## : ©hipsmall

Chipsmall Limited consists of a professional team with an average of over 10 year of expertise in the distribution of electronic components. Based in Hongkong, we have already established firm and mutual-benefit business relationships with customers from,Europe,America and south Asia,supplying obsolete and hard-to-find components to meet their specific needs.

With the principle of "Quality Parts,Customers Priority,Honest Operation, and Considerate Service",our business mainly focus on the distribution of electronic components. Line cards we deal with include Microchip,ALPS,ROHM,Xilinx,Pulse,ON,Everlight and Freescale. Main products comprise IC,Modules,Potentiometer,IC Socket,Relay,Connector.Our parts cover such applications as commercial,industrial, and automotives areas.

We are looking forward to setting up business relationship with you and hope to provide you with the best service and solution. Let us make a better world for our industry!

## MP2735/MP2736 Low-Voltage 0.45 $\Omega$ Dual SPDT Analog Switches

## The Future of Analog IC Technology

## GENERAL DESCRIPTION

The MP2735/MP2736 are low voltage, low onresistance, dual single-pole, double-throw (SPDT) monolithic CMOS analog switches designed for high performance switching of analog signals. Combining low-power, high speed, low on-resistance, and small package size, the MP2735/MP2736 are ideal for portable and battery power applications.

The MP2735/MP2736 have an operation range from 1.65 V to 5.5 V single supply. The MP2735 has two separate control pins and two separate SPDT switches. The MP2736 includes an EN pin. All switches are at high impedance mode when the $\overline{\mathrm{EN}}$ is high.

The MP2735/MP2736 are guaranteed 1.65V logic compatible for $\mathrm{V}+<3.3 \mathrm{~V}$, allowing the easy interface with low voltage DSP or MCU control logic and ideal for one cell Li-ion battery direct power.

The switch conducts signals within power rails equally well in both directions when on, and blocks up to the power supply level when off. Break-before-make is guaranteed.

The MP2735/MP2736 are offered in a QFN10 package.

## FEATURES

- Low Voltage Operation (1.65V to 5.5 V )
- Low On-Resistance - R R $: 0.45 \Omega$ at 2.7 V
- Fast Switching: $\mathrm{T}_{\text {ON }}=29 \mathrm{~ns}$ at 2.7 V
- $\mathrm{T}_{\text {OFF }}=23 \mathrm{~ns}$ at 2.7 V
- Latch-Up Current >300mA (JESD78)
- $1.4 \mathrm{~mm} \times 1.8 \mathrm{~mm}$ QFN10 Package
- ESD Human-Body Model $\pm 4000 \mathrm{~V}$

## APPLICATIONS

- Cellular Phones
- Speaker Headset Switching
- Audio and Video Signal Routing
- PCMCIA Cards
- Battery Powered Systems
- Portable Media Player
- Handheld Test Instruments
