### Description

The MADP-011037 is a high power PIN diode assembled in a lead-free 3 mm 16-lead HQFN plastic package. This series device provides exceptional switch or attenuator performance from 50 MHz to 2 GHz.

This compact device is ideally suitable for higher power switch and attenuator applications from HF through L band, where higher peak and CW power, lower loss, and higher linearity performance surface mount diode assemblies are required.
