

Chipsmall Limited consists of a professional team with an average of over 10 year of expertise in the distribution of electronic components. Based in Hongkong, we have already established firm and mutual-benefit business relationships with customers from,Europe,America and south Asia,supplying obsolete and hard-to-find components to meet their specific needs.

With the principle of “Quality Parts,Customers Priority,Honest Operation,and Considerate Service”,our business mainly focus on the distribution of electronic components. Line cards we deal with include Microchip,ALPS,ROHM,Xilinx,Pulse,ON,Everlight and Freescale. Main products comprise IC,Modules,Potentiometer,IC Socket,Relay,Connector.Our parts cover such applications as commercial,industrial, and automotives areas.

We are looking forward to setting up business relationship with you and hope to provide you with the best service and solution. Let us make a better world for our industry!

Product Extension Release

MULTIFUSE® PPTC RESETTABLE FUSES

Bourns' Multifuse Product Line Announces Additional New Models to MF-USML Family of PPTC Resettable Fuses

Riverside, California - July 7, 2017 - The Bourns Multifuse Product Line is pleased to announce the introduction of a series of new part numbers to the already successful [MF-USML](#) product family of surface mount Polymer Positive Temperature Coefficient (PPTC) Resettable Fuses. The five additional new models will now extend the maximum operating current of the MF-USML series from 1.75 A to 7.0 A.

Bourns' low ohmic materials used in this product family have post trip resistance values as low as 13.5 mOhms and initial resistance values as low as 1 mOhm. Such low resistance values help boost the current carrying capability of these new devices. Bourns can now achieve a 7 A I_{hold} model in a 1210 package (MF-USML700-2).

These compact MF-USML models use Bourns' freeXpansion™ design that increases the performance of the resettable fuse with:

- Higher hold currents (I_{hold})
- Improved resistance stability
- Higher voltages (V_{max})
- Smaller footprints

The primary applications for these products include PC motherboard port protection, USB memory modules, wearable devices and battery protection for smart phones. These devices have been designed to protect against both overcurrent and overtemperature events within these applications.

The new Model MF-USML Multifuse® PPTC resettable fuses are RoHS compliant* and UL recognized for safety requirements, and are produced in Bourns' TS16949 approved facility in Xiamen, China.

For additional details on these exciting new models, please contact your nearest [Bourns representative](#).

Features

- Surface mount packaging for automated assembly
- Small footprint size (1210) and low profile for space-constrained mobile applications
- Ultra-low resistance
- RoHS compliant* and halogen free**
- Agency recognition: 

Applications

- Thermal protection for Li-ion & polymer battery packs
- Game consoles
- PC motherboards
- USB port protection - USB 2.0, 3.0 & OTG
- Mobile phones
- Digital cameras

* RoHS Directive 2002/95/EC Jan. 27, 2003 including annex and RoHS Recast 2011/65/EU June 8, 2011.

** Bourns considers a product to be "halogen free" if (a) the Bromine (Br) content is 900 ppm or less; (b) the Chlorine (Cl) content is 900 ppm or less; and (c) the total Bromine (Br) and Chlorine (Cl) content is 1500 ppm or less.
