- NOTES:  
1. ALL DIMENSIONS IN INCHES (mm)  
2. TOLERANCES ± .010 INCH UNLESS SPECIFIED

**DESCRIPTION**

These T-3/4 LED lamps contain an integral resistor which is in series with the emitter chip. This construction allows for operation in circuits with 5 volt supply voltage; without the use of an external current limiting resistor. Color tinted, diffused epoxy packages are used for all lamps in this group.

**FEATURES**

Applications include circuit board status indication; especially in TTL circuits. They allow for savings in component/assembly costs. The lamps are compatible with vapor phase reflow surface mount and conventional solder assembly.
