

Chipsmall Limited consists of a professional team with an average of over 10 year of expertise in the distribution of electronic components. Based in Hongkong, we have already established firm and mutual-benefit business relationships with customers from,Europe,America and south Asia,supplying obsolete and hard-to-find components to meet their specific needs.

With the principle of "Quality Parts,Customers Priority,Honest Operation,and Considerate Service",our business mainly focus on the distribution of electronic components. Line cards we deal with include Microchip,ALPS,ROHM,Xilinx,Pulse,ON,Everlight and Freescale. Main products comprise IC,Modules,Potentiometer,IC Socket,Relay,Connector.Our parts cover such applications as commercial,industrial, and automotives areas.

We are looking forward to setting up business relationship with you and hope to provide you with the best service and solution. Let us make a better world for our industry!

## Description

IS31FL3199 is a 9-channel light effect LED driver which features two-dimensional auto breathing mode and an audio modulated display mode. It has One Shot Programming mode and PWM Control mode for RGB lighting effects. The maximum output current can be adjusted in 8 levels (5mA~40mA).

The IS31FL3199 includes an audio modulated display mode, wherein the brightness of LED can be modulated by audio signal. There is a cascade pin for the synchronization of two chips.

## Features

- Supply voltage range from 3.0V to 5.5V
- I2C interface, automatic address increment function
- Three groups RGB, single color LED breathing system-free pre-established pattern
- 9 independently controlled automatic and semiautomatic breathing system-free pre-established pattern
- 9 independently controlled outputs of 256 PWM steps
- 8 levels programmable output current
- Audio mode with AGC function
- Package: QFN-20, 3mm × 3mm

## Quick Start

Figure 1: Photo of IS31FL3199 Evaluation Board

## Recommended Equipment

- 5.0V, 2A power supply
- Audio source( i.e. MP3 player, Notebook PC, etc)
- 8Ω speaker

## Absolute Maximum Ratings

- ≤ 5.5V power supply

**Caution: Do not exceed the above conditions; otherwise the board will be damaged.**

## Procedure

The IS31FL3199 evaluation board is fully assembled and tested. Follow the steps listed below to verify board operation.

**Caution: Do not turn on the power supply until all connections are completed.**

- 1) Connect an 8Ω speaker to the “SPK” connector.
- 2) Connect the audio source to the “AUDIO IN” connector.
- 3) Connect the ground terminal of the power supply to the GND and the positive terminal to the VCC. Or connect the DC power to the connector (DC IN).
- 4) Turn on the power supply and pay attention to the supply current. If the current exceeds 1A, please check for circuit fault.
- 5) Turn on the audio signal.
- 6) Modulation of the audio signal utilized to obtain better sound output performance

## Evaluation Board Ordering Information

Part No.	IC Package
IS31FL3199-QFLS2-EB	QFN-20, Lead-free

Table1: Ordering Information

**For pricing, delivery, and ordering information, please contacts ISSI’s analog marketing team at [analog\\_mkt@issi.com](mailto:analog_mkt@issi.com) or (408) 969-6600.**

## Evaluation Board Operation

The IS31FL3199 evaluation board has five display modes. Press MODE button to switch configurations.

- 1) Default Mode: 9 LEDs perform breath dimming effect.
- 2) 3 LEDs in one group: Single color breathing dimming. Each group performs dimming one by one, then three groups dim together.
- 3) 3 LEDs in one group: auto color changing following the rhythm of the input music.
- 4) 9 LEDs breathing dimming one followed by the other.
- 5) Breath dimming synchronized with the rhythm of the input music.

**Note:**

**IS31FL3199 solely controls the FxLED function on the evaluation board.**

## Software Control

Please refer to the integrated program.

JP1 default setting is close circuit. If it is set to open, the on-board MCU will stop working. The I2C pins are set to High Impedance. External I2C signals can be connected to TP3 to control the IS31FL3199 LED driver.

*Please refer to the datasheet for how to control the IS31FL3199.*
