Chipsmall Limited consists of a professional team with an average of over 10 year of expertise in the distribution of electronic components. Based in Hongkong, we have already established firm and mutual-benefit business relationships with customers from,Europe,America and south Asia,supplying obsolete and hard-to-find components to meet their specific needs.

With the principle of "Quality Parts,Customers Priority,Honest Operation, and Considerate Service",our business mainly focus on the distribution of electronic components. Line cards we deal with include Microchip,ALPS,ROHM,Xilinx,Pulse,ON,Everlight and Freescale. Main products comprise IC,Modules,Potentiometer,IC Socket,Relay,Connector.Our parts cover such applications as commercial,industrial, and automotives areas.

We are looking forward to setting up business relationship with you and hope to provide you with the best service and solution. Let us make a better world for our industry!

## NOTE:

1. Dimensions are in inches.

* 2. Millimeters are given for general information only.

3. Body contour is optional within zone defined by CD.
4. These dimensions shall be measured at points .050 inch $(1.27 \mathrm{~mm})$ to .055 inch $(1.40 \mathrm{~mm})$ below seating plane. When gauge is not used, measurement shall be made at seating plane.
5. Both terminals.
6. At both ends.
7. Two holes.
8. Terminal 1 is the emitter, terminal 2 is base. The collector shall be electrically connected to the case.

* 9. LD applies between L1 and LL. Lead diameter shall not exceed twice LD within L1.
* 10. In accordance with ASME Y14.5M, diameters are equivalent to $\varphi x$ symbology.

11. The seating plane of the header shall be flat within .001 inch $(0.03 \mathrm{~mm})$ concave to .004 inch $(0.10 \mathrm{~mm})$ convex inside a .930 inch ( 23.62 mm ) diameter circle on the center of the header and flat within .001 inch ( 0.03 mm ) concave to .006 inch ( 0.15 mm ) convex overall.
