K32 J-Pin Terminals for .042" diameter holes

- Wire-wrap terminals installs in two .042" diameter holes on 0.1" centers
- Short leg can be bent to secure pin
- Long post can share hole with T42-1 Micro-Klip

The "J" pin, as accessory to the T42-1 Micro-Klip, has a long Wrap Post which can extend through the same hole in which the Micro-Klip is mounted.

The "J" also serves to hold the "Klip" firmly in place when soldered. It may be staked to the mounting board by bending over the emergent short end of the "J".

T42-1 Push-In Terminals for .042" holes

- Wiring terminals for mounting leads or wires horizontally or vertically (through board hole)
- Connectors require no staking for most applications
- Horizontal slot holds up to seven wires, depending upon thickness of wire
