

Chipsmall Limited consists of a professional team with an average of over 10 year of expertise in the distribution of electronic components. Based in Hongkong, we have already established firm and mutual-benefit business relationships with customers from,Europe,America and south Asia,supplying obsolete and hard-to-find components to meet their specific needs.

With the principle of “Quality Parts,Customers Priority,Honest Operation,and Considerate Service”,our business mainly focus on the distribution of electronic components. Line cards we deal with include Microchip,ALPS,ROHM,Xilinx,Pulse,ON,Everlight and Freescale. Main products comprise IC,Modules,Potentiometer,IC Socket,Relay,Connector.Our parts cover such applications as commercial,industrial, and automotives areas.

We are looking forward to setting up business relationship with you and hope to provide you with the best service and solution. Let us make a better world for our industry!

SPECIFICATION

Part Number : **ILA.01**

Product Name : Low Profile and High Efficiency 915 MHz ISM Band Loop Antenna

Features : Small size antenna, low profile, and high efficiency

915 MHz ISM Band

1 dBi Peak Gain

10 x 3.2 x 0.5 mm size

SMT Compatible

RoHS Compliant

1. Introduction

The ILA.01 is a 915 MHz ISM band antenna with excellent efficiency, 60% at the center frequency and 45% at the band edges. This antenna works the best when placed at the center of the board edge. The antenna, at 10 x 3.2 x 0.5 mm, is low profile and would be suitable for devices with space constraints. The ILA.01 is delivered on tape and reel and now allows M2M customers to use an omni-directional SMT antenna. The omni-directional radiation characteristics allow for excellent performance regardless of device orientation. This is especially useful for devices that are not fixed in one particular spot during use. When there is little PCB space available for antenna placement, but high performance is required, the ILA.01 is the ideal choice. The ILA.01 Loop antenna can be used in automated meter reading (AMR), radio frequency identification (RFID), remote monitoring, healthcare, sensing, and other 915 MHz applications.

2. Specification

ELECTRICAL	
ANTENNA	ILA.01
STANDARD	915 MHz ISM
Operation Frequency (MHz)	902-928 MHz
Polarization	Linear
Impedance	50 Ohms
Max VSWR (dBi)	2:1
Max Return Loss (dB)	-10
Peak Gain	1 dBi
Efficiency (%)	50 typ.
Average Gain (dB)	-3
Radiation Properties	Omni-directional
Max Input Power	5 W

* The ILA.01 antenna performance was measured with 80x40 mm ground plane.

MECHANICAL	
Dimensions (mm)	10x3.2x0.5
Required Space (mm)	11x10.4
Material	Ceramic
EVB Connector	SMA(F)

ENVIRONMENTAL	
Operation Temperature	-40°C to 85°C
Storage Temperature	-40°C to 105°C
Relative Humidity	40% to 95%
RoHS Compliant	Yes

3. Test Setup

Figure 1. Impedance measurements (left hand) and peak gain, average gain, efficiency, and radiation pattern measurements (right hand).

4.5. Average Gain

Figure 6. Average Gain of 915 MHz ISM Band Antenna ILA.01

4.6. Radiation Pattern

Figure 7. Radiation Pattern at 915 MHz of the ILA.01 Antenna.

5. Layout Guide

5.1 Solder Land pattern

Land pattern for soldering is as shown below. A matching circuit similar to the one shown in section 5.2 is also required.

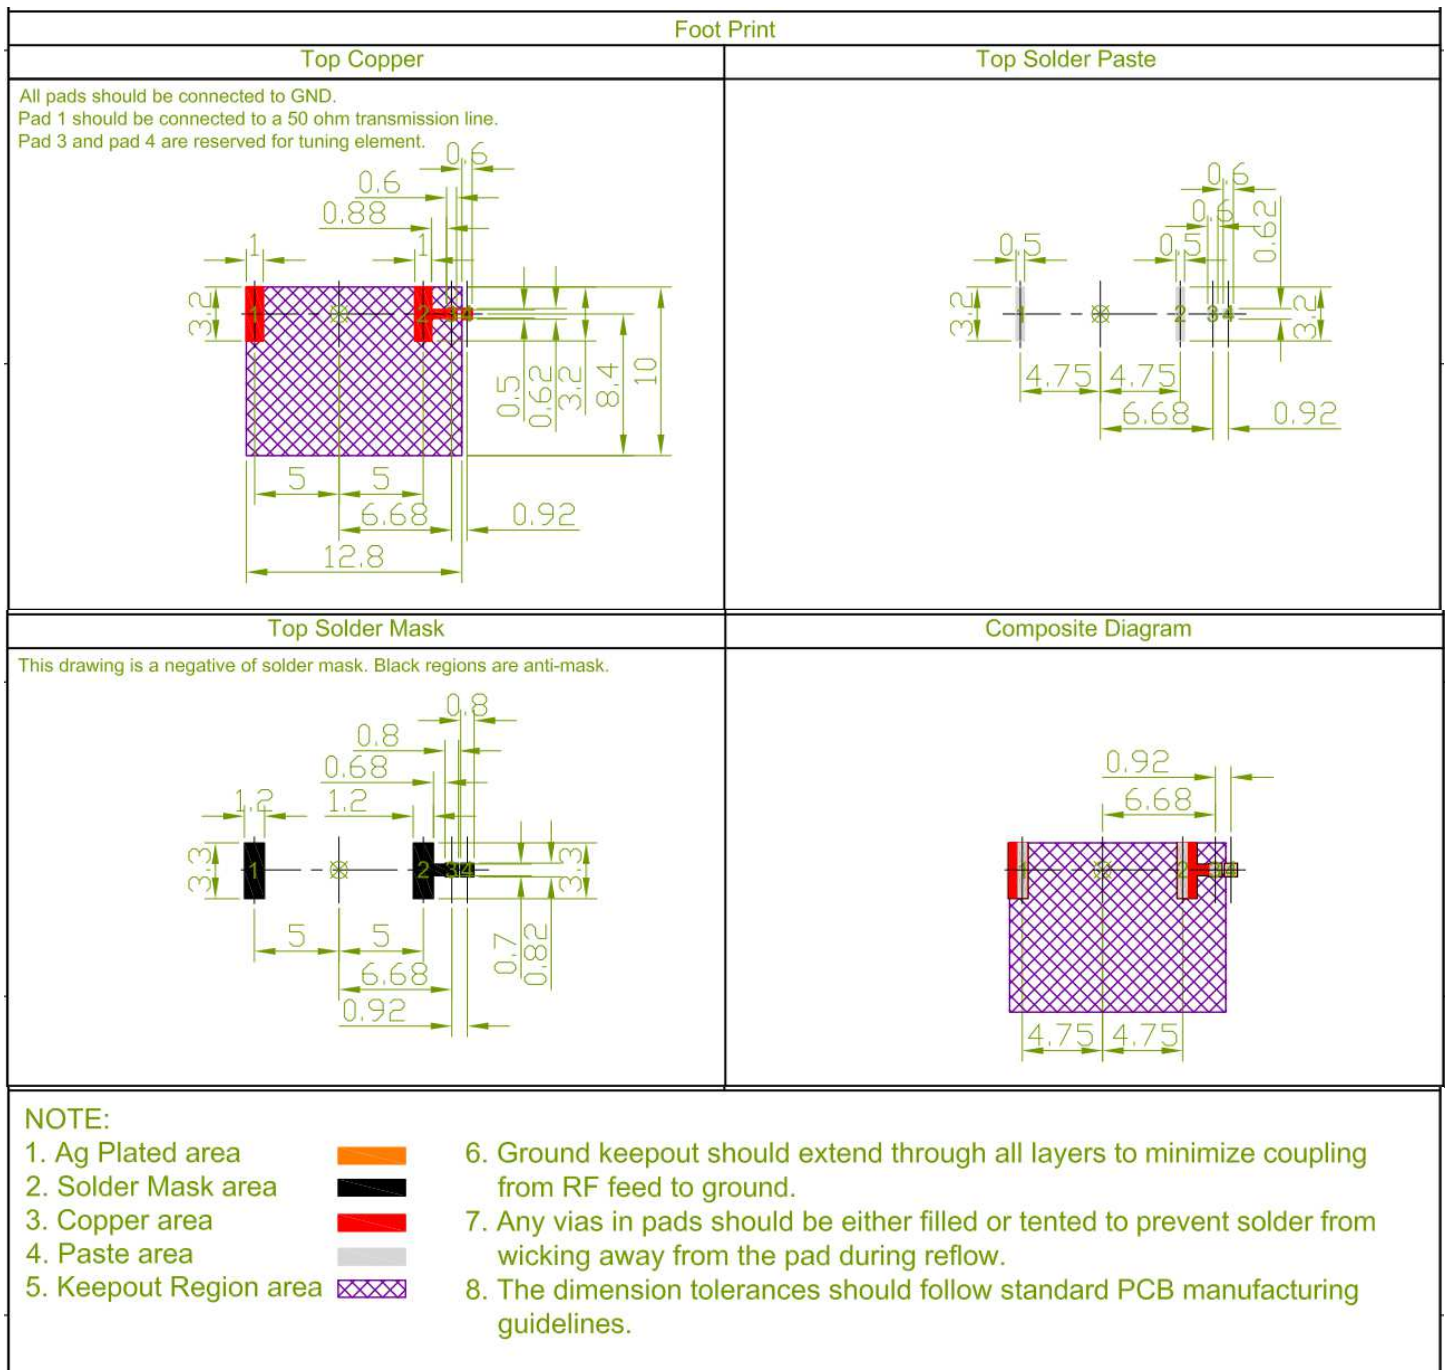

Figure 8. Foot Print Drawing of the ILA.01 Antenna

5.2 Matching Circuit

Like all antennas, surrounding components, enclosures, and changes to the GND plane dimensions can alter performance. A pi-matching network like the one shown below is required in case adjustments need to be made. The antenna EVB has a similar matching network. The components on the EVB are a good starting point for a new design, but will need to be adjusted upon integration for best performance. The zero ohm resistor is needed for the ability to solder down a coax pigtail to make measurements with a vector network analyzer.

7. Recommended Reflow

The ILA01 Loop Antenna can be assembled following either Sn-Pb or Pb-Free assembly processes. The recommended soldering temperatures are as follows:

Figure 11. Reflow Temperature Recommendation

8. Packaging

The ILA.01 antennas are delivered in tape and reel with EIA 481-B polystyrene with 6000 pieces per reel.
