Description:

The MHA-054020-89 is a broadband cascadable MMIC amplifier utilizing high-reliability InGaP/GaAs HBT technology. Packaged in low cost SOT-89 lead-free Green Package, the MMIC is ideally suited for driver amplifier or gain block in wireless applications such as Cellular, PCS, GSM and UMTS base stations as well as CATV, wireless IPTV, microwave radio, instrumentation, homeland security systems etc. It has excellent linearity and gain flatness over a broad frequency range. The third order intercept point performance is excellent, typically 19 dB above P-1dB below 500 MHz and 18 dB above P-1dB @ 900 MHz. It has on-chip bias circuit to provide bias stability and ease of use.
