

Chipsmall Limited consists of a professional team with an average of over 10 year of expertise in the distribution of electronic components. Based in Hongkong, we have already established firm and mutual-benefit business relationships with customers from,Europe,America and south Asia,supplying obsolete and hard-to-find components to meet their specific needs.

With the principle of "Quality Parts,Customers Priority,Honest Operation,and Considerate Service",our business mainly focus on the distribution of electronic components. Line cards we deal with include Microchip,ALPS,ROHM,Xilinx,Pulse,ON,Everlight and Freescale. Main products comprise IC,Modules,Potentiometer,IC Socket,Relay,Connector.Our parts cover such applications as commercial,industrial, and automotives areas.

We are looking forward to setting up business relationship with you and hope to provide you with the best service and solution. Let us make a better world for our industry!

MOD-RS485 development board

Users Manual

All boards produced by Olimex are ROHS compliant

Revision Initial, April 2011

INTRODUCTION:

MOD-RS485 is a small module board realized with ADM3483ARZ - low power, differential line transceiver designed to operate using a single 3.3 V power supply, for half-duplex communication. This module can be used to convert RS232 signals into RS485 signals. The board comes with 10 pin cable for the UEXT, via which it can be connected to each of our development boards with UEXT on it.

This module is an excellent choice for conveying information over long distances, allowing error-free data transmission at data rates up to 250 kbps.

BOARD FEATURES:

- Half-duplex transceiver ADM3483ARZ from Analog Devices
- UEXT connector
- RS485 connector
- FR-4, 1.5 mm, soldermask, component print
- Dimensions: 30.99x20.32mm (1.22 x 0.80")

ELECTROSTATIC WARNING:

The **MOD-RS485** board is shipped in protective anti-static packaging. The board must not be subject to high electrostatic potentials. General practice for working with static sensitive devices should be applied when working with this board.

BOARD USE REQUIREMENTS:

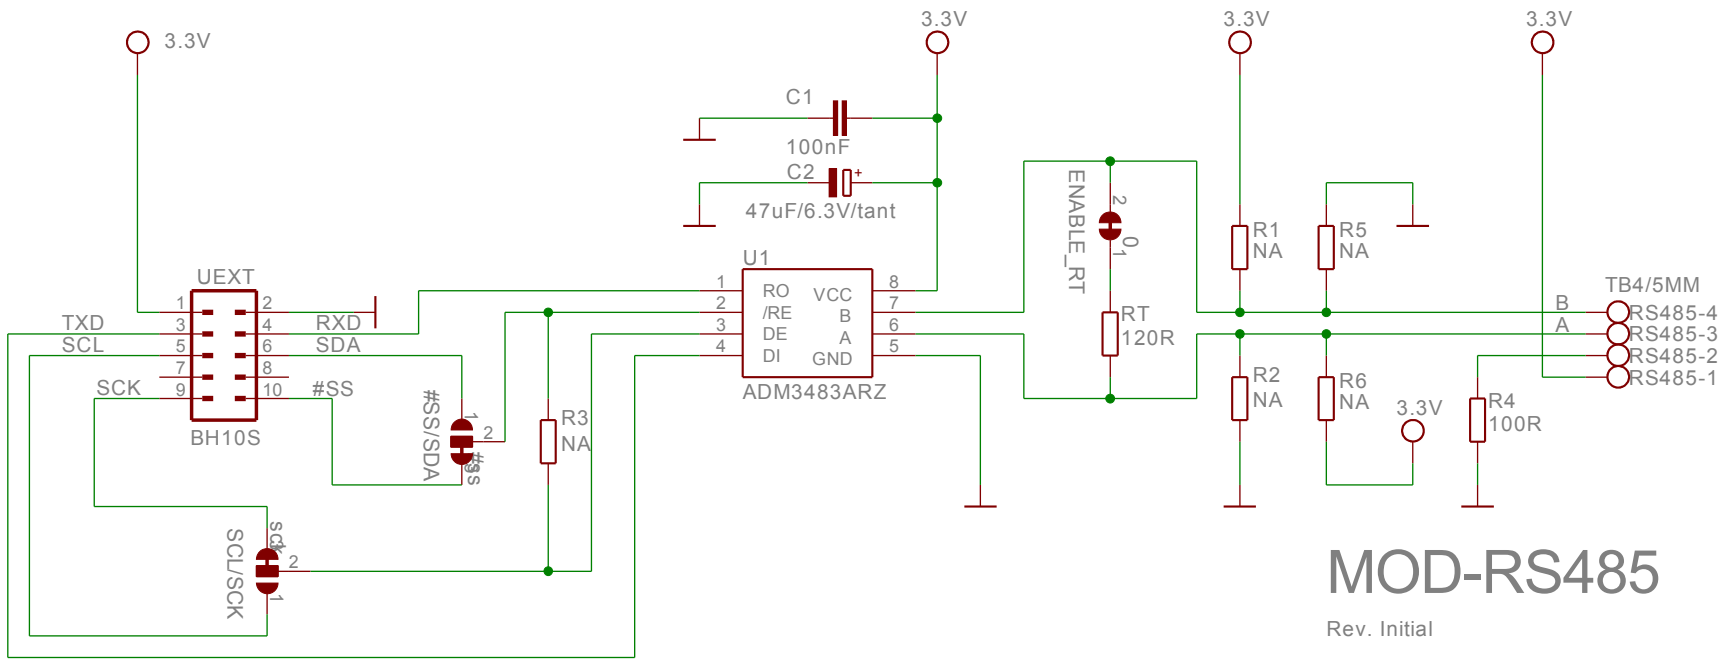

Cables: The board comes with 10 pin cable for the UEXT connector.

Hardware: Any of our development boards with UEXT connector on it.

BOARD LAYOUT:

POWER SUPPLY CIRCUIT:

MOD-RS485 is power supplied via UEXT connector pin 1 (3.3V) and pin 2 (GND).

JUMPER DESCRIPTION:

ENABLE_RT

This jumper, when closed, enables 120 Ohm termination on the RS485 bus.

Default state is closed.

SCL/SCK

This jumper, when is in position SCL - connects UEXT pin 5 (SCL) to ADM3483ARZ pin 3 (DE) and when is in position SCK - connects UEXT pin 9 (SCK) to ADM3483ARZ pin 3 (DE).

Default state is in position SCK.

#SS/SDA

This jumper, when is in position #SS - connects UEXT pin 10 (#SS) to ADM3483ARZ pin 2 (/RE) and when is in position SDA - connects UEXT pin 6 (SDA) to ADM3483ARZ pin 2 (/RE).

Default state is in position #SS.

EXTERNAL CONNECTORS DESCRIPTION:

UEXT:

Pin #	Signal Name
1	VCC
2	GND
3	TXD
4	RXD
5	SCL
6	SDA
7	Not connected
8	Not connected
9	SCK
10	#SS

RS485:

Pin #	Signal Name
1	VCC
2	100 Ohm pull-down resistor
3	A
4	B
