

Chipsmall Limited consists of a professional team with an average of over 10 year of expertise in the distribution of electronic components. Based in Hongkong, we have already established firm and mutual-benefit business relationships with customers from,Europe,America and south Asia,supplying obsolete and hard-to-find components to meet their specific needs.

With the principle of "Quality Parts,Customers Priority,Honest Operation,and Considerate Service",our business mainly focus on the distribution of electronic components. Line cards we deal with include Microchip,ALPS,ROHM,Xilinx,Pulse,ON,Everlight and Freescale. Main products comprise IC,Modules,Potentiometer,IC Socket,Relay,Connector.Our parts cover such applications as commercial,industrial, and automotives areas.

We are looking forward to setting up business relationship with you and hope to provide you with the best service and solution. Let us make a better world for our industry!

MAXCOAX2STP-HSD Coaxial to Shielded-Twisted-Pair (STP) Cable Adapter Kit

For: Evaluation of Maxim Serializers/ Deserializers with STP Cable

General Description

The MAXCOAX2STP-HSD coaxial-to-STP cable adapter kit allows operation of coax evaluation kits (EV kits) for Maxim serializer/deserializer products with STP cables assembled with Rosenberger STP connectors. See Table 1 for a list of products currently supported.

The adapter kit includes one Serializer adapter board with two coax FAKRA female connectors and a Rosenberger male STP connector; one Deserializer adapter board with two coax FAKRA female connectors and a Rosenberger male STP connector; and a 2m STP cable assembled with two Rosenberger female STP connectors. The photo in Figure 1 shows the adapter kit components.

Benefits

- Allows Utilization of Coax EV Kits for Evaluating Operation with STP Cables, Eliminating Need to Purchase a Set of STP Evaluation Boards
- Only One Adapter Kit Needed to Use with Coax EV Kits for Different Products

Quick Start

Setup

To install the adapter:

- 1) Connect the Serializer adapter board to the serializer EV kit.
- 2) Connect the Deserializer adapter board to the deserializer EV kit.
- 3) Connect the STP cable to the two adapter boards, as shown in Figure 2.

Operation

To operate the coax EV kits in STP mode, refer to the configuration setting in the corresponding EV kit software and the respective IC data sheet.

Ordering Information appears at end of data sheet.
