Pinout and Signal Description

The 200 version board has a 10-pin header instead of an RJ-45 jack. This header enables you to relocate the jack to another location or to add a different jack with power over ethernet (PoE) capabilities to your module. Table 1 provides descriptions of pin function of the 10-pin header.

Table 1: **Pinout and Signal Descriptions for JP2 Header** (1)

Pin	Signal	Description
1	TX-	Transmit -
2	TX+	Transmit +
3	VCC[1]	2.5V
4	RX+	Recieve +
5	RX-	Recieve -
6	VCC[1]	2.5V
7	GND	Ground
8	N/C	Not Connected
9	LED	Link LED
10	LED	Speed LED

Note:
1. Ethernet magnetics center tap voltage provided by NetBurner device

The module has two dual in-line 50 pin headers which enable you to connect to one of our standard NetBurner Carrier Boards, or a board you create on your own. Table 2-3 provides descriptions of pin function of the module header.
