

Chipsmall Limited consists of a professional team with an average of over 10 year of expertise in the distribution of electronic components. Based in Hongkong, we have already established firm and mutual-benefit business relationships with customers from Europe, America and south Asia, supplying obsolete and hard-to-find components to meet their specific needs.

With the principle of "Quality Parts, Customers Priority, Honest Operation, and Considerate Service", our business mainly focus on the distribution of electronic components. Line cards we deal with include Microchip, ALPS, ROHM, Xilinx, Pulse, ON, Everlight and Freescale. Main products comprise IC, Modules, Potentiometer, IC Socket, Relay, Connector. Our parts cover such applications as commercial, industrial, and automotives areas.

We are looking forward to setting up business relationship with you and hope to provide you with the best service and solution. Let us make a better world for our industry!

# HCPL-7601/7611

CMOS/TTL Compatible, Low Input Current, High Speed,  
High CMR Optocoupler

**Avago**  
TECHNOLOGIES

## Data Sheet

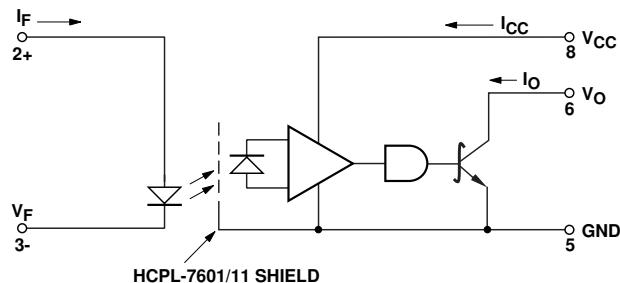

### Description

The HCPL-7601/11 is a low input current version of the HCPL-2601/11 and 6N137 (without enable). The optically coupled gates combine an AlGaAs high-efficiency light emitting diode and an integrated high gain photon detector to create a low input current device for low power applications. The output of the detector IC is an open collector Schottky-clamped transistor. The internal shield provides a guaranteed common mode transient immunity specification of 10,000 V/ $\mu$ s (HCPL-7611).

This unique design provides maximum ac and dc circuit isolation while achieving CMOS and TTL compatibility. The optocoupler ac and dc operational parameters are guaranteed from -40°C to 85°C with no derating required allowing trouble free system performance. This product is suitable for high speed logic interfacing, input/output buffering, and applications that require low input-current switching levels.

### Schematic

USE OF A 0.1  $\mu$ F BYPASS CAPACITOR  
CONNECTED BETWEEN PINS 5 AND 8  
IS REQUIRED (SEE NOTE 1).

TRUTH TABLE  
(POSITIVE LOGIC)

LED	OUTPUT
ON	L
OFF	H

### Features

- Low input current version of HCPL-2601/11 and 6N137
- Wide input current range: I<sub>F</sub> = 2 mA to 10 mA
- CMOS/TTL compatible
- Guaranteed switching threshold: I<sub>F</sub> = 2 mA (max.)
- Internal shield for high Common Mode Rejection (CMR)  
HCPL-7601: 5,000 V/ $\mu$ s (typical) at V<sub>CM</sub> = 50 V, I<sub>F</sub> = 4 mA  
HCPL-7611: 15,000 V/ $\mu$ s (typical) at V<sub>CM</sub> = 1000 V, I<sub>F</sub> = 4 mA
- High speed: 10 Mbd typical
- Guaranteed ac and dc performance over temperature:  
-40°C to 85°C
- IEC/EN/DIN EN 60747-5-2 approval: V<sub>IORM</sub> = 600 V<sub>RMS</sub>
- UL recognized: 3750 V<sub>RMS</sub>, 1 minute
- CSA accepted
- Low supply current requirement
- Low T<sub>PSK</sub>: 40 ns guaranteed
- Lead-free option "-000E"

### Applications

- Isolated line receiver
- Simplex/multiplex data transmission
- Programmable logic controllers
- Computer-peripheral interface
- Microprocessor system interface
- Digital isolation for A/D, D/A conversion
- Switching power supply
- Instrument input/output isolation
- Ground loop elimination
- Pulse transformer replacement

**CAUTION:** The small device geometries inherent to the design of this bipolar component increase the component's susceptibility to damage from electrostatic discharge (ESD). It is advised that normal static precautions be taken in handling and assembly of this component to prevent damage and/or degradation which may be induced by ESD.

The HCPL-7601/11 family offers many features that are especially beneficial to system designers. The low input current requirements and guaranteed switching threshold (2 mA max.) allows the LED to be driven directly by any standard high-speed CMOS gate (e.g. 74HC/HCT). This will simplify designs by eliminating the need for special driver circuits and result in lower part counts and greater system reliability while freeing up valuable printed circuit board space.

The wide current input range of 2 mA to 10 mA and guaranteed ac and dc performance over a wide temperature range will also simplify designs. Low supply current requirements mean lower power dissipation allowing for the use of a smaller, less expensive power supply. The high speed (10 Mbd typ.) and low propagation delay skew ( $T_{psk} \leq 40$  ns guaranteed) allow for easier design of high speed parallel applications. The world-wide regulatory approval (UL/CSA/IEC/EN/DIN EN 60747-5-2) will facilitate the acceptance of the end product in international markets.

### **Regulatory Information**

The HCPL-7601 and HCPL-7611 have been approved by the following organizations:

#### **UL**

Approved under UL 1577, component recognition FILE E55361).

#### **IEC/ EN/ DIN EN 60747-5-2**

Approved under:  
IEC 60747-5-2:1997 + A1:2002  
EN 60747-5-2:2001 + A1:2002  
DIN EN 60747-5-2 (VDE 0884 Teil 2):2003-01

This optocoupler is suitable for “safe electrical isolation” only within the safety limit data. Maintenance of the safety data shall be ensured by means of protective circuits.

Can be used for safe electrical separation between ac mains and SELV (safety extra-low voltage) in equipment according to the following specifications:

DIN VDE 0804/05.89  
DIN VDE 0160/05.88

Reference voltage (VDE 011b Tab 4): 630 Vac.

#### **CSA**

Approved under CSA22.2 No. 0 - General Requirements, Canadian Electrical Code, Part II; and CSA Component Acceptance Notice #5, File CA 88324.

## **Ordering Information**

HCPL-7xxx is UL Recognized with 3750 Vrms for 1 minute per UL1577 and is approved under CSA Component Acceptance Notice #5, File CA 88324.

Part Number	Option		Package	Surface Mount	Gull Wing	Tape & Reel	UL 5000 Vrms/ 1 Minute rating	IEC/ EN/ DIN EN 60747-5-2	Quantity
	RoHS Compliant	non RoHS Compliant							
HCPL-7601	-000E	no option	300 mil DIP-8						50 per tube
HCPL-7611	-300E	# 300		X	X				50 per tube
	-500E	# 500		X	X	X			1000 per reel

To order, choose a part number from the part number column and combine with the desired option from the option column to form an order entry. Combination of Option 020 and Option 060 is not available.

Example 1:

HCPL-7611-560E to order product of 300 mil DIP Gull Wing Surface Mount package in Tape and Reel packaging with IEC/EN/DIN EN 60747-5-2 Safety Approval and RoHS compliant.

Example 2:

HCPL-7601 to order product of 300 mil DIP package in Tube packaging and non RoHS compliant.

Option datasheets are available. Contact your Avago sales representative or authorized distributor for information.

Remarks: The notation '#XXX' is used for existing products, while (new) products launched since July 15, 2001 and RoHS compliant will use '-XXxE.'

### Absolute Maximum Ratings

(No Derating Required up to 85°C)

Storage Temperature .....	-55°C to +125°C
Operating Temperature .....	-40°C to +85°C
Lead Solder Temperature .....	260°C for 10 s (1.6 mm below seating plane)
Average Input Current - $I_F$ (See Note 2.) .....	20 mA
Reverse Input Voltage - $V_R$ .....	3 V
Supply Voltage - $V_{CC}$ .....	7 V (1 Minute Maximum)
Output Collector Current - $I_O$ .....	50 mA
Output Collector Power Dissipation .....	85 mW
Output Collector Voltage - $V_O^*$ .....	7 V
Total Package Power Dissipation .....	250 mW

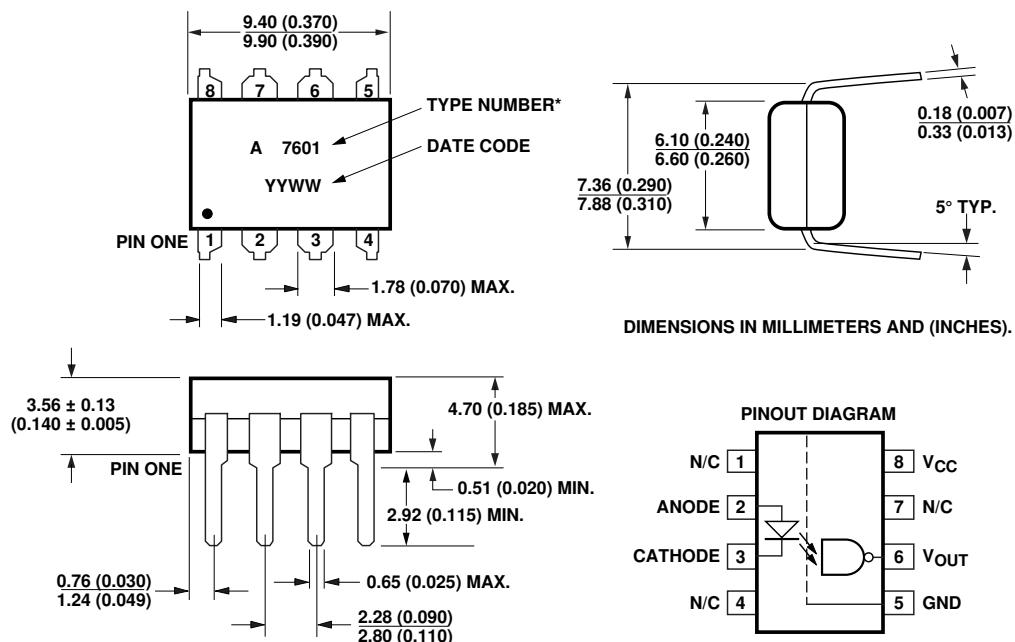

\*Selection for higher output voltage up to 20 V is available.

### Recommended Operating Conditions

Parameter	Symbol	Min.	Max.	Units
Input Voltage, Low Level	$V_{FL}$	0	0.8	V
Input Current, High Level	$I_{FH}$	2	10	mA
Supply Voltage, Output	$V_{CC}$	4.5	5.5	V
Fan Out @ $R_L = 1 \text{ k}\Omega$	N		5	TTL Loads
Operating Temperature	$T_A$	-40	85	°C
Output Pull-up Resistor	$R_L$	330	4 k	Ω

## Package Outline Drawing

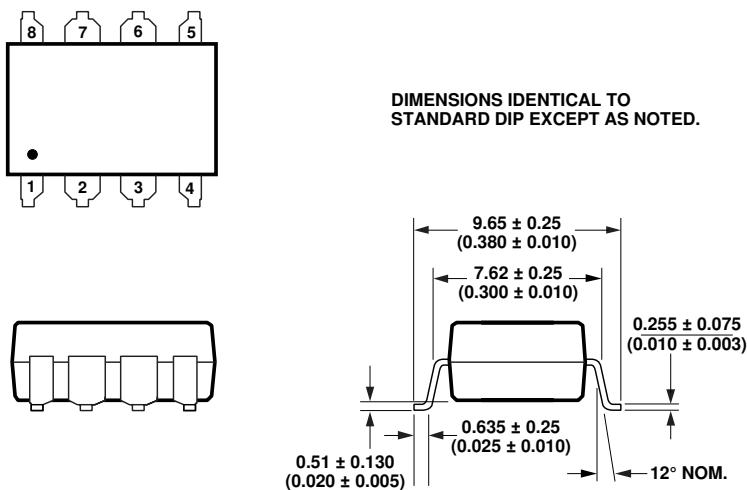

### Standard DIP Package

\*TYPE NUMBER FOR: HCPL-7601 = 7601  
HCPL-7611 = 7611

NOTE: FLOATING LEAD PROTRUSION IS 0.5 mm (20 mils) MAX.

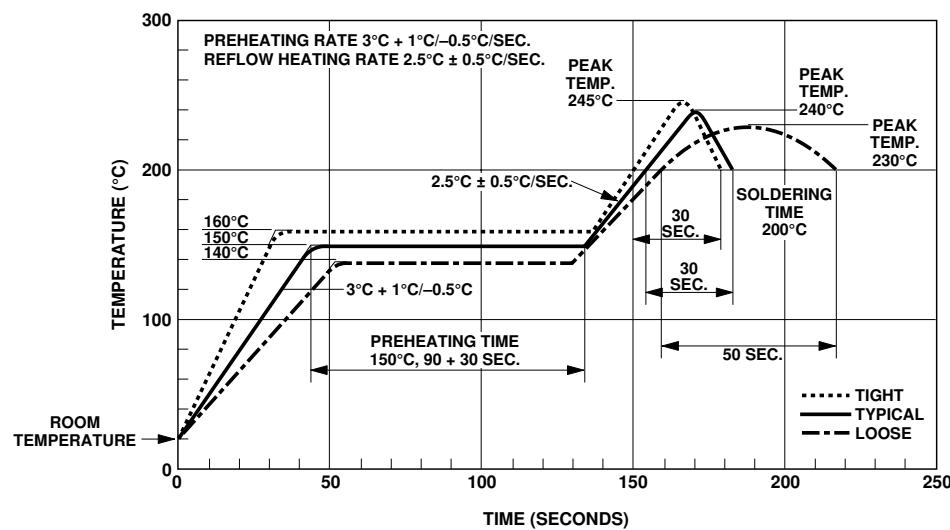

### Gull Wing Surface Mount Option 300\*

\* REFER TO OPTION 300 DATA SHEET FOR MORE INFORMATION.

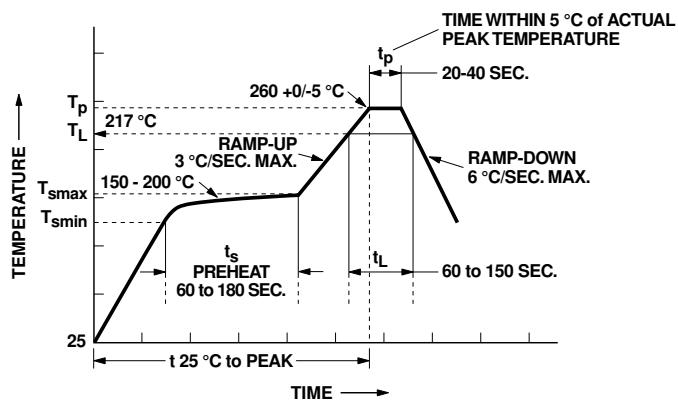

NOTE: FLOATING LEAD PROTRUSION IS 0.5 mm (20 mils) MAX.

## Solder Reflow Temperature Profile

Note: Non-halide flux should be used.

## Recommended Pb-free IR Profile

NOTES:  
THE TIME FROM 25 °C to PEAK TEMPERATURE = 8 MINUTES MAX.  
 $T_{smax} = 200^{\circ}\text{C}$ ,  $T_{smin} = 150^{\circ}\text{C}$

Note: Non-halide flux should be used.

## IEC/ EN/ DIN EN 60747-5-2 Insulation Characteristics

Description	Symbol	Characteristics	Unit
Installation classification per DIN VDE 0109*/ 12.83, Table 1 for rated mains voltage $\leq 300 \text{ V}_{\text{RMS}}$ for rated mains voltage $\leq 600 \text{ V}_{\text{RMS}}$		I-IV I-III	
Climatic Classification		40/ 85/ 21	
Pollution Degree (DIN VDE 0109/ 12.83)*	2		
Maximum Working Insulation Voltage $V_{\text{IORM}}$	600	$V_{\text{RMS}}$	
		848	$V_{\text{peak}}$
Input to Output Test Voltage, Method b** $V_{\text{PR}} = 1.6 \times V_{\text{IORM}}$ Production test with $t_p = 1 \text{ sec}$ , Partial discharge $< 5 \text{ pC}$	$V_{\text{PR}}$	960	$V_{\text{RMS}}$
		1357	$V_{\text{peak}}$
Input to Output Test Voltage, Method a** $V_{\text{PR}} = 1.2 \times V_{\text{IORM}}$ Production test with $t_p = 60 \text{ sec}$ , Partial discharge $< 5 \text{ pC}$	$V_{\text{PR}}$	720	$V_{\text{RMS}}$
		1018	$V_{\text{peak}}$
Highest Allowable Overvoltage** (Transient Overvoltage, $t_{\text{TR}} = 10 \text{ sec}$ )	$V_{\text{TR}}$	6000	$V_{\text{peak}}$
Safety-limiting values (Maximum values allowed in the event of a failure, also see Figure 16)			
Case Temperature	$T_{\text{SI}}$	175	°C
Input Power	$P_{\text{SI},\text{Input}}$	80	mW
Output Power	$P_{\text{SI},\text{Output}}$	250	mW
Insulation Resistance at $T_{\text{SI}}$ , $V_{\text{IO}} = 500 \text{ V}$ $R_{\text{IS}}$	$\geq 10^{11}$	$\Omega$	

\* This part may also be used in Pollution Degree 3 environments where the rated mains voltage is  $\leq 300 \text{ V}_{\text{RMS}}$  (per DIN VDE 0190/ 12.83).

\*\* Refer to the front of the optocoupler section of the current Optoelectronics Designers Catalog for a more detailed description of IEC/ EN/ DIN EN 60747-5-2 and other product safety regulations.

## Insulation Related Specifications

Parameter	Symbol	Value	Units	Conditions
Minimum External Clearance (External Air Gap)	L (IO1)	7.0	mm	Measured from input terminals to output terminals
Minimum External Creepage (External Tracking)	L (IO2)	8.0	mm	Measured from input terminals to output terminals
Minimum Internal Clearance (Internal Plastic Gap)		0.5	mm	Through insulation distance from conductor to conductor
Comparative Tracking Index	CTI	175	V	DIN IEC 112/ VDE 303 P1
Isolation Group (per DIN VDE 0109)		IIIa		Material Group

## Electrical Specifications

Over recommended temperature ( $T_A = -40^\circ\text{C}$  to  $85^\circ\text{C}$ ) unless otherwise specified. (See note 1.)

Parameter	Symbol	Min.	Typ.*	Max.	Units	Test Conditions	Fig.	Note
Input Threshold Current	$I_{TH}$		1	2	mA	$V_{CC} = 5.5 \text{ V}$ , $I_O \geq 13 \text{ mA}$ , $V_O = 0.6 \text{ V}$	5	
High Level Output Current	$I_{OH}$		3	100	$\mu\text{A}$	$V_{CC} = 5.5 \text{ V}$ , $V_O = 5.5 \text{ V}$ $V_{FL} = 0.8 \text{ V}$	1

							$V_{CM} = 1000 \text{ V}$					
							$I_F = 4 \text{ mA}$					
							$R_L = 350 \Omega$					
							$V_{CM} = 1000 \text{ V}$					

\*All typicals at  $T_A = 25^\circ\text{C}$ ,  $V_{CC} = 5 \text{ V}$ .

**Notes:**

1. Bypassing of the power supply line is required with a  $0.1 \mu\text{F}$  ceramic disc capacitor adjacent to each optocoupler, as illustrated in Figure 15. Total lead length between both ends of the capacitor and the isolator pins should not exceed 10 mm.
2. Peaking circuits may produce transient input currents up to 50 mA, 50 ns maximum pulse width, provided average current does not exceed 20 mA.
3. Device considered a two terminal device: pins 1, 2, 3, and 4 shorted together, and pins 5, 6, 7, and 8 shorted together.
4. The  $t_{PLH}$  propagation delay is measured from the 50% point on the trailing edge of the input pulse to the 1.5 V point on the trailing edge of the output pulse.
5. The  $t_{PHL}$  propagation delay is measured from the 50% point on the leading edge of the input pulse to the 1.5 V point on the leading edge of the output pulse.
6.  $t_{PSK}$  is equal to the worst case difference in  $t_{PHL}$  and/or  $t_{PLH}$  that will be seen between units at any given temperature within the operating condition range.
7.  $CM_H$  is the maximum tolerable rate of rise of the common mode voltage to assure that the output will remain in a high logic state (i.e.,  $V_{OUT} > 2.0 \text{ V}$ ).
8.  $CM_L$  is the maximum tolerable rate of fall of the common mode voltage to assure that the output will remain in a low logic state (i.e.,  $V_{OUT} < 0.8 \text{ V}$ ). This specification

assumes that good board layout procedures were followed to reduce the effective input/ output capacitance as shown in Figure 15.

9. In accordance with UL and CSA requirements, each optocoupler is proof tested by applying an insulation test voltage  $\geq 5000 \text{ Vrms}$  for one second (leakage detection current limit,  $I_{LO} \leq 5 \mu\text{A}$ ).
10. AC performance at  $I_F = 4 \text{ mA}$  is approximately equivalent to the HCPL-2601/11 at  $I_F = 7.5 \text{ mA}$  for comparison purposes.
