# imall

Chipsmall Limited consists of a professional team with an average of over 10 year of expertise in the distribution of electronic components. Based in Hongkong, we have already established firm and mutual-benefit business relationships with customers from, Europe, America and south Asia, supplying obsolete and hard-to-find components to meet their specific needs.

With the principle of "Quality Parts, Customers Priority, Honest Operation, and Considerate Service", our business mainly focus on the distribution of electronic components. Line cards we deal with include Microchip, ALPS, ROHM, Xilinx, Pulse, ON, Everlight and Freescale. Main products comprise IC, Modules, Potentiometer, IC Socket, Relay, Connector. Our parts cover such applications as commercial, industrial, and automotives areas.

We are looking forward to setting up business relationship with you and hope to provide you with the best service and solution. Let us make a better world for our industry!

v08.0514

#### Typical Applications

The HMC571LC5 is ideal for:

- · Point-to-Point and Point-to-Multi-Point Radio
- Military Radar, EW & ELINT
- Satellite Communications

#### **Functional Diagram**

## GaAs MMIC I/Q DOWNCONVERTER 21 - 25 GHz

#### Features

Conversion Gain: 9 dB Image Rejection: 18 dB 2 LO to RF Isolation: 35 dB Noise Figure: 3 dB Input IP3: +2 dBm 32 Lead 5x5mm SMT Package: 25mm<sup>2</sup>

#### **General Description**

The HMC571LC5 is a compact GaAs MMIC I/Q downconverter in a leadless RoHS compliant SMT package. This device provides a small signal conversion gain of 9 dB with a noise figure of 3.0 dB and 18 dB of image rejection across the frequency band. The HMC571LC5 utilizes an LNA followed by an image reject mixer which is driven by an active x2 multiplier. The image reject mixer eliminates the need for a filter following the LNA, and removes thermal noise at the image frequency. I and Q mixer outputs are provided and an external 90° hybrid is needed to select the required sideband. The HMC571LC5 is a much smaller alternative to hybrid style image reject mixer downconverter assemblies, and it eliminates the need for wire bonding by allowing the use of surface mount manufacturing techniques.

#### **Evaluation PCB**

## List of Materials for Evaluation PCB 113758<sup>[1]</sup>

| Item    | Description                      |
|---------|----------------------------------|
| C1 - C4 | Capacitor 0603, 0.01 µF          |
| J1, J4  | PCB Mount SMA RF Connector, SRI  |
| J2, J3  | PCB Mount SMA Connector, Johnson |
| J5 - J7 | DC Pin                           |
| U1      | HMC571LC5                        |
| PCB [2] | 113756 Evaluation Board          |

 $\left[ 1\right]$  Reference this number when ordering complete evaluation PCB

[2] Circuit Board Material: Rogers 4350

The circuit board used in the application should use RF circuit design techniques. Signal lines should have 50 Ohm impedance while the package ground leads and exposed paddle should be connected directly to the ground plane similar to that shown. A sufficient number of via holes should be used to connect the top and bottom ground planes. The evaluation circuit board shown is available from Hittite upon request.
