

Chipsmall Limited consists of a professional team with an average of over 10 year of expertise in the distribution of electronic components. Based in Hongkong, we have already established firm and mutual-benefit business relationships with customers from,Europe,America and south Asia,supplying obsolete and hard-to-find components to meet their specific needs.

With the principle of "Quality Parts,Customers Priority,Honest Operation,and Considerate Service",our business mainly focus on the distribution of electronic components. Line cards we deal with include Microchip,ALPS,ROHM,Xilinx,Pulse,ON,Everlight and Freescale. Main products comprise IC,Modules,Potentiometer,IC Socket,Relay,Connector.Our parts cover such applications as commercial,industrial, and automotives areas.

We are looking forward to setting up business relationship with you and hope to provide you with the best service and solution. Let us make a better world for our industry!

Description:

M57184N-715B is a non-isolated step down DC-to-DC converter designed to take direct input of 140 ~ 360 V_{DC} and provide 2 outputs. One output is +15V/350mA and the other is rated at +5V/200mA. This converter allows use of fewer external components than does a combination of electrolytic capacitors and choke coils only.

Features:

- Input Voltage Range
DC 140V ~ 360V
- Output Specifications
15V, 350mA and
5V, 200mA

Applications:

- Power Source for DIP IPMs
and ASIPMs
- Home Appliances
- Industrial Controls

Inductor for Application Example Circuit

1. Recommended Inductors

Manufacturer	Part Number
Mitsumi	C13-FR Series, Type # GA 102
API Delevan	4590-105K
J.W. Miller	5900-102

2. Specifications for Inductor

We recommend an inductor with these specifications: an inductance of 1mH, rated current of at least 500mA, and good performance with DC superimposition. Please note there must be no magnetic saturation in the inductor.

The following waveforms show the output ripple voltage on V_{O-1} for good versus bad inductors. These waveforms are produced with output V_{O-2} unloaded and the scope coupling set to AC.
