

Chipsmall Limited consists of a professional team with an average of over 10 year of expertise in the distribution of electronic components. Based in Hongkong, we have already established firm and mutual-benefit business relationships with customers from,Europe,America and south Asia,supplying obsolete and hard-to-find components to meet their specific needs.

With the principle of “Quality Parts,Customers Priority,Honest Operation,and Considerate Service”,our business mainly focus on the distribution of electronic components. Line cards we deal with include Microchip,ALPS,ROHM,Xilinx,Pulse,ON,Everlight and Freescale. Main products comprise IC,Modules,Potentiometer,IC Socket,Relay,Connector.Our parts cover such applications as commercial,industrial, and automotives areas.

We are looking forward to setting up business relationship with you and hope to provide you with the best service and solution. Let us make a better world for our industry!

## MEMS audio sensor omnidirectional digital microphone

Datasheet - production data

- Gaming and virtual reality input devices
- Digital still and video cameras
- Antitheft systems

### Description

The MP34DT04-C1 is an ultra-compact, low-power, omnidirectional, digital MEMS microphone built with a capacitive sensing element and an IC interface.

The sensing element, capable of detecting acoustic waves, is manufactured using a specialized silicon micromachining process dedicated to produce audio sensors.

The IC interface is manufactured using a CMOS process that allows designing a dedicated circuit able to provide a digital signal externally in PDM format.

The MP34DT04-C1 has an acoustic overload point of 120 dB SPL with a 64 dB signal-to-noise ratio and -26 dBFS sensitivity.

The MP34DT04-C1 is available in a top-port, SMD-compliant, EMI-shielded package and is guaranteed to operate over an extended temperature range from -40 °C to +85 °C.

### Features

- Single supply voltage
- Low power consumption
- 120 dB SPL acoustic overload point
- 64 dB signal-to-noise ratio
- Omnidirectional sensitivity
- -26 dBFS sensitivity
- PDM output
- HCLGA package
  - Top-port design
  - SMD-compliant
  - EMI-shielded
  - ECOPACK®, RoHS, and “Green” compliant

### Applications

- Mobile terminals
- Laptop and notebook computers
- Portable media players
- VoIP
- Speech recognition
- A/V eLearning devices

**Table 1: Device summary**

Order codes	Temp. range [°C]	Package	Packing
MP34DT04TR-C1	-40 to +85	HCLGA (3x4 x1.095 mm) 4LD	Tape and reel

# 1 Pin description

Figure 1: Pin connections

Table 2: Pin description

Pin #	Pin name	Function
1	Vdd	Power supply
2	LR	Left/Right channel selection
3	CLK	Synchronization input clock
4	DOUT	Left/Right PDM data output
5 (ground ring)	GND	0 V supply

## 2 Acoustic and electrical specifications

### 2.1 Acoustic and electrical characteristics

The values listed in the table below are specified for Vdd = 1.8 V, Clock = 2.4 MHz, T = 25 °C, unless otherwise noted.

**Table 3: Acoustic and electrical characteristics**

Symbol	Parameter	Test condition	Min.	Typ. <sup>(1)</sup>	Max.	Unit
Vdd	Supply voltage		1.6	1.8	3.6	V
Idd	Current consumption in normal mode	Mean value		650		μA
IddPdn	Current consumption in power-down mode <sup>(2)</sup>				10	μA
ScC	Short-circuit current		1		10	mA
AOP	Acoustic overload point			120		dB SPL
So	Sensitivity		-29	-26	-23	dBFS
SNR	Signal-to-noise ratio	A-weighted at 1 kHz, 94 dB SPL		64		dB (A)
PSR	Power supply rejection	100 mVpp sine 1 kHz		-70		dBFS
fCLK	Input clock frequency <sup>(3)</sup>		1.2	2.4	3.25	MHz
Ton	Turn-on time <sup>(4)</sup>	Guaranteed by design			10	ms
Top	Operating temperature range		-40		+85	°C
VIOL	Low-level logic input/output voltage	I <sub>out</sub> = 1 mA	-0.3		0.35xVdd	V
VI0H	High-level logic input/output voltage	I <sub>out</sub> = 1 mA	0.65xVdd		Vdd+0.3	V
CLOAD	Capacitive load				100	pF

**Notes:**

<sup>(1)</sup>Typical specifications are not guaranteed.

<sup>(2)</sup>Input clock in static mode.

<sup>(3)</sup>Duty cycle: min = 40% max = 60%

<sup>(4)</sup>Time from the first clock edge to valid output data.

**Table 4: Distortion specifications**

Parameter	Test condition	Typ. value <sup>(1)</sup>
Distortion	100 dB SPL (50 Hz - 4 kHz)	<1% THD + N
Distortion	115 dB SPL (1 kHz)	<5% THD + N

**Notes:**

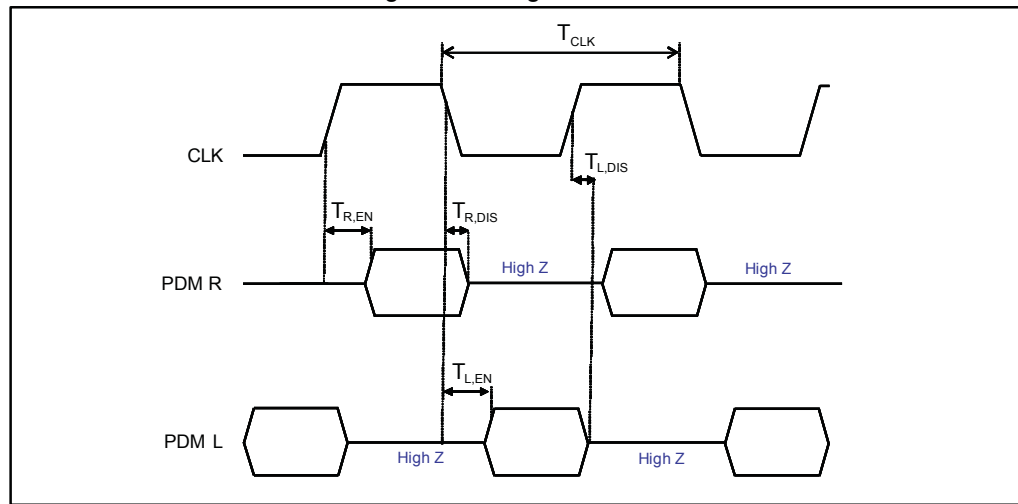

<sup>(1)</sup>Typical specifications are not guaranteed.

## 2.2 Timing characteristics

Table 5: Timing characteristics

Parameter	Description	Min.	Max.	Unit
$f_{CLK}$	Clock frequency for normal mode	1.2	3.25	MHz
$f_{PD}$	Clock frequency for power-down mode		0.23	MHz
$T_{CLK}$	Clock period for normal mode	308	1000	ns
$T_{R,EN}$	Data enabled on DATA line, L/R pin = 1	70	90	ns
$T_{R,DIS}$	Data disabled on DATA line, L/R pin = 1	4.3	5.3	ns
$T_{L,EN}$	Data enabled on DATA line, L/R pin = 0	64	87	ns
$T_{L,DIS}$	Data disabled on DATA line, L/R pin = 0	3.5	4.3	ns

Figure 2: Timing waveforms

## 2.3 Frequency response

Figure 3: Frequency response and mask

Table 6: Frequency response mask for digital microphones

Frequency / Hz <sup>(1)</sup>	Lower limit	Upper limit	Unit
100...4000	-2	+2	dBr 1 kHz
4000...10000	-2	+4	dBr 1 kHz

**Notes:**

<sup>(1)</sup>At T = 20 °C and acoustic stimulus = 1 Pa (94 dB SPL)

### 3 Application recommendations

Figure 4: MP34DT04-C1 electrical connections (top view)

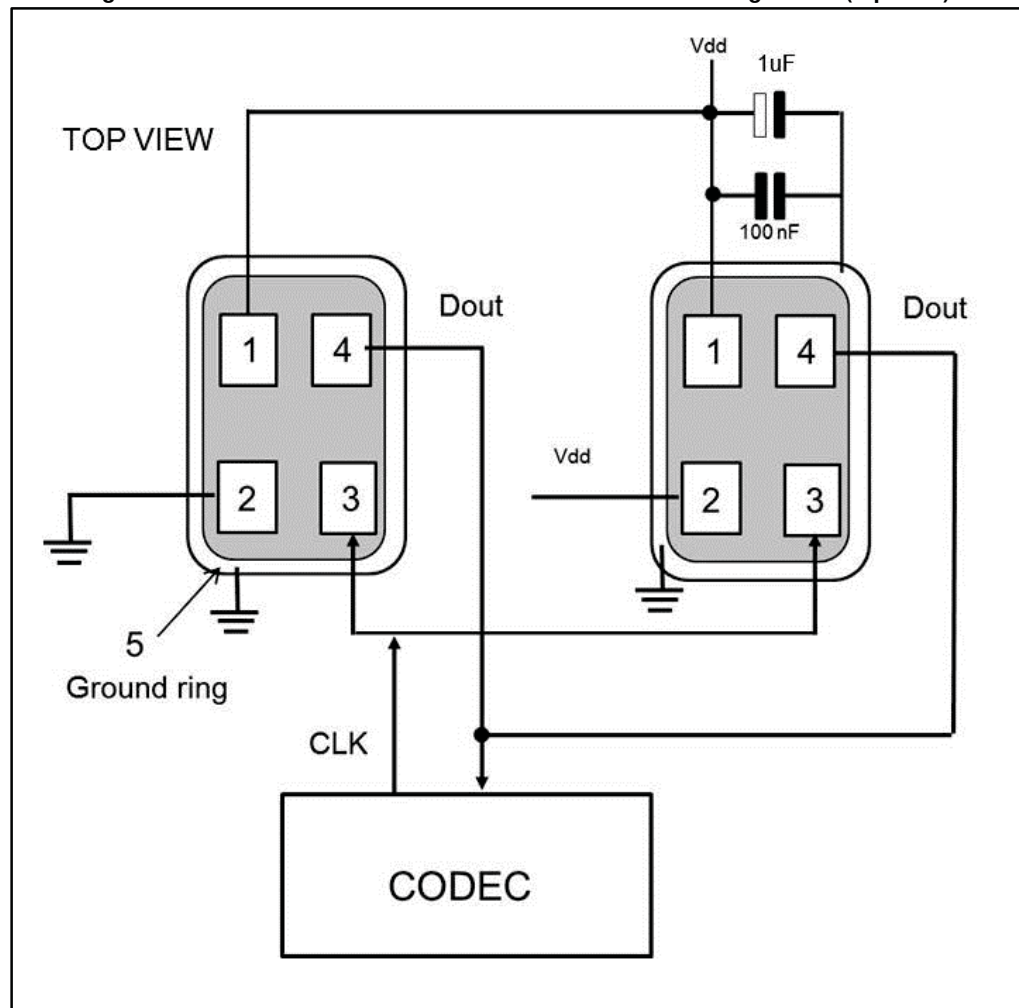

Figure 5: MP34DT04-C1 electrical connections for stereo configuration (top view)

Power supply decoupling capacitors (100 nF ceramic, 1 µF ceramic) should be placed as near as possible to pin 1 of the device (common design practice).

The L/R pin must be connected to Vdd or GND (refer to [Table 8: "L/R channel selection"](#)).

## 4 Carrier tape mechanical specifications

Figure 6: Carrier tape without microphone (top view)

Figure 7: Carrier tape with microphone (top view)

## 5 Process recommendations

To ensure a consistent manufacturing process it is strongly advised to comply with the following recommendations:

- The recommended pick-up area for the MP34DT04-C1 package must be defined using the worst case (ie. no device alignment during the picking process). This area has been defined considering all the tolerances of the components involved (reel, package, sound inlet). The picker tolerance shall be considered as well.
- To prevent damage to the MEMS membrane or incorrect pick-up and placement, do not pick up the component on the inlet area.
- For the package outline please refer to [Figure 7: "Carrier tape with microphone \(top view\)"](#). Nozzle shape, size, and placement accuracy are the other key factors to consider when deciding on the coordinates for picking.
- Device alignment before picking is highly recommended.
- A vacuum force greater than 7 psi must be avoided.
- $1 \text{ kPa} = 0.145 \text{ psi (lb/in}^2\text{)} = 0.0102 \text{ kgf/cm}^2 = 0.0098 \text{ atm}$
- MSL (moisture sensitivity level) Class 3
- Maximum of 3 reflow cycles is recommended.
- All recommended dimensions (device safe-picking area) do not include the pick-and-place equipment tolerances.

Figure 8: Recommended picking area

To have a safe pick-up "by design", ST strongly advises an ad hoc nozzle.

The following picker ensures that the holes for the vacuum and the air stream are ALWAYS away from the porthole of the device (4 vacuum ports located at each corner of the device).

The recommended nozzle also has a recess, in the form of a cross, which guarantees that the porthole is always left at atmospheric pressure. By using the recommended nozzle, the membrane will not suffer any sudden air disturbances during the picking or placing of the devices in the tape and reel.

Figure 9: Recommended picker design

## 6 Sensing element

The sensing element shall mean the acoustic sensor consisting of a conductive movable plate and a fixed plate placed in a tiny silicon chip. This sensor transduces the sound pressure into the changes of coupled capacity between those two plates.

Omron Corporation supplies this element for STMicroelectronics.

## 7 Absolute maximum ratings

Stresses above those listed as “absolute maximum ratings” may cause permanent damage to the device. This is a stress rating only and functional operation of the device under these conditions is not implied. Exposure to maximum rating conditions for extended periods may affect device reliability.

**Table 7: Absolute maximum ratings**

Symbol	Ratings	Maximum value	Unit
Vdd	Supply voltage	-0.3 to 5	V
Vin	Input voltage on any control pin	-0.3 to Vdd +0.3	V
T <sub>STG</sub>	Storage temperature range	-40 to +125	°C
ESD	Electrostatic discharge protection	±2000 (HBM)	V
		±200 (MM)	
		±750 (CBM)	
ESD	Product standard EN 55024:2010 - 3 air discharge	±15000	V

This device is sensitive to mechanical shock, improper handling can cause permanent damage to the part.

This device is sensitive to electrostatic discharge (ESD), improper handling can cause permanent damage to the part.

## 8 Functionality

### 8.1 L/R channel selection

The L/R digital pad lets the user select the DOUT signal pattern as shown in [Table 8: "L/R channel selection"](#). The L/R pin must be connected to Vdd or GND.

**Table 8: L/R channel selection**

L/R	CLK low	CLK high
GND	Data valid	High impedance
Vdd	High impedance	Data valid

## 9 Package information

In order to meet environmental requirements, ST offers these devices in different grades of ECOPACK® packages, depending on their level of environmental compliance. ECOPACK® specifications, grade definitions and product status are available at: [www.st.com](http://www.st.com). ECOPACK® is an ST trademark.

### 9.1 Soldering information

The HCLGA (3 x 4) 4LD package is also compliant with the RoHS and “Green” standards and is qualified for soldering heat resistance according to JEDEC J-STD-020.

Land pattern and soldering recommendations are available at [www.st.com](http://www.st.com).

**Figure 10: Recommended soldering profile limits**

**Table 9: Recommended soldering profile limits**

Description	Parameter	Pb free
Average ramp rate	$T_L$ to $T_P$	3 °C/sec max
Preheat		
Minimum temperature	$T_{SMIN}$	150 °C
Maximum temperature	$T_{SMAX}$	200 °C
Time ( $T_{SMIN}$ to $T_{SMAX}$ )	$t_s$	60 sec to 120 sec
Ramp-up rate	$T_{SMAX}$ to $T_L$	
Time maintained above liquids temperature	$t_L$	60 sec to 150 sec
Liquids temperature	$T_L$	217 °C
Peak temperature	$T_P$	260 °C max
Time within 5 °C of actual peak temperature		20 sec to 40 sec
Ramp-down rate		6 °C/sec max
Time 25 °C ( $t_{25}$ °C) to peak temperature		8 minutes max

Figure 12: Land pattern
