction or failure shall be excepted.

Sharp will not be responsible for the Sharp product due to the malfunction or failures thereof which are caused by: (1) storage keep trouble during the inventory in the marketing channel.

- (2) intentional act, negligence or wrong/poor handling.
- (3) equipment which Sharp products are connected to or mounted in.
- (4) disassembling, reforming or changing Sharp products.
- (5) installation problem.
- (6) act of God or other disaster (natural disaster, fire, flood, etc.)
- (7) external factors (abnormal voltage, abnormal electromagnetic wave, fire, etc.)
- (8) special environment (factory, coastal areas, hotspring area, etc.)
- (9) phenomenon which cannot be foreseen based on the practical technologies at the time of shipment.
- (10) the factors not included in the product specification sheet.

4. Please contact and consult with a Sharp sales representative for any questions about Sharp product.

3. Ratings and characteristics

3-1. Absolute maximum ratings

Item	Symbol	Rating	Unit
Power Dissipation *1,4	Р	22.7	W
Forward Current *1,4	I <sub>F</sub>	600	mA
Reverse Voltage *2,4	V <sub>R</sub>	-15	V
Operating Temperature *3	T <sub>opr</sub>	- 30 ~ + 100	°C
Storage Temperature	T <sub>stg</sub>	- 40 ~ + 100	°C
Junction Temperature	Tj	145	°C

\*1 Power dissipation and forward current are the values when the module temperature is set lower than the rating by using an adequate heat sink.

\*2 The maximum rating of reverse voltage is assumed, after considering the voltage that occur due to initial connection error that may occur suddenly.

(Not dealing with the possibility of always-on reverse voltage.)

\*3 Operating temperature is the Case temperature Tc

(Refer to measuring point for case temperature in the next page.)

Refer to "Derating curve" in the next page as for operating current.

\*4  $T_c = 25 \ ^{\circ}C$

#### 3-3. Derating curve

(Note) To keep the case temperature lower than the rating, enough heat-radiation performance needs to be secured by using an adequate heat sink (refer to section 7-③).

For soldering connection, please evaluate in your usage environment to make sure soldering reliability. (Above derating curve is specified to LED device, not for soldering connection) And please consider to avoid physical stress between wire and substrate, and some protection like silicon bond on top of soldered wire is recommended.

Please ensure the maintenance of heat radiation does not exceed case temperature over the rating in operation.

(Measuring point for case temperature)

Thermal Resistance: 2.7 °C/W(Typical value)

SHARP
-------

#### 4. Reliability

The reliability of products shall be satisfied with items listed below.

4-1. Т	Test items and test condit	tions	Co	nfidence le	vel: 90 %
No.	Test item	Test conditions	Samples	Defective	LTPD
			n	C	(%)
1	Temperature Cycle	- 40 °C(30 min) $\sim$ + 100 °C(30 min), 100 cycles			
			11	0	20
2	Temperature Humidity	$T_{stg} = +60 ^{\circ}\text{C}, \text{RH} = 90 ^{\circ}\text{, Time} = 1000 \text{ h}$			
	Storage		11	0	20
3	High Temperature	$T_{stg} = +100^{\circ}C$ , Time = 1000 h			
	Storage		11	0	20
4	Low Temperature	$T_{stg} = -40 \text{ °C}, \text{ Time} = 1000 \text{ h}$			
	Storage		11	0	20
5	Steady State Operating	$Tc = 90 \degree C$ , IF = 400 mA, Time = 1000 h			
	Life		11	0	20
6	Shock	Acceleration: 15000 m/s <sup>2</sup> , Pulse width: 0.5 ms			
		Direction: 3 directions (X, Y and Z)			
		3 trials in each direction	5	0	50
7	Vibration	Frequency: 100 to 2000 Hz for 4 minutes per trial			
		Acceleration: 200 m/s <sup>2</sup>			
		Direction: 3 directions (X, Y and Z)			
		4 trials in each direction	5	0	50

#### 4-2. Failure criteria

No.	No. Parameter Symbol		Failure criteria
1	1 Forward Voltage V <sub>F</sub>		$V_F > Initial value \times 1.1$

7. Precautions	
① Storage conditions	
Please follow the conditions below.	
• Before opened: Temperature 5 $\sim$ 30 °C, Relative humidity less	than 60 %.
(Before opened LED should be used within a year)	
• After opened: Temperature 5 $\sim$ 30 °C, Relative humidity less the	nan 60 %.
(Please apply soldering within 1 week)	
• After opened LED should be kept in an aluminum moisture proof	bag with a moisture
absorbent material (silica gel).	
<ul> <li>Avoid exposing to air with corrosive gas.</li> <li>If exposed, electrode surface would be damaged, which may affect</li> </ul>	at soldering
n exposed, electrode surface would be damaged, which may arrea	et soldering.
② Usage conditions	
This product is not designed for the use under any of the following	-
Please carefully check the performance and reliability well enough	n in case of using under any of the
following conditions;	
• In a place with a lot of moisture, dew condensation, briny air, and	l corrosive gas.
(Cl, H2S, NH3, SO2, NOX, etc.)	
<ul> <li>Under the direct sunlight, outdoor exposure, and in a dusty place.</li> <li>In water, oil, medical fluid, and organic solvent.</li> </ul>	
Please do not use component parts like rubber which may contain s	sulfur (gasket packing adhesive material
etc.).	sunti (gasket packing, adnesi ve material
Please note that any strong acidic or alcoholic elements could effect	ct the silicon resin used in the LED devic
The heat and light released from the LED device, could generate h	alogen gas from the surrounding material
which may have adverse impact on the module. Before using pleas	e consider carefully about this issue.
③ Heat radiation and Installation	
If forward current (IF) is applied to single-state module at any cur	rent, there is a risk of damaging LED
or emitting smoke, due to increase in temperature.	
Equip with specified heat radiator(heat sink), and avoid heat being

occur, which may result in board cracks or lighting defects due to installation.	overneat. Please take particular house to
Refer to the following cautions while installing the LED device on	heat sink
• Apply thermolysis adhesive, adhesive sheet or peculiar connector	
In case of applying adhesive or adhesive sheet only, check the eff	
If LED comes off from heat radiator, unusual temperature rise en	
device deterioration, coming off of solder at leads, and emitting s	
•When LED device is mechanically fixed or locked, Please take in	to consideration regarding the method of
attachment due to fail from stress.	
•Please apply appropriate stress and design carefully, when fixing	the LED device using holder. Any
excessive or uneven stress could break LED device's substrate.	
• Avoid convexly uneven boards.	
Convex board is subject to substrate cracking or debasement of h	
• It is recommended to apply adhesive or adhesive sheet with high	thermal conductivity
for radiation of heat effectively.	

•Please take care about the influence of color change of adhesive or adhesive sheet in initial and long term period, which may affect light output or color due to change of reflectance from backside.

<ul> <li>GW6B*W**HD6 15 of 1</li> <li>Any excessive or uneven stress on the ceramic substrate could break the substrate. proper/uniform stress is applied on the substrate, when fixing the LED device using a holder. When fixing the LED device with a holder, please take note if any excessive or uneven stress is applied when pressing the substrate with holder. Due to this, the gap may arise between LED device and adhesive material, which may affect the heat dissipation of the device. Do not touch resin part including white resin part on the surface of LED. No light emission may occur due to damage of resin or cutting wire of LEDs by outer force. When using tweezers, please handle by ceramic substrate part and avoid touching resin part.		GW6B*W**HD6	15 of 17
For mounting, please handle by side part of ceramic or the specified area shown below.	proper/uniform stress is applied on the substrate, when fixing the LED When fixing the LED device with a holder, please take note if any exce when pressing the substrate with holder. Due to this, the gap may arise adhesive material, which may affect the heat dissipation of the device. Do not touch resin part including white resin part on the surface of LEI No light emission may occur due to damage of resin or cutting wire of	device using a holder. ssive or uneven stress is applie between LED device and D. LEDs by outer force. touching resin part.	

• The outer edges of the substrate may be uneven in some cases. Please avoid choosing these areas as fixing points, while designing for installation.

• In case of using heat radiation sheet or heat radiation adhesive, light reflection or absorption of these materials may influence the output of LED device. Especially, the color change that occur due to l ong-term use has direct impact on output of LED devices, and hence careful consideration is required while choosing the radiation sheet ro adhesive.

•Please avoid using any materials(such as PBT resin) that may release corrosive gases, around LED device.

④ Connecting method

Use soldering for connections. Follow the conditions mentioned below, to preserve the connection strength.

- •Use soldering iron with thermo controller (tip temperature 380 °C), within 5 seconds per one place.
- Secure the solderwettability on whole solder pad and leads.
- During the soldering process, put the ceramic board on materials whose conductivity is poor enough not to radiate heat of soldering.
- •Warm up (with using a heated plate) the substrate is recommended before soldering.
- (preheat condition: 100  $^{\circ}$ C  $\sim$  150  $^{\circ}$ C, within 60 sec )
- •Avoid touching any part of resin with soldering iron.
- This product is not designed for reflow and flow soldering.
- · Avoid such lead arrangement as applying stress to solder-applied area.
- Please do not detach solder and make re-solder.
- •Please solder evenly on each electrode.
- •Please prevent flux from touching to resin.
- •Do the soldering on stable stand. Avoid soldering on moving or vibrating objects.
- •Please avoid touching the soldering unit to resin.
- (5) Static electricity

This product is subject to static electricity, so take measures like wearing wrist band to cope with it. Install circuit protection device to drive circuit, if necessary.
