

Chipsmall Limited consists of a professional team with an average of over 10 year of expertise in the distribution of electronic components. Based in Hongkong, we have already established firm and mutual-benefit business relationships with customers from,Europe,America and south Asia,supplying obsolete and hard-to-find components to meet their specific needs.

With the principle of “Quality Parts,Customers Priority,Honest Operation,and Considerate Service”,our business mainly focus on the distribution of electronic components. Line cards we deal with include Microchip,ALPS,ROHM,Xilinx,Pulse,ON,Everlight and Freescale. Main products comprise IC,Modules,Potentiometer,IC Socket,Relay,Connector.Our parts cover such applications as commercial,industrial, and automotives areas.

We are looking forward to setting up business relationship with you and hope to provide you with the best service and solution. Let us make a better world for our industry!

SPECIFICATION

- Part No. : **ISA.01.A.301111**
- Product Name : Wide-band Omni-directional Low Profile 400~470MHz Adhesive Glass Mount Antenna
- For ISM/ TETRA/CDMA 450/ SCADA Family Radio Service/General Mobile Radio Service/Bio-Medical Telemetry
- Features : 239mm x 42mm x 11mm
 1.5dBi gain, 35%+ efficiency
 Omni-Directional
 Stable Wide-band response from 400Mhz to 470MHz
 Semi-Flexible, Low profile IP67 Waterproof Housing
 Standard 3 meters RG174 cable
 Automotive Approved 3M Adhesive
 SMA (M) Connector
RoHS Compliant

1. Introduction

The ISA.01 is an Omni-directional wide-band low profile 400MHz to 470MHz antenna for internal or external applications adhesive mounted on glass.

Its applications are in the automotive industry and telematics. At only 10.5mm thick and 42mm in width, its semi-flexible properties and strong 3M automotive approved double-sided adhesive allows for convenient glass installation. ISA.01 antenna offers exceptionally stable peak gain and efficiency across a very wide bandwidth, tuned to operate optimally on glass, which makes it a unique low frequency solution in low profile form. Unlike our competitors, Taoglas shows full performance data for our antennas. The ISA.01 shows real gain figures and radiation patterns INCLUDING cable losses, tested in state of the art low frequency anechoic chambers. We have invested heavily in research to create a uniquely wide-band UHF antenna with minimum 70MHz bandwidth that can replace expensive externally mounted antenna solutions. The wide-band compared to other narrow-band 20MHz antennas delivers more stable performance in a range of diverse on-glass environments with more resistance to detuning. All low frequency UHF antennas need to be tuned to suit their mounting conditions. For this reason this antenna is tuned to be mounted on glass. (i.e. excluding plastic or metal mounting), so is ideal for vehicles or building windows.

The standard cable is the RG174.

Cable length and connector type are fully customizable

The antenna can be customized for other low frequency bands for a minimum order quantity. Please contact your local sales office. For mounting applications on plastic please use ISA.06. For mounting directly on metal please use our FW series whip antennas.

1. Specification

ISM				
Frequency	410MHz	433MHz	450MHz	470MHz
Peak Gain *(dBi)	0.5	1.5	0.8	0
Average Gain *(dB)	-5.0	-4.3	-5.0	-5.0
Efficiency *(%)	30	35	30	30
Return Loss * (dB)	-10.0	<-15.0	-10.0	-8.0
Polarization	Linear			
Impedance	50Ω			
MECHANICAL				
Antenna Dimensions	239*42*10.5mm			
Cable	3m RG174 standard, customizable cable length			
Connector	SMA (M) standard, fully customizable			
Casing	TPR			
Waterproof	Outside Casing – IP65 Internal PCB Antenna - IP67			
ENVIRONMENTAL				
Operation Temperature	-40°C ~ +85°C			
Storage Temperature	-40°C ~ +85°C			

* all measurements were conducted with 3m RG174 cable

2. Antenna Characteristics
