

Chipsmall Limited consists of a professional team with an average of over 10 year of expertise in the distribution of electronic components. Based in Hongkong, we have already established firm and mutual-benefit business relationships with customers from,Europe,America and south Asia,supplying obsolete and hard-to-find components to meet their specific needs.

With the principle of “Quality Parts,Customers Priority,Honest Operation,and Considerate Service”,our business mainly focus on the distribution of electronic components. Line cards we deal with include Microchip,ALPS,ROHM,Xilinx,Pulse,ON,Everlight and Freescale. Main products comprise IC,Modules,Potentiometer,IC Socket,Relay,Connector.Our parts cover such applications as commercial,industrial, and automotives areas.

We are looking forward to setting up business relationship with you and hope to provide you with the best service and solution. Let us make a better world for our industry!

Input Attenuator Module

Features & Benefits

- Inputs: 28V_{DC} and 270V_{DC}
- MIL-STD-461C/D/E EMI compliance^[1]
- MIL-STD-810 environments
- MIL-STD-704, MIL-STD-1275 and DO-160 transients and spikes
- Output power: Up to 200W from any combination of MI-200 or MI-J00 modules
- Expansion port for additional power
- Short circuit protected
- Size: 2.28" x 2.4" x 0.5" (57,9 x 61,0 x 12,7mm)

Product Highlights

The MI-IAM is an accessory product to Vicor's MI-Series of DC-DC converters that provides EMI filtering and transient protection. Designed for use with all 28V and 270V input MI-200 or MI-J00 converters, the MI-IAM can drive any number of modules with output loads to 200W. See chapter 14 of the Design Guide & Applications Manual for VI-200 and VI-J00 Family DC-DC Converters and configurable Power Supplies for technical description.

The MI-IAM meets the conducted emissions specifications of MIL-STD-461C/D/E^[1] and offers complete input transient, surge and spike protection to the most severe levels of MIL-STD-1275, MIL-STD-704 and DO-160. Overvoltage lockout provides additional safeguards against potentially damaging line conditions. Higher power arrays can be configured using the expansion port capability of the MI-IAM.

Compatible Products

- MI-200, MI-J00 (Inputs: 2 and 6)
- MI-Mega Modules (Inputs: 2 and 6)

Packaging Options

- Standard:** Slotted baseplate
- SlimMod:** Flangeless baseplate, option suffix: - S
Example: MI - AXX - XX - S
- FinMod:** Finned heat sink, option suffix:
- F1, - F2, -F3 or -F4
Examples:
MI - AXX - XX -F1, 0.25" fins, longitudinal
MI - AXX - XX -F2, 0.50" fins, longitudinal
MI - AXX - XX -F3, 0.25" fins, transverse
MI - AXX - XX -F4, 0.50" fins, transverse

Input Characteristics (Typical at T_{BP} = 25°C, nominal line and 75% load, unless otherwise specified)

Parameter	Min	Typ	Max	Units	Notes
28V _{DC} modules					
Steady state input	16	28	50	V _{DC}	
Input spike limit	-600		600	V _{DC}	20µs, 50Ω per MIL-STD-704A ^[a]
	-250		250	V _{DC}	70µs, 15mJ per MIL-STD-1275A/B/D
Input surge limit			100	V _{DC}	50ms, 0.5Ω per MIL-STD-1275A/B/D
			80	V _{DC}	100ms per DO-160E, Sec.16, Cat. Z
Overvoltage shut down ^[b]	50			V _{DC}	100ms, automatic recovery
Recommended fuse			20	Amps	F03A type
270V _{DC} modules					
Steady state input	100	270	400	V _{DC}	
Input spike limit			800	V _{DC}	20µs, 50Ω ^[a]
	-600		600	V _{DC}	100µs, 50mJ ^[a]
Input surge limit			500	V _{DC}	100ms, 0.5Ω
Overvoltage shut down ^[a]	400			V _{DC}	100ms, automatic recovery
Recommended fuse			4	Amps	F03A type
All models					
No load power dissipation		0.5	1.5	Watts	
Inrush current		110	125	% I _N	Steady state, I _N 10ms

^[a] Guaranteed by design – no test data available.

^[b] The MI-IAM disables downstream converters and clamps the converter input voltage at a safe level.

Output Characteristics

Parameter	Min	Typ	Max	Units	Test Conditions
Clamp voltage					
28V _{DC} input			60	V _{DC}	
270V _{DC} input			420	V _{DC}	
Output power			250	Watts	
Internal voltage drop					
28V _{DC}		0.6		V _{DC}	
270V _{DC}		0.85		V _{DC}	
Overload protection					
28V _{DC} input			20	Amps	Foldback threshold; auto recovery
270V _{DC} input			4	Amps	with latched shut down after 1ms

Isolation Characteristics

Parameter	Min	Typ	Max	Units	Notes
Input to base		1,500		V_{RMS}	1 minute
Output to base		1,500		V_{RMS}	1 minute

EMI Characteristics MIL-STD-461⁽¹⁾

Parameter	Notes
Input power leads	
Conducted emissions	CE01, CE03, CE07 CE101, CE102 MIL-STD-461C MIL-STD-461D/E
Conducted susceptibility	CS01, CS02, CS06, CS101, CS114, CS115, CS116 MIL-STD-461C MIL-STD-461D/E

⁽¹⁾ EMI performance is subject to a wide variety of external influences such as PCB construction, circuit layout etc. As such, external components in addition to those listed herein may be required in specific instances to gain full compliance to the standards specified.

Model Selection Chart

Model Number	Nominal Input Voltage	Input Range	Compatible MI-Series	Converter
MI-A22-MU	28V _{DC}	16 – 50V _{DC}	MI-22x-Mx and MI-J2x-Mx	M-grade
MI-A66-MU	270V _{DC}	125 – 400V _{DC}	MI-26x-Mx and MI-J6x-Mx	M-grade
MI-A22-IU	28V _{DC}	16 – 50V _{DC}	MI-22x-lx and MI-J2x-lx	I-grade
MI-A66-IU	270V _{DC}	125 – 400V _{DC}	MI-26x-lx and MI-J6x-lx	I-grade

Specifications

(Typical at $T_{BP} = 25^{\circ}\text{C}$, nominal line and 75% load, unless otherwise specified)

ENVIRONMENTAL – MIL-STD-810D

Parameter	Min	Typ	Max	Units	Test Conditions
Altitude - method 500.2	70,000			feet	Procedure II
Humidity - method 507.2	88/240			%/hours	Procedure I, cycle 1

Vicor's Standard Terms and Conditions and Product Warranty

All sales are subject to Vicor's Standard Terms and Conditions of Sale, and Product Warranty which are available on Vicor's webpage (<http://www.vicorpower.com/termsconditionswarranty>) or upon request.

Life Support Policy

VICOR'S PRODUCTS ARE NOT AUTHORIZED FOR USE AS CRITICAL COMPONENTS IN LIFE SUPPORT DEVICES OR SYSTEMS WITHOUT THE EXPRESS PRIOR WRITTEN APPROVAL OF THE CHIEF EXECUTIVE OFFICER AND GENERAL COUNSEL OF VICOR CORPORATION. As used herein, life support devices or systems are devices which (a) are intended for surgical implant into the body, or (b) support or sustain life and whose failure to perform when properly used in accordance with instructions for use provided in the labeling can be reasonably expected to result in a significant injury to the user. A critical component is any component in a life support device or system whose failure to perform can be reasonably expected to cause the failure of the life support device or system or to affect its safety or effectiveness. Per Vicor Terms and Conditions of Sale, the user of Vicor products and components in life support applications assumes all risks of such use and indemnifies Vicor against all liability and damages.
