

Chipsmall Limited consists of a professional team with an average of over 10 year of expertise in the distribution of electronic components. Based in Hongkong, we have already established firm and mutual-benefit business relationships with customers from,Europe,America and south Asia,supplying obsolete and hard-to-find components to meet their specific needs.

With the principle of "Quality Parts,Customers Priority,Honest Operation,and Considerate Service",our business mainly focus on the distribution of electronic components. Line cards we deal with include Microchip,ALPS,ROHM,Xilinx,Pulse,ON,Everlight and Freescale. Main products comprise IC,Modules,Potentiometer,IC Socket,Relay,Connector.Our parts cover such applications as commercial,industrial, and automotives areas.

We are looking forward to setting up business relationship with you and hope to provide you with the best service and solution. Let us make a better world for our industry!

Weller®

Compact Capability with Cordless Convenience.

Introducing the soldering pencil that's small in size but huge on performance.

COOPER Hand Tools

The new mid-size Weller® ML500MP Magna-Lite Butane Soldering Pencil has the power to tackle most any job

With most mid-size portable soldering irons, you're forced to choose between power and run time... but the Weller ML500MP gives you both. With a medium setting working time of approximately 30 minutes, it has the capacity to complete multiple jobs between refills, making it perfect for field service repair applications. And with continuously variable temperature adjustment - from 750°F to 900°F - it has the versatility to handle anything from basic home electrical projects to intricate tasks involving sensitive electronics. The ML500MP can also be used as a mini-torch when the soldering tip is removed, allowing it to perform jobs such as working with heat shrink tubing.

The ML500MP can also be used as a mini-torch when the soldering tip is removed.

In soldering iron mode, gas flow control allows continuously variable tip temperature adjustment between 750°F and 900°F; in mini-torch mode it controls height and temperature of flame

Tip is easily removed, allowing tool to be used as a mini-torch

Refills quickly and easily with standard butane gas

Waterproof piezo pushbutton ignition is fast and reliable - no spark lighter required

Catalog Number	Description
ML500MP	The Magna-Lite Butane Soldering Pencil (includes ML501 1.6mm conical tip)
ML501	Replacement Tip, conical, 1.6mm
ML502	Replacement Tip, chisel, 2.4mm
ML503	Replacement Tip, hot knife
