## : ©hipsmall

Chipsmall Limited consists of a professional team with an average of over 10 year of expertise in the distribution of electronic components. Based in Hongkong, we have already established firm and mutual-benefit business relationships with customers from,Europe,America and south Asia,supplying obsolete and hard-to-find components to meet their specific needs.

With the principle of "Quality Parts,Customers Priority,Honest Operation, and Considerate Service",our business mainly focus on the distribution of electronic components. Line cards we deal with include Microchip,ALPS,ROHM,Xilinx,Pulse,ON,Everlight and Freescale. Main products comprise IC,Modules,Potentiometer,IC Socket,Relay,Connector.Our parts cover such applications as commercial,industrial, and automotives areas.

We are looking forward to setting up business relationship with you and hope to provide you with the best service and solution. Let us make a better world for our industry!

## HEF4053B-Q100

Triple single-pole double-throw analog switch
Rev. 2 - 11 September 2014
Product data sheet

## 1. General description

The HEF4053B-Q100 is a triple single-pole double-throw (SPDT) analog switch, suitable for use as an analog or digital multiplexer/demultiplexer. Each switch has a digital select input (Sn), two independent inputs/outputs ( $\mathrm{nY0}$ and nY 1 ) and a common input/output ( $n Z$ ). All three switches share an enable input ( $\overline{\mathrm{E}}$ ). A HIGH on $\overline{\mathrm{E}}$ causes all switches into the high-impedance OFF-state, independent of Sn.
$V_{D D}$ and $V_{S S}$ are the supply voltage connections for the digital control inputs ( Sn and $\overline{\mathrm{E}}$ ). The $V_{D D}$ to $V_{S S}$ range is 3 V to 15 V . The analog inputs/outputs ( $n Y 0, n Y 1$ and $n Z$ ) can swing between $\mathrm{V}_{\mathrm{DD}}$ as a positive limit and $\mathrm{V}_{\mathrm{EE}}$ as a negative limit. $\mathrm{V}_{\mathrm{DD}}$ - $\mathrm{V}_{\mathrm{EE}}$ may not exceed 15 V . Unused inputs must be connected to $\mathrm{V}_{\mathrm{DD}}, \mathrm{V}_{\mathrm{SS}}$, or another input. For operation as a digital multiplexer/demultiplexer, $\mathrm{V}_{\mathrm{EE}}$ is connected to $\mathrm{V}_{\mathrm{SS}}$ (typically ground). $\mathrm{V}_{\mathrm{EE}}$ and $\mathrm{V}_{\mathrm{SS}}$ are the supply voltage connections for the switches.

This product has been qualified to the Automotive Electronics Council (AEC) standard Q100 (Grade 1) and is suitable for use in automotive applications.

## 2. Features and benefits

- Automotive product qualification in accordance with AEC-Q100 (Grade 1)

S Specified from $-40^{\circ} \mathrm{C}$ to $+85^{\circ} \mathrm{C}$ and from $-40^{\circ} \mathrm{C}$ to $+125^{\circ} \mathrm{C}$

- Fully static operation
- 5 V , 10 V , and 15 V parametric ratings
- Standardized symmetrical output characteristics
- ESD protection:
- MIL-STD-883, method 3015 exceeds 2000 V
- HBM JESD22-A114F exceeds 2000 V
- MM JESD22-A115-A exceeds $200 \mathrm{~V}(\mathrm{C}=200 \mathrm{pF}, \mathrm{R}=0 \Omega)$
- Complies with JEDEC standard JESD 13-B

## 3. Applications

- Analog multiplexing and demultiplexing
- Digital multiplexing and demultiplexing
- Signal gating

## 4. Ordering information

Table 1. Ordering information
All types operate from $-40{ }^{\circ} \mathrm{C}$ to $+125^{\circ} \mathrm{C}$.

| Type number | Package |  |  |
| :--- | :--- | :--- | :--- | :--- |
|  | Name | Description | Version |
| HEF4053BT-Q100 | SO16 | plastic small outline package; 16 leads; body width 3.9 mm | SOT109-1 |
| HEF4053BTT-Q100 | TSSOP16 | plastic thin shrink small outline package; 16 leads; body width 4.4 mm | SOT403-1 |

## 6. Pinning information

### 6.1 Pinning

### 6.2 Pin description

Table 2. Pin description

| Symbol | Pin | Description |
| :--- | :--- | :--- |
| $\overline{\mathrm{E}}$ | 6 | enable input (active LOW) |
| $\mathrm{V}_{\mathrm{EE}}$ | 7 | supply voltage |
| $\mathrm{V}_{\mathrm{SS}}$ | 8 | ground supply voltage |
| S 1, S2, S3 | $11,10,9$ | select input |
| $1 \mathrm{Y}, 2 \mathrm{Y}, 3 \mathrm{Y} 0$ | $12,2,5$ | independent input or output |
| $1 \mathrm{Y} 1,2 \mathrm{Y} 1,3 \mathrm{Y} 1$ | $13,1,3$ | independent input or output |
| $1 Z, 2 Z, 3 Z$ | $14,15,4$ | independent output or input |
| $\mathrm{V}_{\mathrm{DD}}$ | 16 | supply voltage |

## 7. Functional description

Table 3. Function table [1]

| Inputs | Sn | Channel on |
| :--- | :--- | :--- |
| $\overline{\text { E }}$ | L |  |
| L | H | nY0 to nZ |
| L | X | nY1 to nZ |
| H | switches OFF |  |

[1] $H=$ HIGH voltage level; $L=$ LOW voltage level; $X=$ don't care.

## 8. Limiting values

Table 4. Limiting values
In accordance with the Absolute Maximum Rating System (IEC 60134). Voltages are referenced to $V_{S S}=0 \mathrm{~V}$ (ground).

| Symbol | Parameter | Conditions |  | Min | Max | Unit |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| $\mathrm{V}_{\mathrm{DD}}$ | supply voltage |  |  | -0.5 | +18 | V |
| $\mathrm{V}_{\text {EE }}$ | supply voltage | referenced to $V_{\text {DD }}$ | [1] | -18 | +0.5 | V |
| $\mathrm{I}_{\mathrm{IK}}$ | input clamping current | pins Sn and $\overline{\mathrm{E}}$; $\mathrm{V}_{1}<-0.5 \mathrm{~V} \text { or } \mathrm{V}_{1}>\mathrm{V}_{\mathrm{DD}}+0.5 \mathrm{~V}$ |  | - | $\pm 10$ | mA |
| V | input voltage |  |  | -0.5 | $V_{D D}+0.5$ | V |
| l/O | input/output current |  |  | - | $\pm 10$ | mA |
| IDD | supply current |  |  | - | 50 | mA |
| $\mathrm{T}_{\text {stg }}$ | storage temperature |  |  | -65 | +150 | ${ }^{\circ} \mathrm{C}$ |
| $\mathrm{T}_{\text {amb }}$ | ambient temperature |  |  | -40 | +125 | ${ }^{\circ} \mathrm{C}$ |

Table 4. Limiting values ...continued
In accordance with the Absolute Maximum Rating System (IEC 60134). Voltages are referenced to $V_{S S}=0$ V (ground).

| Symbol | Parameter | Conditions |  | Min | Max | Unit |
| :--- | :--- | :--- | :--- | :--- | :--- | :--- |
| $P_{\text {tot }}$ | total power dissipation | $T_{\text {amb }}=-40^{\circ} \mathrm{C}$ to $+125^{\circ} \mathrm{C}$ | [2] |  |  |  |
|  |  | SO16 package |  | - | 500 | mW |
|  |  | TSSOP16 package |  | - | 500 | mW |
|  |  | power dissipation | per output |  | - | 100 |

[1] To avoid drawing $V_{D D}$ current out of terminal $Z$, when switch current flows into terminals $n Y n$, the voltage drop across the bidirectional switch must not exceed 0.4 V . If the switch current flows into terminal Z, no $\mathrm{V}_{\mathrm{DD}}$ current will flow out of terminals nYn, and in this case there is no limit for the voltage drop across the switch, but the voltages at $n \mathrm{Yn}$ and Z may not exceed $\mathrm{V}_{\mathrm{DD}}$ or $\mathrm{V}_{\mathrm{EE}}$.
[2] For SO16 package: $\mathrm{P}_{\text {tot }}$ derates linearly with $8 \mathrm{~mW} / \mathrm{K}$ above $70^{\circ} \mathrm{C}$.
For TSSOP16 package: $P_{\text {tot }}$ derates linearly with $5.5 \mathrm{~mW} / \mathrm{K}$ above $60^{\circ} \mathrm{C}$.

## 9. Recommended operating conditions

Table 5. Recommended operating conditions

| Symbol | Parameter | Conditions |  | Min | Typ | Max | Unit |
| :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- |
| $\mathrm{V}_{\mathrm{DD}}$ | supply voltage | see Figure 7 |  | 3 | - | 15 |  |
| $\mathrm{~V}_{\mathrm{I}}$ | input voltage |  | 0 | - | $\mathrm{V}_{\mathrm{DD}}$ | V |  |
| $\mathrm{T}_{\mathrm{amb}}$ | ambient temperature | in free air |  | -40 | - | +125 | ${ }^{\circ} \mathrm{C}$ |
| $\mathrm{t} / \Delta \mathrm{V}$ | input transition rise and fall <br> rate | $\mathrm{V}_{\mathrm{DD}}=5 \mathrm{~V}$ |  | - | - | 3.75 | $\mu \mathrm{~s} / \mathrm{V}$ |
|  | $\mathrm{V}_{\mathrm{DD}}=10 \mathrm{~V}$ |  | - | - | 0.5 | $\mu \mathrm{~s} / \mathrm{V}$ |  |
|  | $\mathrm{V}_{\mathrm{DD}}=15 \mathrm{~V}$ |  | - | - | 0.08 | $\mu \mathrm{~s} / \mathrm{V}$ |  |

## 15. Legal information

### 15.1 Data sheet status

| Document status $[1][2]$ | Product status $[3]$ | Definition |
| :--- | :--- | :--- |
| Objective [short] data sheet | Development | This document contains data from the objective specification for product development. |
| Preliminary [short] data sheet | Qualification | This document contains data from the preliminary specification. |
| Product [short] data sheet | Production | This document contains the product specification. |

[1] Please consult the most recently issued document before initiating or completing a design.
[2] The term 'short data sheet' is explained in section "Definitions".
[3] The product status of device(s) described in this document may have changed since this document was published and may differ in case of multiple devices. The latest product status information is available on the Internet at URL http://www.nexperia.com

### 15.2 Definitions

Draft - The document is a draft version only. The content is still under internal review and subject to formal approval, which may result in modifications or additions. Nexperia does not give any representations or warranties as to the accuracy or completeness of information included herein and shall have no liability for the consequences of use of such information.

Short data sheet - A short data sheet is an extract from a full data sheet with the same product type number(s) and title. A short data sheet is intended for quick reference only and should not be relied upon to contain detailed and full information. For detailed and full information see the relevant full data sheet, which is available on request via the local Nexperia sales office. In case of any inconsistency or conflict with the short data sheet, the full data sheet shall prevail.
Product specification - The information and data provided in a Product data sheet shall define the specification of the product as agreed between Nexperia and its customer, unless Nexperia and customer have explicitly agreed otherwise in writing. In no event however, shall an agreement be valid in which the Nexperia product is deemed to offer functions and qualities beyond those described in the Product data sheet.

### 15.3 Disclaimers

Limited warranty and liability - Information in this document is believed to be accurate and reliable. However, Nexperia does not give any representations or warranties, expressed or implied, as to the accuracy or completeness of such information and shall have no liability for the consequences of use of such information. Nexperia takes no responsibility for the content in this document if provided by an information source outside of Nexperia.

In no event shall Nexperia be liable for any indirect, incidental punitive, special or consequential damages (including - without limitation - lost profits, lost savings, business interruption, costs related to the removal or replacement of any products or rework charges) whether or not such damages are based on tort (including negligence), warranty, breach of contract or any other legal theory.
Notwithstanding any damages that customer might incur for any reason whatsoever, Nexperia's aggregate and cumulative liability towards customer for the products described herein shall be limited in accordance with the Terms and conditions of commercial sale of Nexperia.
Right to make changes - Nexperia reserves the right to make changes to information published in this document, including without limitation specifications and product descriptions, at any time and without notice. This document supersedes and replaces all information supplied prior to the publication hereof.

Suitability for use in automotive applications - This Nexperia product has been qualified for use in automotive applications. Unless otherwise agreed in writing, the product is not designed, authorized or warranted to be suitable for use in life support, life-critical or safety-critical systems or equipment, nor in applications where failure or malfunction of a Nexperia product can reasonably be expected to result in personal injury, death or severe property or environmental damage. Nexperia and its suppliers accept no liability for inclusion and/or use of Nexperia products in such equipment or applications and therefore such inclusion and/or use is at the customer's own risk.
Applications - Applications that are described herein for any of these products are for illustrative purposes only. Nexperia makes no representation or warranty that such applications will be suitable for the specified use without further testing or modification.
Customers are responsible for the design and operation of their applications and products using Nexperia products, and Nexperia accepts no liability for any assistance with applications or customer product design. It is customer's sole responsibility to determine whether the Nexperia product is suitable and fit for the customer's applications and products planned, as well as for the planned application and use of customer's third party customer(s). Customers should provide appropriate design and operating safeguards to minimize the risks associated with their applications and products.
Nexperia does not accept any liability related to any default, damage, costs or problem which is based on any weakness or default in the customer's applications or products, or the application or use by customer's third party customer(s). Customer is responsible for doing all necessary testing for the customer's applications and products using Nexperia products in order to avoid a default of the applications and the products or of the application or use by customer's third party customer(s). Nexperia does not accept any liability in this respect.

Limiting values - Stress above one or more limiting values (as defined in the Absolute Maximum Ratings System of IEC 60134) will cause permanent damage to the device. Limiting values are stress ratings only and (proper) operation of the device at these or any other conditions above those given in the Recommended operating conditions section (if present) or the Characteristics sections of this document is not warranted. Constant or repeated exposure to limiting values will permanently and irreversibly affect the quality and reliability of the device.
Terms and conditions of commercial sale - Nexperia products are sold subject to the general terms and conditions of commercial sale, as published at http://www.nexperia.com/profile/terms, unless otherwise agreed in a valid written individual agreement. In case an individual agreement is concluded only the terms and conditions of the respective agreement shall apply. Nexperia hereby expressly objects to applying the customer's general terms and conditions with regard to the purchase of Nexperia products by customer.

# Triple single-pole double-throw analog switch 

No offer to sell or license - Nothing in this document may be interpreted or construed as an offer to sell products that is open for acceptance or the grant, conveyance or implication of any license under any copyrights, patents or other industrial or intellectual property rights.

Export control - This document as well as the item(s) described herein may be subject to export control regulations. Export might require a prior authorization from competent authorities.

Translations - A non-English (translated) version of a document is for reference only. The English version shall prevail in case of any discrepancy between the translated and English versions.
