

Chipsmall Limited consists of a professional team with an average of over 10 year of expertise in the distribution of electronic components. Based in Hongkong, we have already established firm and mutual-benefit business relationships with customers from Europe, America and south Asia, supplying obsolete and hard-to-find components to meet their specific needs.

With the principle of "Quality Parts, Customers Priority, Honest Operation, and Considerate Service", our business mainly focus on the distribution of electronic components. Line cards we deal with include Microchip, ALPS, ROHM, Xilinx, Pulse, ON, Everlight and Freescale. Main products comprise IC, Modules, Potentiometer, IC Socket, Relay, Connector. Our parts cover such applications as commercial, industrial, and automotives areas.

We are looking forward to setting up business relationship with you and hope to provide you with the best service and solution. Let us make a better world for our industry!

Power TOPLED® with Lens

Enhanced optical Power LED (HOP2000)

LS E63B, LA E63B, LO E63B, LY E63B

Vorläufige Daten / Preliminary Data

Besondere Merkmale

- **Gehäusetyp:** weißes P-LCC-4-Gehäuse
- **Besonderheit des Bauteils:** fokussierte Abstrahlung in SMT-Technologie; hohe Helligkeit in Achsrichtung
- **Wellenlänge:** 633 nm (super-rot), 617 nm (amber), 606 nm (orange), 587 nm (gelb)
- **Abstrahlwinkel:** 30°
- **Technologie:** InGaAlP
- **optischer Wirkungsgrad:** 24 lm/W (amber, orange, gelb), 18 lm/W (super-rot)
- **Gruppierungsparameter:** Lichtstärke, Durchflussspannung, Wellenlänge
- **Verarbeitungsmethode:** für alle SMT-Bestücktechniken geeignet
- **Lötmethode:** IR Reflow Löten und Wellenlöten (TTW)
- **Vorbehandlung:** nach JEDEC Level 2
- **Gurtung:** 12-mm Gurt mit 2000/Rolle, ø330 mm
- **ESD-Festigkeit:** ESD-sicher bis 2 kV nach EOS/ESD-5.1-1993

Anwendungen

- Ampelanwendung
- Hinterleuchtung (LCD, Schalter, Tasten, Displays, Werbebeleuchtung)
- Innen- und Außenbeleuchtung im Automobilbereich (z.B. Instrumentenbeleuchtung, Blinker, Bremslichter, seitl. Begrenzungsleuchten)
- Ersatz von Kleinst-Glühlampen
- Markierungsbeleuchtung (z.B. Stufen, Fluchtwiege, u.ä.)
- Signal- und Symbolleuchten

Features

- **package:** white P-LCC-4 package
- **feature of the device:** focussed radiation in SMT technology; high brightness in beam direction
- **wavelength:** 633 nm (super-red), 617 nm (amber), 606 nm (orange), 587 nm (yellow)
- **viewing angle:** 30°
- **technology:** InGaAlP
- **optical efficiency:** 24 lm/W (amber, orange, yellow), 18 lm/W (super-red)
- **grouping parameter:** luminous intensity, forward voltage, wavelength
- **assembly methods:** suitable for all SMT assembly methods
- **soldering methods:** IR reflow soldering and TTW soldering
- **preconditioning:** acc. to JEDEC Level 2
- **taping:** 12-mm tape with 2000/reel, ø330 mm
- **ESD-withstand voltage:** up to 2 kV acc. to EOS/ESD-5.1-1993

Applications

- traffic lights
- backlighting (LCD, switches, keys, displays, illuminated advertising)
- interior and exterior automotive lighting (e.g. dashboard backlighting, turn signal lamps, brake lights, sidemarkers)
- substitution of micro incandescent lamps
- marker lights (e.g. steps, exit ways, etc.)
- signal and symbol luminaire

Typ Type	Emissionsfarbe Color of Emission	Farbe der Lichtaustrittsfläche Color of the Light Emitting Area	Partieller Lichtfluss Partial Flux $I_F = 50 \text{ mA}$ $E_V [\text{lux}]$	Lichtstrom Luminous Flux $I_F = 50 \text{ mA}$ $\Phi_V [\text{lm}]$	Bestellnummer Ordering Code
LS E63B-BBCB-1-1	super-red	colorless clear	2240 ... 4500	1900 (typ.)	Q65110A0676
LA E63B-CBEA-24-1	amber	colorless clear	3550 ... 9000	2900 (typ.)	Q65110A0119

Anm.: -1-1 gesamter Farbbereich (siehe Seite 4)

-24-1 gesamter Farbbereich, Lieferung in Einzelgruppen (siehe Seite 5)

-26-1 gesamter Farbbereich, Lieferung in Einzelgruppen (siehe Seite 5)

-24-1 gesamter Durchlassspannungsbereich, Lieferung in Einzelgruppen (siehe Seite 5)

-26-1 gesamter Durchlassspannungsbereich, Lieferung in Einzelgruppen (siehe Seite 5)

Die Standardlieferform von Serientypen beinhaltet eine Familiengruppe, die aus nur 4 Halbgruppen besteht. Einzelne Halbgruppen sind nicht erhältlich.

In einer Verpackungseinheit / Gurt ist immer nur eine Halbgruppe enthalten.

Da die Gruppierung der LEDs in Lux mit der innovativen Partial Flux methode erfolgt, wurden Vergleichsmessungen an Bauteilen jeweils mit dem "Partial Flux" Testkopf und dem "Standard LED" Testkopf (gemäß CIE-127-B) durchgeführt. Der Vergleich soll als Orientierung dienen, er stellt keine eins zu eins Korrelation dar. Ziel dieses Vergleichs ist ein besseres Verständnis des Lichtflusses in [lux] in Relation zu den Lichtstärkewerten in [cd]. Das Verhältnis von typischen Werten die mit dem "Partial Flux" gemessen werden zu denen, die mit dem standard Messkopf gemessenen ist [lux] x 0.94 =[cd].

Dimmverhältnis im Gleichstrom-Betrieb max. 5:1

Note: -1-1 Total color tolerance range (please see page 4)

-24-1 Total color tolerance range, delivery in single groups (please see page 5)

-26-1 Total color tolerance range, delivery in single groups (please see page 5)

-24-1 Total forward voltage tolerance, delivery in single groups (see page 5)

-26-1 Total forward voltage tolerance, delivery in single groups (see page 5)

The standard shipping format for serial types includes a group of only 4 individual groups. Individual half groups are not available.

No packing unit / tape ever contains more than one luminous intensity half group.

As the grouping of LED in lux is made with the innovative partial flux methode ,some measurement to compare the results tested with "Partial Flux" Testhead compared to "standard LED" Testhead (in compliance with CIE-127-B) were made. The comparison should be used for a better understanding of partial flux in [lux] in relation to the values stated in luminous intensity [cd]. It should not be taken as one to one correlation. Comparison of typical values measured with "Partial Flux" and normal LED Testhead are [lux] x 0.94 =[cd].

Dimming range for direct current mode max. 5:1

Attention please!

The information describes the type of component and shall not be considered as assured characteristics. All typical data and graphs are basing on representative samples, but don't represent the production range. If requested, e.g. because of technical improvements, these typ. data will be changed without any further notice. Terms of delivery and rights to change design reserved. Due to technical requirements components may contain dangerous substances. For information on the types in question please contact our Sales Organization. If printed or downloaded, please find the latest version in the Internet.

Packing

Please use the recycling operators known to you. We can also help you – get in touch with your nearest sales office. By agreement we will take packing material back, if it is sorted. You must bear the costs of transport. For packing material that is returned to us unsorted or which we are not obliged to accept, we shall have to invoice you for any costs incurred.

Components used in life-support devices or systems must be expressly authorized for such purpose! Critical components¹ may only be used in life-support devices or systems² with the express written approval of OSRAM OS.

¹ A critical component is a component used in a life-support device or system whose failure can reasonably be expected to cause the failure of that life-support device or system, or to affect its safety or the effectiveness of that device or system.

² Life support devices or systems are intended (a) to be implanted in the human body, or (b) to support and/or maintain and sustain human life. If they fail, it is reasonable to assume that the health of the user may be endangered.
