

Chipsmall Limited consists of a professional team with an average of over 10 year of expertise in the distribution of electronic components. Based in Hongkong, we have already established firm and mutual-benefit business relationships with customers from,Europe,America and south Asia,supplying obsolete and hard-to-find components to meet their specific needs.

With the principle of “Quality Parts,Customers Priority,Honest Operation,and Considerate Service”,our business mainly focus on the distribution of electronic components. Line cards we deal with include Microchip,ALPS,ROHM,Xilinx,Pulse,ON,Everlight and Freescale. Main products comprise IC,Modules,Potentiometer,IC Socket,Relay,Connector.Our parts cover such applications as commercial,industrial, and automotives areas.

We are looking forward to setting up business relationship with you and hope to provide you with the best service and solution. Let us make a better world for our industry!

16-Channel, High Voltage Analog Switch

Features

- ▶ HVCMOS® technology for high performance
- ▶ 220V operating conditions
- ▶ Output on-resistance typically 22Ω
- ▶ 5.0 and 12.0V CMOS logic compatibility
- ▶ Very low quiescent current consumption (-10μA)
- ▶ -45dB min off isolation at 7.5MHz
- ▶ Low parasitic capacitance
- ▶ Excellent noise immunity
- ▶ Flexible high voltage supplies

Applications

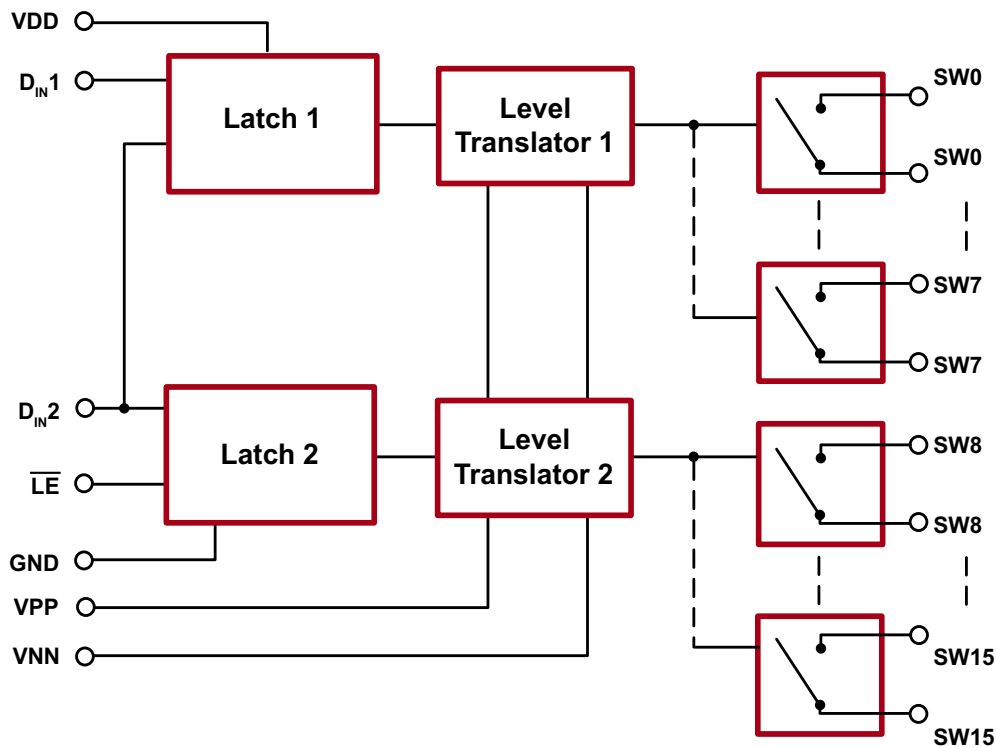

- ▶ Medical ultrasound imaging
- ▶ Piezoelectric transducer drivers

General Description

The Supertex HV20822 is a 220V, 16-channel, high-voltage analog switch integrated circuit (IC) configured as 2 sets of 8 single-pole single-throw analog switches. It is intended for use in applications requiring high voltage switching controlled by low voltage control signals such as ultrasound imaging and printers.

The 2 sets of 8 analog switches are controlled by 2 input logic controls, D_{IN1} and D_{IN2} . A logic high on D_{IN1} will turn On switches 0 to 7 and a logic high on D_{IN2} will turn On switches 8 to 15.

Block Diagram

Ordering Information

Part Number	Package Option	Packing
HV20820FG-G	48-Lead LQFP	250/Tray
HV20820FG-G M931	48-Lead LQFP	1000/Reel

-G denotes a lead (Pb)-free / RoHS compliant package

Absolute Maximum Ratings

Parameter	Value
V_{DD} Logic power supply voltage	-0.5V to +15V
$V_{PP} - V_{NN}$ Supply voltage	+225V
V_{PP} Positive high voltage supply	-0.5V to $V_{NN} + 225V$
V_{NN} Negative high voltage supply	+0.5V to -225V
Logic input voltages	-0.5V to $V_{DD} + 0.3V$
V_{SIG} Analog signal range	V_{NN} to V_{PP}
Peak analog signal current/channel	3.0A
Storage temperature	-65°C to +150°C
Power dissipation	1.0W

Absolute Maximum Ratings are those values beyond which damage to the device may occur. Functional operation under these conditions is not implied. Continuous operation of the device at the absolute rating level may affect device reliability. All voltages are referenced to device ground.

Typical Thermal Resistance

Package	θ_{ja}
48-Lead LQFP	52°C/W

Recommended Operating Conditions

Sym	Parameter	Value
V_{PP}	Positive high voltage supply ¹	+50V to +110V
V_{NN}	Negative high voltage supply ¹	-10V to $V_{PP} - 220V$
V_{DD}	Logic power supply voltage ¹	+4.75V to +12.6V
V_{IH}	High-level input voltage	$V_{DD} - 1.0V$ to V_{DD}
V_{IL}	Low-level input voltage	0V to 1.0V
V_{SIG}	Analog signal voltage peak-to-peak ²	$V_{NN} + 10V$ to $V_{PP} - 10V$
T_A	Operating free air-temperature	0°C to 70°C

Notes:

- Power up/down sequence is arbitrary except GND must be powered-up first and powered-down last.
- V_{SIG} must be $V_{NN} \leq V_{SIG} \leq V_{PP}$ or floating during power up/down transition.
