

Chipsmall Limited consists of a professional team with an average of over 10 year of expertise in the distribution of electronic components. Based in Hongkong, we have already established firm and mutual-benefit business relationships with customers from, Europe, America and south Asia, supplying obsolete and hard-to-find components to meet their specific needs.

With the principle of "Quality Parts, Customers Priority, Honest Operation, and Considerate Service", our business mainly focus on the distribution of electronic components. Line cards we deal with include Microchip, ALPS, ROHM, Xilinx, Pulse, ON, Everlight and Freescale. Main products comprise IC, Modules, Potentiometer, IC Socket, Relay, Connector. Our parts cover such applications as commercial, industrial, and automotives areas.

We are looking forward to setting up business relationship with you and hope to provide you with the best service and solution. Let us make a better world for our industry!

June 2017

3-terminal Filters, SMD Array

For high-speed signal line (cellular band compatible)

MEA-D Series

MEA1210D Type

MEA1210D

1210[0504 inch]*

* Dimensions Code JIS[EIA]

Caution

The products in this catalog will be or have been stopped production

Discontinue Issue Date	May 18, 2017
Last Purchase Order Date	Mar. 29, 2019
Last Shipment Date	Sep. 30, 2019

Please refer to our Web site about replacement information.

REMINDERS FOR USING THESE PRODUCTS

Before using these products, be sure to request the delivery specifications.

SAFETY REMINDERS

Please pay sufficient attention to the warnings for safe designing when using these products.

⚠ REMINDERS The storage period is less than 12 months. Be sure to follow the storage conditions (Temperature: 5 to 40°C, Humidity: 10 to 75% RH or less). If the storage period elapses, the soldering of the terminal electrodes may deteriorate. On not use or store in locations where there are conditions such as gas corrosion (salt, acid, alkali, etc.). Before soldering, be sure to preheat components. The preheating temperature should be set so that the temperature difference between the solder temperature and chip temperature does not exceed 150°C. Soldering corrections after mounting should be within the range of the conditions determined in the specifications. If overheated, a short circuit, performance deterioration, or lifespan shortening may occur. When embedding a printed circuit board where a chip is mounted to a set, be sure that residual stress is not given to the chip due to the overall distortion of the printed circuit board and partial distortion such as at screw tightening portions. Self heating (temperature increase) occurs when the power is turned ON, so the tolerance should be sufficient for the set thermal design. Carefully lay out the coil for the circuit board design of the non-magnetic shield type. A malfunction may occur due to magnetic interference. Use a wrist band to discharge static electricity in your body through the grounding wire. On not expose the products to magnets or magnetic fields. One point of the contents regulated in the delivery specifications. The products listed on this catalog are intended for use in general electronic equipment (AV equipment, telecommunications

equipment, home appliances, amusement equipment, computer equipment, personal equipment, office equipment, measurement

The products are not designed or warranted to meet the requirements of the applications listed below, whose performance and/or quality require a more stringent level of safety or reliability, or whose failure, malfunction or trouble could cause serious damage to

If you intend to use the products in the applications listed below or if you have special requirements exceeding the range or conditions

(1) Aerospace/Aviation equipment

society, person or property.

(2) Transportation equipment (cars, electric trains, ships, etc.)

equipment, industrial robots) under a normal operation and use condition.

- (3) Medical equipment
- (4) Power-generation control equipment

set forth in the each catalog, please contact us.

- (5) Atomic energy-related equipment
- (6) Seabed equipment
- (7) Transportation control equipment

- (8) Public information-processing equipment
- (9) Military equipment
- (10) Electric heating apparatus, burning equipment
- (11) Disaster prevention/crime prevention equipment
- (12) Safety equipment
- (13) Other applications that are not considered general-purpose applications

When designing your equipment even for general-purpose applications, you are kindly requested to take into consideration securing protection circuit/device or providing backup circuits in your equipment.

EMC Components

3-terminal Filters, SMD Array

For high-speed signal line (cellular band compatible)

Product compatible with RoHS directive
Halogen-free
Compatible with lead-free solders

Overview of MEA1210D Type

FEATURES

- O Single chip for 2-line filters, and compatible with high-density mounting.
- Ocompact with a low profile design.
- Effective as a desensitization countermeasure in information transmission terminals such as smart phones
- On be used for signal lines of mobile device displays.
- O Low strain to signal waveforms after passing the filter.

APPLICATION

Noise removal from signal lines of smart phones, digital cameras, PCs, game machines, flat TVs, etc.

PART NUMBER CONSTRUCTION

MEA	1:	210	D	301R	Т	001
Series name	L×W×T Dimensions (mm)		Product internal code	Cutoff frequency (MHz)	Packaging style	Internal code
	1210	1.2×1.0×0.5	D	301R 300	T Taping	
				501B 500		<u>-</u>

■ OPERATING TEMPERATURE RANGE, PACKAGE QUANTITY, PRODUCT WEIGHT

Temperature range			Package quantity	Individual weight
Type Operating		Storage		
туре	temperature	temperature*		
	(°C)	(°C)	(pieces/reel)	(mg)
MEA1210D	-40 to +85	-40 to +85	4,000	3

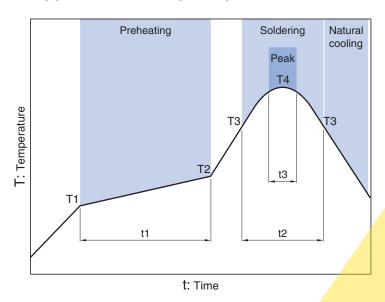

^{*} The Storage temperature range is for after the circuit board is mounted.

OROHS Directive Compliant Product: See the following for more details.https://product.tdk.com/info/en/environment/rohs/index.html

🔾 Halogen-free: Indicates that CI content is less than 900ppm, Br content is less than 900ppm, and that the total CI and Br content is less than 1500ppm.

■ RECOMMENDED REFLOW PROFILE

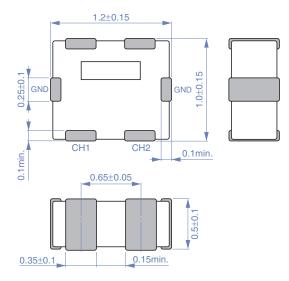

Preheati	ing		Soldering	9		Peak	
Temp.		Time	Temp.	Time		Temp.	Time
T1	T2	t1	Т3	t2		T4	t3
150°C	180°C	60 to 120s	230°C	30 to 60s	3	250 to 260°C	10s max.
