Micro-Lite® LED Illumination

LV2000

LV2000-B

Micro-Lite® LED Illumination

Perfection? We think so. Our LV2000-B satisfies three of the largest complaints about microscope illumination... long life span, low operating costs, high lumen output. Combined with the fact that it is ESD Safe, there is no reason to buy any other LED ring light! **Proudly Made in the USA.**

The Micro-Lite® LV2000-B (Black) is our newest ring illuminator. It features the newest surface mount LED technology that is paired with our exclusive design criteria, to make the highest performance, longest operating, lowest cost LED ring illuminator sold today! The days of having to buy replacement bulbs are a thing of the past!

Our ESD Safe LV2000 series features instant-on performance, with zero flicker. It is fully dimmable, from 100-5%, with an integrated dimming switch on the shade. Our exclusive design also allows for all circuitry to be hidden inside the shade. All other competitors rely on desktop controller boxes for their dimming units... another Micro-Lite® advantage!

Our exclusive heat management system ensures supreme light output, for many years to come. The special thermal transfer system quickly and efficiently cools the LED array, for the longest life span in the industry. We are the only manufacturer to invest such extensive time and money into the development of the world's best LED ring illuminator.

- Made in the USA
- ESD Safe and RoHS Compliant
- Flicker free and dimmable from 100 – 5%
- 120-240v (50/60hz) auto switchable power supply with worldwide approvals (cord change required)
- 2.35" (60mm) mounting ring diameter - 66mm mounting optional
- 9 LED surface mount array with exclusive thermal management system
- No bulky desktop controller box
- Black molded ESD certified safe shade (ESD safe white shade also available)
- Optional adapters available for most microscopes on the market today
- 5 Year/ 50,000 Hour Pro-Rated Warranty

Made in the U.S.A.
