Chipsmall Limited consists of a professional team with an average of over 10 year of expertise in the distribution of electronic components. Based in Hongkong, we have already established firm and mutual-benefit business relationships with customers from,Europe,America and south Asia,supplying obsolete and hard-to-find components to meet their specific needs.

With the principle of "Quality Parts,Customers Priority,Honest Operation, and Considerate Service",our business mainly focus on the distribution of electronic components. Line cards we deal with include Microchip,ALPS,ROHM,Xilinx,Pulse,ON,Everlight and Freescale. Main products comprise IC,Modules,Potentiometer,IC Socket,Relay,Connector.Our parts cover such applications as commercial,industrial, and automotives areas.

We are looking forward to setting up business relationship with you and hope to provide you with the best service and solution. Let us make a better world for our industry!

## NPN RF Transistor

This device is designed for use in low noise UHF/VHF amplifiers, with collector currents in the $100 \mu \mathrm{~A}$ to 20 mA range in common emitter or common base mode of operations, and in low frequency drift, high output UHF oscillators. Sourced from Process 42.

Absolute Maximum Ratings* TA $25^{\circ} \mathrm{C}$ unlessonememisenoled

| $\mathrm{~T}_{\mathrm{J}}, \mathrm{T}_{\mathrm{stg}}$ | Operating and Storage Junction Temperature Range | -55 to +150 | ${ }^{\circ} \mathrm{C}$ |

*These ratings are limiting values above which the serviceability of any semiconductor device may be impaired.

## NOTES:

1) These ratings are based on a maximum junction temperature of 150 degrees $C$.
2) These are steady state limits. The factory should be consulted on applications involving pulsed or low duty cycle operations.
