Chipsmall

Chipsmall Limited consists of a professional team with an average of over 10 year of expertise in the distribution of electronic components. Based in Hongkong, we have already established firm and mutual-benefit business relationships with customers from,Europe,America and south Asia,supplying obsolete and hard-to-find components to meet their specific needs.

With the principle of "Quality Parts,Customers Priority,Honest Operation,and Considerate Service",our business mainly focus on the distribution of electronic components. Line cards we deal with include Microchip,ALPS,ROHM,Xilinx,Pulse,ON,Everlight and Freescale. Main products comprise IC,Modules,Potentiometer,IC Socket,Relay,Connector.Our parts cover such applications as commercial,industrial, and automotives areas.

We are looking forward to setting up business relationship with you and hope to provide you with the best service and solution. Let us make a better world for our industry!

Revision A

MK-043R

Introduction

The MK-043R is a fully integrated 4.3"
WQVGA production color display module,
with a resistive touch screen, to support
a variety of embedded control interface
applications. The MK-043R is "form, fit, and
function" the same as the MK-480272C, but
with enhanced EMI and ESD protection.

Compatible with GEMstudio™ for quick and
easy GUI design, these production-ready
units support GIF, JPEG, PNG, and more
graphic formats in 24-bit color, plus 8-bit
alpha blending (transparency channel) found
in high-end consumer electronic products.

The MK-043R has 64Mb (2Mx32) of SDR
SDRAM for image caching , and 32Mb
of serial data flash for code storage. The
module has a 480 x 272 WQVGA TFT LCD
with a resistive touch panel.

Amulet's Graphical OS Chip™ with an
integrated resistive touch display controller
handles all the graphics processing and
control as well as the communication to a
host controller.

Features

Module

- Amulet Graphical OS – GEM OS
- Operating Temperature: -20°C to 70°C

Display

- 480x272 TFT LCD
- 350 nit (cd/m^2)
- Contrast Ratio: 450:1
- Viewing Angle: 6 o'clock
- Software controlled rotation
- 24-bit color
- PWM controlled brightness

Touch Panel

- Integrated 4-wire Resistive Touch

Communication Interfaces

- 1x UART-TTL
- 1x UART RS232
- 1x SPI with 2 Chip Selects
- 1x I2C
- 2x PWM
- USB 2.0 Device Interface

Amulet
Technologies

Power

- 5V DC (through USB or I/O header)

ESD Enhancements

The MK-043R can be visually distinguished from the older MK480272C by looking at the mounting tabs. As seen in Figure 2 on the following page, the mounting tabs are plated with metal. The metal tabs are connected to a ground plane within the PCB which is isolated from signal ground.

It is recommended that the enclosure design, which integrates the display module, should have the mounting tabs connected to chassis ground or earth ground. This allows for any ESD to dissipate through the metal enclosure of the display, to the isolated ground plane, extending out to the tabs, and then to chassis ground. Figure 1 below, shows the cross section of the module. The red line shows the the ground path from the metal housing of display to the grounding spring, to the PCB ground layer, and out to the mounting tab.

Pin Configuration

Figure 2

24 Pin I/O Socket - J3

| Details	Description	Pins Number		Description	Details
Supply Voltage In	5 VDC IN	1	2	5 VDC IN	Supply Voltage In
Common Ground	GND	3	4	GND	Common Ground
I²C - Serial Clock Line	I2C_SCL	5	6	I²C_SDA	I2C - Serial Data Line
UART0 Receive	UART0_RXD	7	8	UART0_TXD	UART0 Transmit
Pulse Width Modulation Port 1	PWM1	9	10	PWM2	Pulse Width Modulation Port 2
Program Mode, Active Low	PROG_MODE[1]	11	12	PWM0	Pulse Width Modulation Port 0
RS-232 Transmit Port	RS232 TXD	13	14	T_CAL[1]	Touchpanel Calibration Active Low
UART1 Receive TTL levels	UART1_RXD	15	16	UART1_TXD	UART1 Transmit TTL levels
SPI - Chip Select 3	SPI_CS3	17	18	RS232 RXD	RS-232 Receive Port
SPI - Chip Select 2	SPI_CS2	19	20		
SPI - Master Input, Slave Output	SPI_MISO	21	22	SPI_SCLK	SPI - Serial Clock
System Reset, Active Low	RESET[1]	23	24	SPI_MOSI	SPI - Master Out, Slave In

J3 UART Connections

For UART TTL-level Communication

```
Pin 1 5V
Pin 2 5V
Pin 3 GND
Pin 4 GND
Pin 15 UART1 RXD    <——>    Host UART to
Pin 16 UART1 TXD               UART1 3.3V Levels
```

For UART RS232 Communication

```
Pin 1 5V
Pin 2 5V
Pin 3 GND
Pin 4 GND
Pin 13 RS232 TXD    <——>    Host RS232 to
PIN 18 RS232 RXD              UART0 RS232
```

Note: If RS232 is not required, the MK-043R can be hardware configured to utilize UART0 as another TTL-level UART in addition to UART1. Please contact our support department at support@amulettechnologies.com for details. For I/O requirements through SPI or I^{2}C, also contact Amulet's support department

Amulet Technologies

Mechanical Specification
Recommended Operating Conditions

Parameter	Conditions	Min	Typ	Max	Units
USB port Supply Voltage	Stable external supply required	4.5	5	5.5	Vdc

Environmental Specification

Parameter	Min	Typ	Max	Units
Storage Temp	-30		80	$^{\circ}$C
Operating Temp	-20		70	$^{\circ}$C

Notes:

If you wish to program via UART make sure you can get to the Reset and the Program Mode pins. These will only be needed if a serious programming issue occurs.

In System programming information can be found in the GEMstudio Pro User's Guide under the section titled, "GEMstudio Production File".
