

Chipsmall Limited consists of a professional team with an average of over 10 year of expertise in the distribution of electronic components. Based in Hongkong, we have already established firm and mutual-benefit business relationships with customers from, Europe, America and south Asia, supplying obsolete and hard-to-find components to meet their specific needs.

With the principle of "Quality Parts, Customers Priority, Honest Operation, and Considerate Service", our business mainly focus on the distribution of electronic components. Line cards we deal with include Microchip, ALPS, ROHM, Xilinx, Pulse, ON, Everlight and Freescale. Main products comprise IC, Modules, Potentiometer, IC Socket, Relay, Connector. Our parts cover such applications as commercial, industrial, and automotives areas.

We are looking forward to setting up business relationship with you and hope to provide you with the best service and solution. Let us make a better world for our industry!

General Specifications

Electrical Capacity (Resistive Load)

Low/Logic Level: 50mA @ 24V DC

Other Ratings

Contact Resistance: 50 milliohms maximum

Insulation Resistance: 500 megohms minimum @ 250V DC Dielectric Strength: 250V AC minimum for 1 minute minimum

Mechanical Life: 1,000,000 operations minimum **Electrical Life:** 1,000,000 operations minimum

Nominal Operating Force:

.030" (0.75mm) Total Travel:

Materials & Finishes

Actuator: Polycarbonate

> Case: Glass fiber reinforced polyamide

Glass fiber reinforced polybutylene terephthalate (PBT) Base:

Movable Contact: Stainless steel

Stationary Contacts: Brass with silver plating **Switch Terminals:** Brass with silver plating **Lamp Terminals:** Brass with tin plating

Environmental Data

Operating Temperature Range: -25°C through +50°C (-13°F through +122°F)

90 ~ 95% humidity for 240 hours @ 40°C (104°F) **Humidity:**

Vibration: 10 ~ 55Hz with peak-to-peak amplitude of 1.5mm traversing the frequency range & returning

in 1 minute; 3 right angled directions for 2 hours

Shock: 50G (490m/s²) acceleration (tested in 6 right angled directions, with 5 shocks in each direction)

PCB Processing

Wave Soldering: See Profile A in Supplement section. Soldering:

Manual Soldering: See Profile A in Supplement section.

Cleaning: These devices are not process sealed. Hand clean locally using alcohol based solution.

Standards & Certifications

The JL Series tactiles have not been tested for UL recognition or CSA certification.

These switches are designed for use in a low-voltage, low-current circuit. When used as intended, the results do not produce hazardous energy.

Distinctive Characteristics

Bright, full face illumination with choice of red, green, or amber LEDs.

Multiple LED arrays and interior reflectors enhance illumination of the large, .75" (19mm) square actuator surface.

Distinctive design allows full face illumination in extra low profile of 0.31" (7.85mm) from PCB to top of switch.

Dome contact gives crisp tactile and audible feedback with short stroke and assures high reliability and long life of 1,000,000 operations.

Crimped terminals provide a spring type action to ensure secure mounting and prevent dislodging during the soldering process.

Streamlined housing dimensions provide for compact, side-by-side mounting on a standard grid.

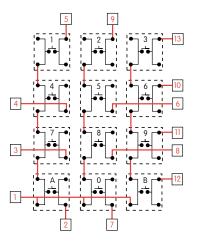

Terminal spacing conforms to standard .100" (2.54mm) PCB grid.

Common Bus Matrix

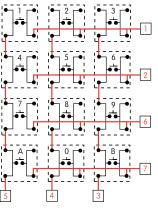

These single pole, single throw switches can be used in a keyboard matrix and, using strapped terminals, achieve a common bus electrical configuration on a single-sided PC board.

TYPICAL SWITCH ORDERING EXAMPLE

DESCRIPTION FOR TYPICAL ORDERING EXAMPLE

JL15SKSCCP2

POLE & CIRCUIT									
		Actuator Position () = Momentary		Switch Throw & Schematic	LED Schematic				
Pole	Model	Normal	Down	SPST 1- 1a	(+)O—() (+)	Note: Terminal markings "1", "1a", "-", and			
SP	JL15	OFF	(ON)	1 1 1a	C	"+" are shown on the switch.			

HOUSING & COLOR

ACTUATOR SHAPE & COLORS

Actuator Colors Available:

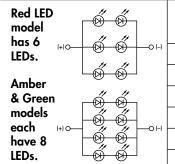

J49

LED COLORS & SPECIFICATIONS

LEDs are an integral part of the switch. The electrical specifications shown are determined at a basic temperature of 25°C. If the source voltage exceeds the rated voltage, a ballast resistor is required. The resistor value can be calculated by using the formula in the Supplement.

1-color, 1-element LEDs grouped in arrays of 6 or 8.	Color	C Red	D Amber	F Green
Forward Peak Current	I _{FM}	75mA	100mA	100mA
Typical Forward Current	I _F	60mA	80mA	80mA
Forward Voltage	V _F	4.0V	4.2V	4.2V
Reverse Peak Voltage	V _{RM}	8V	8V	8V
Current Reduction Rate Above 25°C	ΔI_{F}	0.98mA/°C	1.31mA/°C	1.31mA/°C
Ambient Temperature Range	−25°C ~ +50°C			

TERMINALS

LEGENDS

NKK Switches can provide custom legends for caps. Contact factory for more information.

Shaded area is printable area.

Recommended Print Methods:

Screen Print or Pad Print.

Epoxy based ink is recommended.

Additional Method

Engraving is not recommended as an additional method for legends.

Contact factory if engraving is required; it must be done before the actuator is assembled.
