

Chipsmall Limited consists of a professional team with an average of over 10 year of expertise in the distribution of electronic components. Based in Hongkong, we have already established firm and mutual-benefit business relationships with customers from,Europe,America and south Asia,supplying obsolete and hard-to-find components to meet their specific needs.

With the principle of “Quality Parts,Customers Priority,Honest Operation,and Considerate Service”,our business mainly focus on the distribution of electronic components. Line cards we deal with include Microchip,ALPS,ROHM,Xilinx,Pulse,ON,Everlight and Freescale. Main products comprise IC,Modules,Potentiometer,IC Socket,Relay,Connector.Our parts cover such applications as commercial,industrial, and automotives areas.

We are looking forward to setting up business relationship with you and hope to provide you with the best service and solution. Let us make a better world for our industry!

SparkFun Ardumoto Shield Kit

KIT-13201 ROHS ✓ ✱

© images are CC BY-NC-SA 3.0

Description: Robots are fun and Arduinos are easy, so wouldn't it be nice if there were a kit that included everything you need to get your Arduino device set up to control a simple two motor circuit buddy? The SparkFun Ardumoto Shield Kit is perfect for any interested robot enthusiasts and includes an Ardumoto Shield as well pairs of tires, motors, connectors, and wires. And, of course, it's all stuffed in a classic SparkFun red box (which may come in handy as a robot chassis).

The Ardumoto Shield is an easy-to-use dual motor controller for Arduino. Combined with an Arduino, the Ardumoto makes a fantastic controller platform for RC vehicles or even small autonomous robots. At the heart of the Ardumoto – the big, black chip right in the middle – is an L298, one of our favorite dual-channel motor drivers around, capable of driving up to 2A per channel. The board takes its power from the same Vin line as the Arduino board, includes blue and yellow LEDs to indicate active direction, and all driver lines are diode protected from back EMF.

Control for motor attached to OUT1/2 is connected to digital line 12 (direction A) and digital line 3 (PWM A). Control for motor attached to OUT3/4 is connected to digital line 13 (direction B) and digital line 11 (PWM B).

Kit Includes:

- 1x SparkFun Ardumoto Shield
- 2x Hobby Gearmotor - 140 RPM
- 2x Wheel - 65mm (Rubber Tire)
- 1x Arduino Stackable Header Kit - R3
- 3x Screw Terminals 3.5mm Pitch (2-Pin)
- 1x 9V to Barrel Jack Adapter
- 2x Black Wire - 5" Length (22AWG Solid Core)
- 2x Red Wire - 5" Length (22AWG Solid Core)
