## Desoldering Tips - Hakko Compatible

### HK SERIES

**COMPATIBLE STATIONS:** Hakko 474, Hakko 475, Hakko 701, Hakko 702B, Hakko 808, Hakko 809

Plato is one of the largest manufacturers of solder tips in the world, producing tips to fit all of the most popular solder stations. The long life and fast heat recovery of a Plato solder tip increases user effectiveness and decreases production times. All Plato solder tips manufactured since January 2004 are tinned with Lead-Free solder. Plato is the name for reliable soldering supplies.

**Long Life:** Using a high quality Plato solder tip increases solder speeds and decreases the total cost of manufacture. Higher temperatures and high tin content solders, common in lead-free solder processes, place additional strain on soldering iron tips. The long life of a Plato solder iron tip reduces tip changes, decreasing the total number of tips used and decreasing production time.

**Rapid Heat Recovery:** Plato solder tips are constructed from highly conductive premium grade copper to transmit heat to the work more quickly than other brands. This quick heat recovery enables more joints to be soldered per minute, thus reducing manufacturing time and costs.

- Fast heat recovering increases soldering speed
- Longer tip reduces manufacturing costs
- Fewer tip change overs
