## imall

Chipsmall Limited consists of a professional team with an average of over 10 year of expertise in the distribution of electronic components. Based in Hongkong, we have already established firm and mutual-benefit business relationships with customers from, Europe, America and south Asia, supplying obsolete and hard-to-find components to meet their specific needs.

With the principle of "Quality Parts, Customers Priority, Honest Operation, and Considerate Service", our business mainly focus on the distribution of electronic components. Line cards we deal with include Microchip, ALPS, ROHM, Xilinx, Pulse, ON, Everlight and Freescale. Main products comprise IC, Modules, Potentiometer, IC Socket, Relay, Connector. Our parts cover such applications as commercial, industrial, and automotives areas.

We are looking forward to setting up business relationship with you and hope to provide you with the best service and solution. Let us make a better world for our industry!

# 2.5/3.3V ECL Triple D Flip-Flop with Set and Reset

### MC100ES6030

DATA SHEET

The MC100ES6030 is a triple master-slave D flip-flop with differential outputs. When the clock input is low, data enters the master latch and transfers to the slave during a positive transition on the clock input.

Each flip-flop has individual Reset inputs while the Set input is shared. The Set and Reset inputs are asynchronous and override the clock inputs.

#### Features

- 1.2 GHz minimum toggle frequency
- 450 ps typical propagation delay

- LVPECL operating range:  $V_{CC}$  = 2.375 V to 3.8 V,  $V_{EE}$  = 0 V
- + LVECL operating range: V\_{CC} = 0 V, V\_EE = -2.375 V to -3.8 V
- 20-lead SOIC package
- Ambient temperature range -40°C to +85°C

a Absolute maximum continuous ratings are those maximum values beyond which damage to the device may occur. Exposure to these conditions or conditions beyond those indicated may adversely affect device reliability. Functional operation at absolute-maximum-rated conditions is not implied.
