

Chipsmall Limited consists of a professional team with an average of over 10 year of expertise in the distribution of electronic components. Based in Hongkong, we have already established firm and mutual-benefit business relationships with customers from,Europe,America and south Asia,supplying obsolete and hard-to-find components to meet their specific needs.

With the principle of "Quality Parts,Customers Priority,Honest Operation,and Considerate Service",our business mainly focus on the distribution of electronic components. Line cards we deal with include Microchip,ALPS,ROHM,Xilinx,Pulse,ON,Everlight and Freescale. Main products comprise IC,Modules,Potentiometer,IC Socket,Relay,Connector.Our parts cover such applications as commercial,industrial, and automotives areas.

We are looking forward to setting up business relationship with you and hope to provide you with the best service and solution. Let us make a better world for our industry!

Smart Power High-Side-Switch for Industrial Applications, Eight Channels: 8 x 200 mΩ

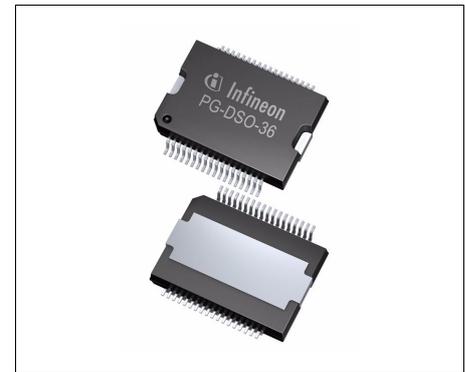

ITS4880R

1 Overview

Features

- Output current 0.625 A per channel
- Short circuit protection
- Maximum current internally limited
- Overload protection
- Input protection
- Overvoltage protection (including load dump)
- Undervoltage shutdown with auto-restart and hysteresis
- Switching inductive loads
- Thermal shutdown with restart
- Thermal independence of separate channels
- ESD-Protection
- Loss of GND and loss of V_{bb} protection
- Very low standby current
- Reverse battery protection
- Programmable input for CMOS or $V_{bb}/2$
- Common diagnostic output (current output for overtemperature)
- Green Product (RoHS Compliant)

PG-DSO-36-26

Application

- Output driver for industrial applications (PLC)
- All types of resistive, inductive and capacitive loads
- μ C or optocoupler compatible power switch for 24 V DC industrial applications
- Replaces electromechanical relays and discrete circuits

General Description

N channel vertical power FET with charge pump, ground referenced CMOS or $V_{bb}/2$ compatible input and common diagnostic feedback, monolithically integrated in Smart SIPMOS[®] technology. Providing embedded protective functions.

Product Summary

Overvoltage protection: $V_{bbAZmin} = 47$ V

Operating voltage: 11 V < $V_{bb(on)}$ < 45 V

On-state resistance: $R_{ON} = 200$ mΩ

Operating Temperature: $T_a = -30$ °C to 85 °C

6.3 Functional description LS-Pin

With using the LS-pin it is possible to change the input turn-on and -off threshold voltage between CMOS and half supply voltage level.

Therefore you have either to connect the LS-pin to GND (state 1) or to supply voltage (state 2).

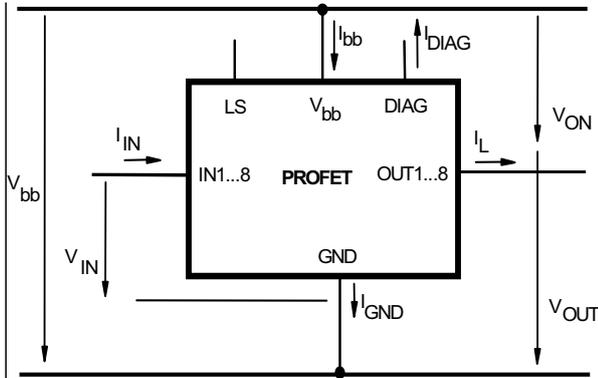

State 1: LS-Pin to GND CMOS-Input level

State 2: LS-Pin to supply voltage $V_{bb}/2$ - Input level

Application Information

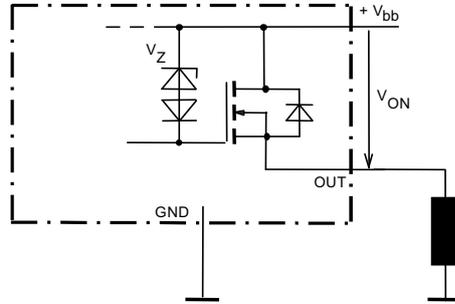

Terms

each channel

Inductive and overvoltage output clamp

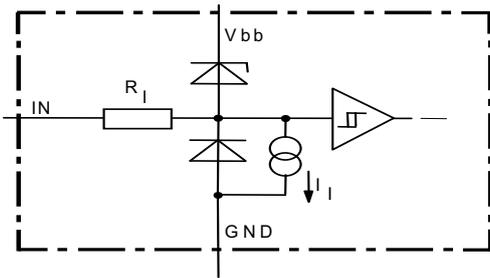

each channel

V_{ON} clamped to 47 V min.

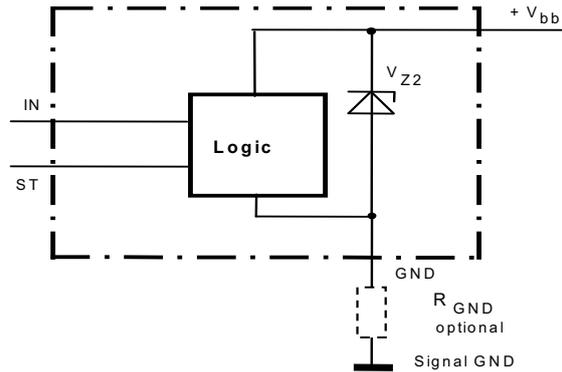

Input circuit (ESD protection)

each channel

The use of ESD zener diodes as voltage clamp at DC conditions is not recommended

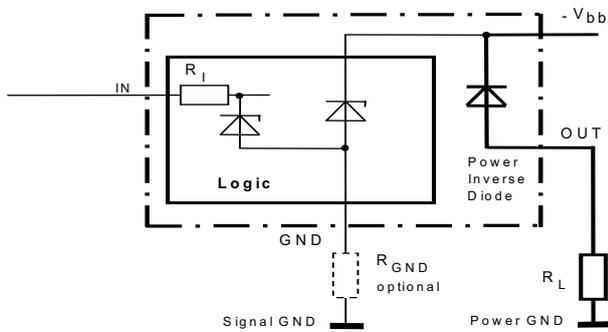

Overvoltage protection of logic part

$V_{Z2}=V_{bb(AZ)}=47$ V min.,
 $R_I=3$ k Ω typ., $R_{GND}=150\Omega$

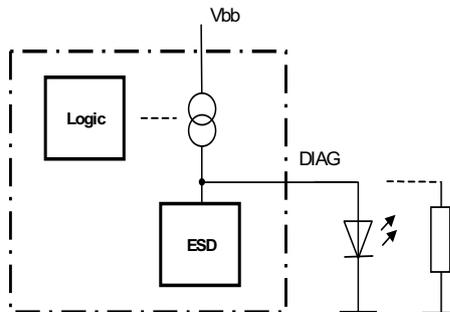

Reverse battery protection

each channel

$R_{GND}=150\Omega$, $R_I=3k\Omega$ typ.,
 Temperature protection is not active during inverse current

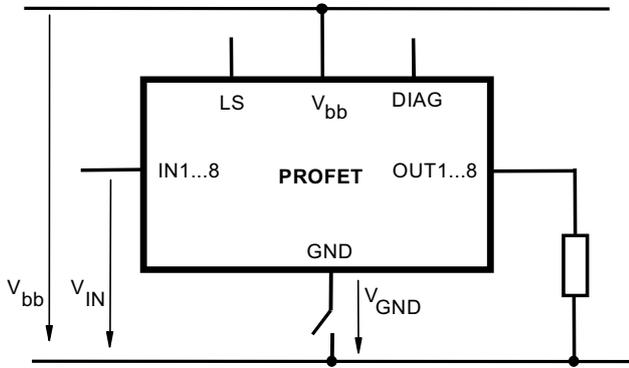

Common diagnostic output

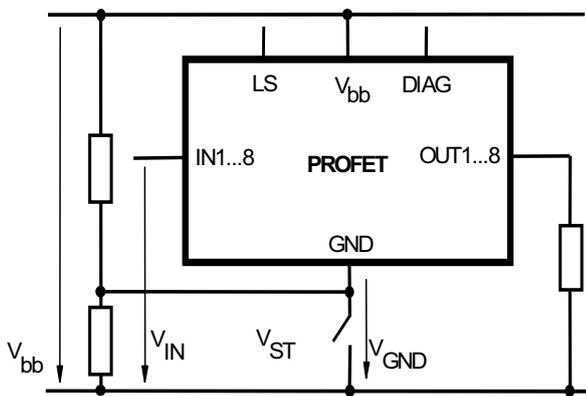

Output current typ. 2 mA

Application Information

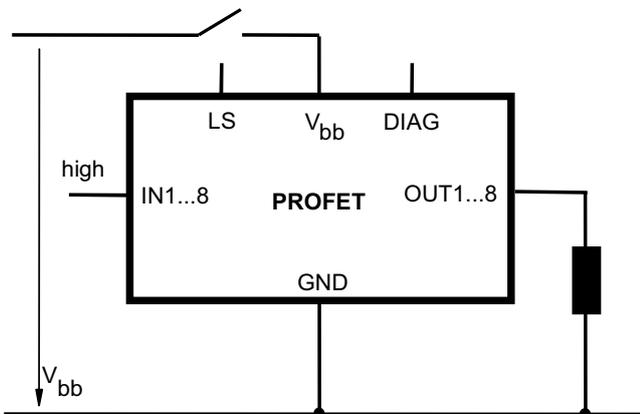

GND disconnect

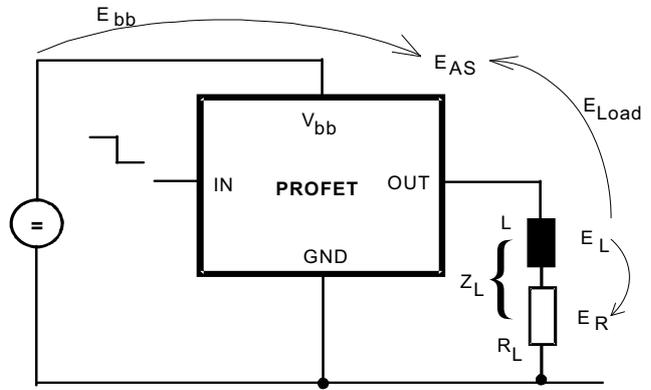

GND disconnect with GND pull up

V_{bb} disconnect with charged inductive load

Inductive Load switch-off energy dissipation, each channel

Energy stored in load inductance: $E_L = \frac{1}{2} * L * I_L^2$

While demagnetizing load inductance, the energy dissipated in PROFET is $E_{AS} = E_{bb} + E_L - E_R = V_{ON(CL)} * i_L(t) dt$, with an approximate solution for $R_L > 0\Omega$:

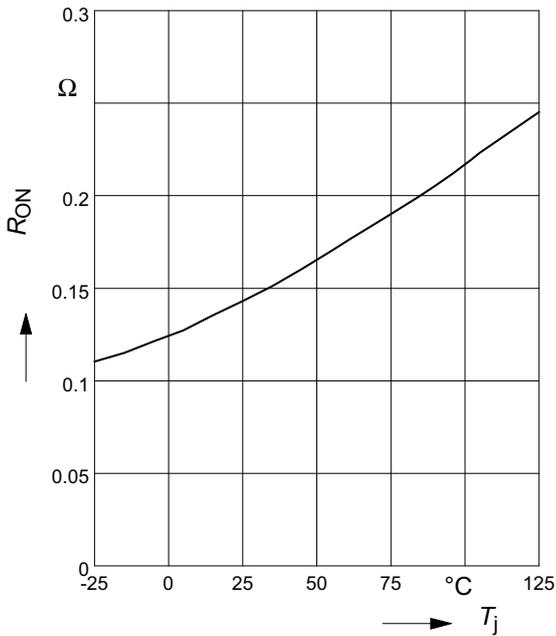

$$E_{AS} = V_{OUT(CL)} * \frac{L}{R_L} * \left[\frac{V_{BB} - V_{OUT(CL)}}{R_L} * \ln \left(1 - \frac{R_L * I_L}{V_{BB} - V_{OUT(CL)}} \right) + I_L \right]$$
