

Chipsmall Limited consists of a professional team with an average of over 10 year of expertise in the distribution of electronic components. Based in Hongkong, we have already established firm and mutual-benefit business relationships with customers from, Europe, America and south Asia, supplying obsolete and hard-to-find components to meet their specific needs.

With the principle of "Quality Parts, Customers Priority, Honest Operation, and Considerate Service", our business mainly focus on the distribution of electronic components. Line cards we deal with include Microchip, ALPS, ROHM, Xilinx, Pulse, ON, Everlight and Freescale. Main products comprise IC, Modules, Potentiometer, IC Socket, Relay, Connector. Our parts cover such applications as commercial, industrial, and automotives areas.

We are looking forward to setting up business relationship with you and hope to provide you with the best service and solution. Let us make a better world for our industry!

# SOT-23 Single Low-Side Driver IC

### **Features**

- Wide VCC range (5V to 20V)
- CMOS Schmitt-triggered inputs
- Under voltage lockout
- 3.3V logic compatible
- Additional OUT pin
- Output in phase with inputs
- Leadfree, RoHS compliant

## **Typical Applications**

- General purpose gate driver
- Industrial applications
- Switched-mode power supplies

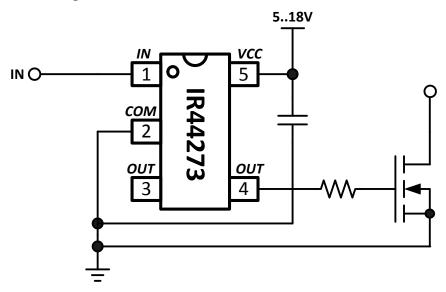

## **Product Summary**

| Topology        | General Driver |  |  |  |
|-----------------|----------------|--|--|--|
| IO+/- (typical) | 1.5A           |  |  |  |

## **Description**

The IR44273L is a low-voltage, wide VCC range, power MOSFET and IGBT non-inverting gate driver. Proprietary latch immune CMOS technologies enable ruggedized monolithic construction. The logic input is compatible with standard CMOS or LSTTL output. The output driver features a current buffer stage. The design also includes an additional gate drive OUT pin for flexible PCB layout.

- †† Higher qualification ratings may be available should the user have such requirements. Please contact your International Rectifier sales representative for further information.
- ††† Higher MSL ratings may be available for the specific package types listed here. Please contact your International Rectifier sales representative for further information.

## **Absolute Maximum Ratings**

Absolute maximum ratings indicate sustained limits beyond which damage to the device may occur. The device may not function or not be operable above the recommended operating conditions and stressing the parts to these levels is not recommended. In addition, extended exposure to stresses above the recommended operating conditions may affect device reliability. All voltage parameters are absolute voltages <u>referenced to COM</u>. The thermal resistance and power dissipation ratings are measured under board mounted and still air conditions.

| Symbol          | Definition                               |      | Max                   | Units |  |  |
|-----------------|------------------------------------------|------|-----------------------|-------|--|--|
| V <sub>CC</sub> | Fixed supply voltage                     | -0.3 | 20                    |       |  |  |
| Vo              | Output voltage                           | -0.3 | V <sub>CC</sub> + 0.3 | 0.3 V |  |  |
| V <sub>IN</sub> | Logic input voltage                      | -0.3 | $V_{CC} + 0.3$        |       |  |  |
| $Rth_JA$        | Thermal resistance, junction to ambient  | _    | 151                   | °C/W  |  |  |

| Ts              | Storage temperature                      | -55  | 150                   | °C    |  |  |
| TL              | Lead temperature (soldering, 10 seconds) | _    | 300                   |       |  |  |

## **Recommended Operating Conditions**

For proper operation, the device should be used within the recommended conditions. All voltage parameters are absolute voltages referenced to COM unless otherwise stated in the table.

| Symbol          | Definition                      | Min | Max             | Units |
|-----------------|---------------------------------|-----|-----------------|-------|
| V <sub>CC</sub> | Fixed supply voltage            | 5.0 | 18              |       |
| Vo              | Output voltage                  | 0   | $V_{CC}$        | V     |
| $V_{IN}$        | Logic input voltage (IN and EN) | 0   | V <sub>cc</sub> |       |
| T <sub>A</sub>  | Ambient temperature             | -40 | 125             | °C    |

### **Static Electrical Characteristics**

 $V_{CC}$  = 15V,  $T_A$  = 25°C unless otherwise specified. The  $V_{IN}$  and  $I_{IN}$  parameters are referenced to COM and are applicable to input leads: IN. The  $V_O$  and  $I_O$  parameters are referenced to COM and are applicable to the output leads: OUT.
