

Chipsmall Limited consists of a professional team with an average of over 10 year of expertise in the distribution of electronic components. Based in Hongkong, we have already established firm and mutual-benefit business relationships with customers from,Europe,America and south Asia,supplying obsolete and hard-to-find components to meet their specific needs.

With the principle of “Quality Parts,Customers Priority,Honest Operation,and Considerate Service”,our business mainly focus on the distribution of electronic components. Line cards we deal with include Microchip,ALPS,ROHM,Xilinx,Pulse,ON,Everlight and Freescale. Main products comprise IC,Modules,Potentiometer,IC Socket,Relay,Connector.Our parts cover such applications as commercial,industrial, and automotives areas.

We are looking forward to setting up business relationship with you and hope to provide you with the best service and solution. Let us make a better world for our industry!

KW2x – 2.4 GHz Smart Energy & Home Automation Solution from Freescale

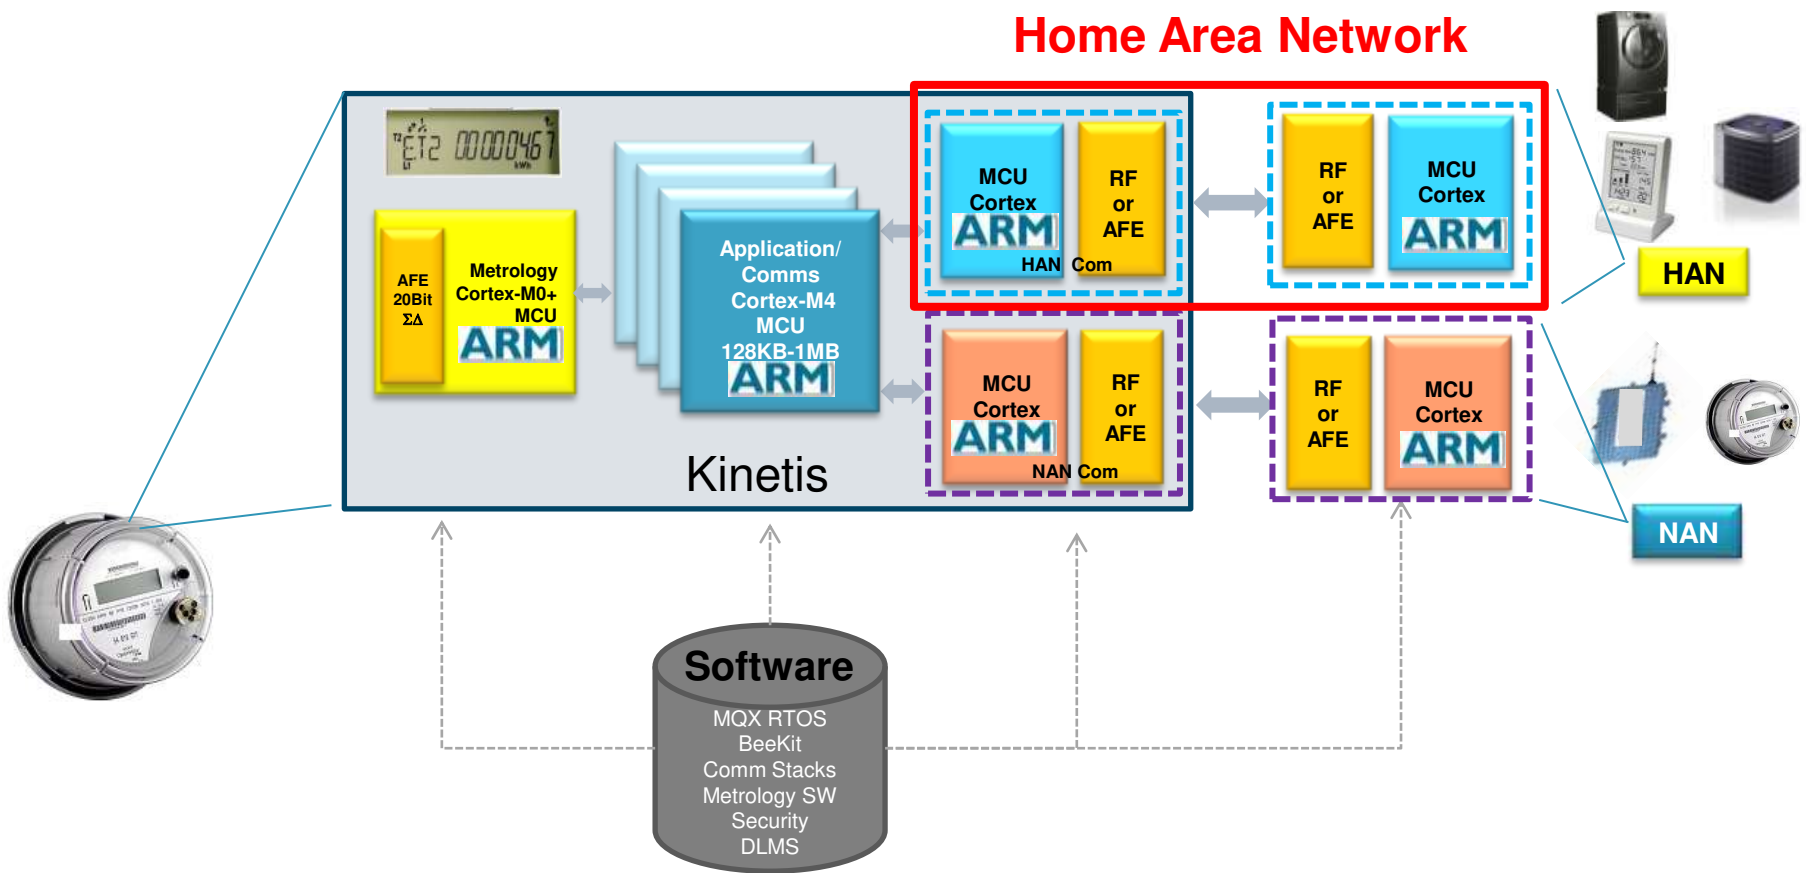

What is Kinetis KW2x?

- The new Kinetis KW2x is Freescale next generation 2.4 GHz 802.15.4 platform
- The Kinetis KW2x platform integrates a class leading RF transceiver, ARM Cortex-M4 core and a robust feature set for a reliable, secure and low-power IEEE® 802.15.4 wireless solution.
- Wireless protocol software is seamlessly integrated into Kinetis software development tools for rapid creation of embedded systems.

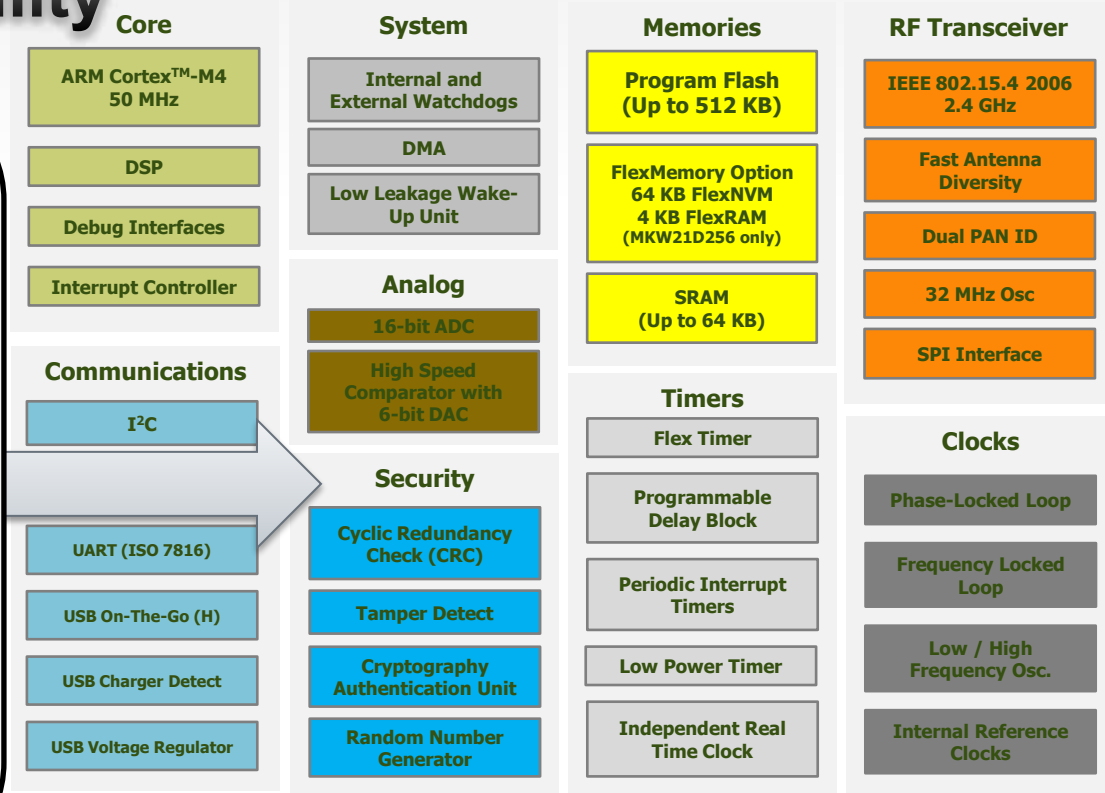

Freescale Smart Metering Solutions – Home Area Network

Security and Reliability

- Tamper detect
 - External tamper detect
 - 256-bit secure storage (erased on tamper)
- CRC
- Hardware encryption
- Cryptography Acceleration Unit (CAU)
- Random Number Generator (RNG)
 - FIPS compliant

Features and Benefits

Features	Benefits
RF	
<ul style="list-style-type: none"> • Class-leading link budget 	<ul style="list-style-type: none"> • 112 dB link budget provides greater range, reducing the need for external power amplifiers and lowering cost.
<ul style="list-style-type: none"> • Low power consumption 	<ul style="list-style-type: none"> • 17mA TX / 19 mA RX power consumption extends battery life
<ul style="list-style-type: none"> • Dual PAN support 	<ul style="list-style-type: none"> • System can actively participate in 2 networks, eliminating the need for multiple radios.
<ul style="list-style-type: none"> • Diversity Support 	<ul style="list-style-type: none"> • Freescale's FAD (Fast Antenna Diversity) allows the hardware to automatically select between 2 antennas, improving reliability in high interference environments.

MKW2x Enablement

KW2x Development Kit

Kit Features

- Can use PCB “F” antenna or bypass for external antenna via RF connector
- Open-SDA debugging
- USB port to interface with PC
- Configurable I/O access
- LEDs and switches for demonstration, monitoring and control
- BeeKit Tool with stacks and applications
 - ZigBeePro R20 with SE 1.1.x, HA 1.1, HC 1.0 profiles
 - Simple MAC and RF Test Tool
 - Dual-PAN example
 - Over-The-Air programming example
 - **Coming: ZigBeelP and SE 2.0 profile**
- Quick Start Guide

Tower Form Factor

- *Use standalone or in Tower System*
- *Boards sold individually*
- *Combine as many boards as needed*

Part Numbers:

TWR-KW21D256
TWR-KW24D512
