

Chipsmall Limited consists of a professional team with an average of over 10 year of expertise in the distribution of electronic components. Based in Hongkong, we have already established firm and mutual-benefit business relationships with customers from,Europe,America and south Asia,supplying obsolete and hard-to-find components to meet their specific needs.

With the principle of “Quality Parts,Customers Priority,Honest Operation,and Considerate Service”,our business mainly focus on the distribution of electronic components. Line cards we deal with include Microchip,ALPS,ROHM,Xilinx,Pulse,ON,Everlight and Freescale. Main products comprise IC,Modules,Potentiometer,IC Socket,Relay,Connector.Our parts cover such applications as commercial,industrial, and automotives areas.

We are looking forward to setting up business relationship with you and hope to provide you with the best service and solution. Let us make a better world for our industry!

H38 Incremental Optical Encoder

The H38 is an explosion proof version of the field-proven H25 encoder series. The H38 is UL certified for NEMA Class 4X and 6 (outdoor non-hazardous locations) and Class 4X and 13 (indoor non-hazardous locations). It is available with single and triple certifications for use in hazardous locations and includes a standard shaft seal, double bearing seals, and a cast aluminum housing with hard anodized and dichromate sealed finish. The H38 is suitable for use in petroleum service industries, solvent refining operations, spray painting applications, and explosive dust environments.

The H38 Incremental Encoder is available with the following certifications:

EN 61000-6-4 and EN 61000-6-2

II 2 G Ex d IIB T4 Gb

Class I, Group C & D;
Class II Group E, F & G;
Class I, XXXXX

IECEx (Exd IIB T4)
UL 14.0006X

The Mine Safety and Health Administration (MSHA) is an organization that operates in the United States and enforces compliance with safety and health standards in the Nation's mines. Consult factory for MSHA rated product.

Mechanical Specifications

Shaft Diameter: 3/8" nominal

Shaft Loading: Up to 40 pounds axial and 20 pounds radial applied 1/4" from housing

Shaft Runout: 0.0005 T.I.R.

Starting Torque at 25° C: 4.0 in-oz (max)

Bearings: Class ABEC 7 standard

Shaft Material: 303 stainless steel

Enclosure: Die cast aluminum, hard anodized with sealed finish. Shaft seals and sealed bearings are standard to achieve environmental ratings.

Bearing Life: 2 X 10⁸ revs (1300 hrs at 2500 RPM) at rated load; 1 X 10¹⁰ revs (67,000 hrs at 2500 RPM) at 10% of rated load

Maximum RPM: 10,000 RPM (see Frequency Response, below)

Moment of Inertia: 4.1 X 10⁻⁴ oz-in-sec² UL & MSHA/ 1.7 X 10⁻³ oz-in-sec² CEN

Weight: 64 oz typical (approx 4 lbs)

Electrical Specifications

Code: Incremental

Output Format: 2 channels in quadrature, 1/2 cycle index gated with negative B channel

Cycles per Shaft Turn: 1 to 72,000 (see table 2, back page). For resolutions above 3,600 see Note 7.

Supply Voltage: 5 to 28 VDC

Current Requirements: 100 mA typical +output load, 250 mA (max)

Voltage/Output: (see note 3)

15V/V: Line Driver, 5–15 VDC in, V_{out} = V_{in}
28V/V: Line Driver, 5–28 VDC in, V_{out} = V_{in}
28V/5: Line Driver, 5–28 VDC in, V_{out} = 5 VDC
28V/OC: Open Collector, 5–28 VDC in, OC_{out}

Protection Level: Reverse, overvoltage and output short circuit (see note 3)

Frequency Response: 100 KHz Typical, Higher frequency response available, see note 5

Output Terminations: see Table 1, back page

Termination Type: Compression type, UL recognized. Accepts AWG 14 to 22, stranded wire, strip 1/4"

Note: Consult factory for other electrical options

Environmental Specifications

Enclosure Rating: NEMA 4X & 6

(IP66), outdoor Non-Hazardous locations, NEMA 4X & 13 (IP66), indoor Non-Hazardous locations

Temperature: Standard operating all models, 0° to +70°C; Storage all models, -50° to +90°C; Extended temp testing avail.: for UL, -40° to +80°C; for CEN, -50° to +90°C.

Shock: 50 g's at 11 msec

Vibration: 5 to 2000 Hz @ 20 g's

Humidity: 100% RH

Hazardous Area Rating: UL listed for use in hazardous locations. Class I, Group D, or Class I, Groups C & D, and Class II, Groups E, F & G. NEMA Enclosure 7.

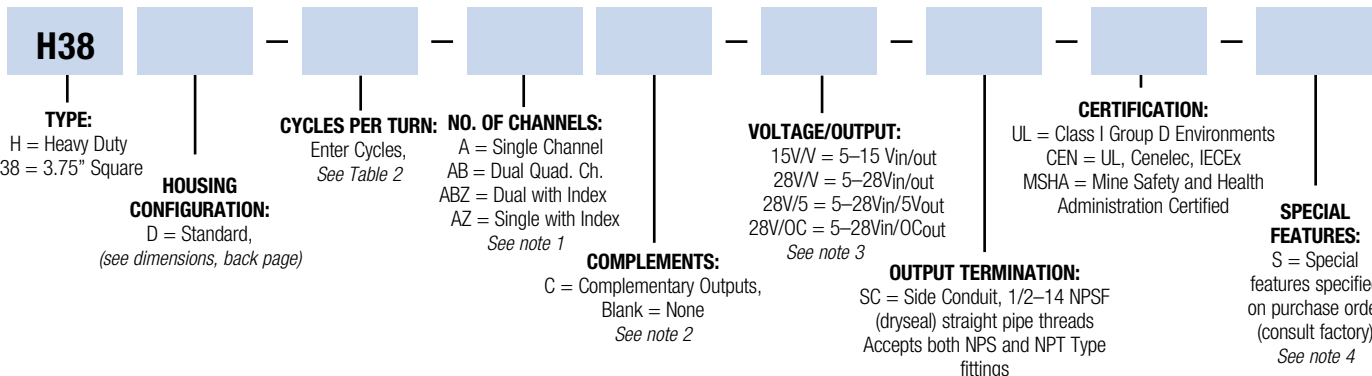

NOTES & TABLES:

All notes and tables referred to in the text can be found on the back page.

H38 Explosion Proof Ordering Options FOR ASSISTANCE CALL 800-350-2727

Use this diagram, working from left to right to construct your model number (example:H38D-2000-ABZC-28V/V-SC-CEN).

All notes and tables referred to can be found on the back of this page.

Dimensions

Notes

1. Non-standard index widths and multiple indices are available by special order. Consult factory.
2. Complementary outputs are recommended for use with line driver type (source/sink) outputs. When used with differential receivers, this combination provides a high degree of noise immunity.
3. **Output IC's:** Output IC's are available as either Line Driver (LD) or NPN Open Collector (OC) types. Open Collectors require pull-up resistors, resulting in higher output source impedance (sink impedance is similar to that of line drivers). In general, use of a Line Driver style output is recommended. Line Drivers source or sink current and their lower impedance mean better noise immunity and faster switching times. **Warning:** Do not connect any line driver outputs directly to circuit common/OV. Those may damage the driver. Unused outputs should be isolated and left floating. Our applications specialists would be pleased to discuss your system requirements and the compatibility of your receiving electronics with Line Driver type outputs. **28V/V:** Multi-voltage Line Driver (7272*): 100 mA source/sink. Input voltage 5 to 28 VDC +/- 5% standard (Note: $V_{out} = V_{in}$). This driver is TTL compatible when used with 5 volt supply. Supply lines are protected against overvoltage to 60 volts and reverse voltage. Outputs are short circuit protected for one minute. Supply current is 120 mA typical (plus load current). This is the recommended replacement for 3904R and 7406R open collector outputs with internal pullup resistors. It is also a direct replacement for any 4469, 88C30, 8830 or 26LS31 line driver. **28V/S:** Multi-voltage Line Driver (7272*): 100 mA source/sink. Input voltage 5 to 28 VDC +/- 5% standard, internally regulated with 5V (TTL compatible) logic out. Supply lines are protected against overvoltage to 60 volts and reverse voltage. Outputs are short circuit protected for one minute. Supply current is 120 mA typical (plus load current). **15V/V:** Multi-voltage Line Driver (4469*): 100 mA source/sink. Input voltage 5 to 15 VDC +/- 5% standard (Note: $V_{out} = V_{in}$). TTL compatible when used with 5 volt. Supply lines are protected against overvoltage to 60 volts and reverse voltage. Outputs are short circuit protected for one minute. Supply current is 90 mA typical (plus load current). **15V/O:** NPN Open Collector (3904*, 7273*). Current sink of 80 mA max. Current sourced by external pull-up resistor. Output can be pulled up to voltage other than supply voltage (30 V max). Input voltage 5 to 28 VDC +/- 5% standard. Supply current is 120 mA typical. This replaces prior IC's with designations of 3904, 7406, 3302, 681 and 689. **5V/OCR, 15V/OCR, 24V/OCR:**

Open Collector (3904R*, 7406R*, 7273R*): Current sink of 70 mA max. Includes internal pull-ups sized at approximately 100 ohms/volt. Max current source is 10 mA. Supply current is 100 mA typical, 120 mA with internal pull-ups. The 5V/OCR, 15V/OCR and 24V/OCR are often replaced by the 28V/V in system upgrades.

4. Special -S at the end of the model number is used to define a variety of non-standard features such as special shaft lengths, voltage options, or special testing. Please consult the factory to discuss your special requirements.
 5. Higher frequency response may be available. Please consult with the factory.
 6. Extended temperature ratings are available. Consult with factory for more specific information.
 7. For interpolation options, contact factory. See Doc. 01059-000 supplied with encoders for Important Installation and Usage notes summarized here.
- Encoder Installation:**
1. Environment: Hazardous Locations — **UL** Complies with UL and cUL requirements; **CEN** Shall comply with UL requirements plus CENELAC/ATEX plus IECEx standards
 2. **WARNING:** Open all circuits prior to connecting this product to power and controller.
 3. The installation must comply with NEC Class 2 circuits or with the regulations of the country of use.
 4. AWG 14 - 22 stranded wire stripped to .25" [6.3mm] is recommended.
 5. Use agency approved 105° C minimum rated cable/conductors housed within an approved rigid conduit.
 6. Conduit runs must have a sealing fitting certified to 60079-0 Ex d IIB immediately at the entrance to the device.
 7. Tightly close terminal block access cover prior to applying power.
 8. For maximum bearing life, a flexible coupling is recommended between encoder shaft and driving shaft.
 9. Thread sealant compound should be used for 1/2-14 fitting or cable gland to prevent ingress of contamination.

During Use:

1. Keep terminal block access tightly secured during use.
2. DO NOT loosen two 5/16" set screws at opposite face.

Maintenance and Service:

1. There are no user serviceable parts inside. Encoder must be returned to factory for service.
2. **WARNING:** Open all circuits to this product prior to opening access cover to disconnect wires.
