imall

Chipsmall Limited consists of a professional team with an average of over 10 year of expertise in the distribution of electronic components. Based in Hongkong, we have already established firm and mutual-benefit business relationships with customers from, Europe, America and south Asia, supplying obsolete and hard-to-find components to meet their specific needs.

With the principle of "Quality Parts, Customers Priority, Honest Operation, and Considerate Service", our business mainly focus on the distribution of electronic components. Line cards we deal with include Microchip, ALPS, ROHM, Xilinx, Pulse, ON, Everlight and Freescale. Main products comprise IC, Modules, Potentiometer, IC Socket, Relay, Connector. Our parts cover such applications as commercial, industrial, and automotives areas.

We are looking forward to setting up business relationship with you and hope to provide you with the best service and solution. Let us make a better world for our industry!

Honeywell

MICRO SWITCH[™] Specialty Large Basic Switches BS | DT | MN | MT | TB Series

004956

Issue 3

Datasheet

DESCRIPTION

MICRO SWITCH[™] premium specialty large snap-action switches are designed for repeatability and enhanced life. These series of precision switches feature application-specific characteristics. From double-break circuitry to handling power duty electrical loads, MICRO SWITCH[™] premium large snapaction switches are suitable for a variety of applications.

BS Series switches offer alternatives to solve challenging switch applications. These unique solutions can provide adjustable operating characteristics, sequential outputs, or impact actuation (no external plunger).

DT Series switches consist of two independent single-pole double throw (SPDT) contacts in one housing controlled by an integral common actuator. The DPDT contact configuration provides a contact for the control circuit and a different contact for the signal or auxiliary circuit.

MT Series magnetic blow-out switches are designed to switch high-capacity (125 Vdc/250 Vdc) electrical loads. An integral magnet around the contact gap deflects the arc away from the contacts, extending switch life. Vents between the cover and housing allow the hot gas to escape.

Easy to gang mount, MN Series single pole double throw double-break switches are for use with limit or control mechanisms on machine tools, presses, or other equipment.

MICRO SWITCH[™] TB Series miniature single pole double throw double break switches offer a means of controlling circuits similar to the MN Series switches except in a smaller package.

DIFFERENTIATION

- Double pole switch options in small package for increased application flexibility
- Double break switch options in compact design requires less space on equipment
- -55 °C [-67 °F] low temperature capability for harsh outdoor or cold room applications

FEATURES

- Double pole design in small package allows for control of two independent circuits (DT Series and MN Series)
- Switch design with adjustable operating characteristics (BS Series)
- Higher dc current capacity at 125 Vdc and 250 Vdc with magnetic blow-out contact design (MT Series)
- Compact switch package with double-break contacts (MN Series and TB Series)
- Variety of integral plunger and lever options or auxiliary plunger and lever options
- Most switches mount on the common 25,4 mm [1.00 in] centers
- Metal or plastic enclosures available to prevent contact with switch terminals
- Select switch series with a temperature range of -55 °C to 85 °C [-67 °F to 185 °F]
- Agency certifications with CSA and UL for select catalog listings
- MIL-PRF-8805 for select DT Series catalog listings

POTENTIAL APPLICATIONS

- Temperature and pressure switch assemblies
- Motor and solenoid dc control circuits
- Welder control circuits
- Switch element in machine tools
- Switch element in manually operated devices

VALUE TO CUSTOMERS

- Can control two independent circuits in a small package (DT Series and TB Series)
- Unique switch design with adjustable operating characteristics (BS Series)
- Magnetic blow-out contact design permits control of dc circuits in a small package size (MT Series)
- Double break switch design adds element of redundancy within small switch package (MN series and TB Series)

PORTFOLIO

The five different series of premium specialty large basic switches (BS Series, DT Series, MN Series, MT Series, and TB Series) complements the four different families of premium large basic switch series (BA Series, BE Series, BM Series, and BZ Series).

| Catalog Listing | Description | For Use With | Overtravel min. mm [in] | Operating Position* mm [in] | Free Position mm [in] |
|--------------------|-------------------------------------------------------------------------------------------------------------------------------------|--------------------|-------------------------------|------------------------------------------|--------------------------|
| JR | Roller lever for "S" plunger type DT switch- es only. Permits cam operation | DT | 11,1 mm [0.437 in] | 44,45 mm ±3,18 mm [1.75 in ±0.125 in] | - |
| ADD3721R | Adjustable roller lever. Tang on top of actuator can be bent to adjust O.P. and F.P. | DT, MT | 9,53 mm [0.375 in] approx. | 39,6 mm [1.562 in] approx. | 46,03 mm [1.812 in] |
| MCD2711 | Straight plunger. Panel mount | DT, MT | 3,58 mm [0.141 in] | 27,79 mm [1.094 in] | 30,18 mm [1.188 in] |
| MCD2711H | Sealed straight plunger. Panel mount. Elastomer boot seal keeps out liquid splash and dirt. Furnished unassem- bled. | DT, MT | 3,58 mm [0.141 in] | 27,79 mm [1.094 in] | 30,18 mm [1.188 in] |
| MD3211Q | Roller plunger. Panel mount. Roller parallel to long axis of the switch | DT, MT | 3,18 mm [0.125 in] | 35,7 mm [1.406 in] | 37,69 mm [1.484 in] |
| MD3211Q1 | Cross roller plunger. Panel mount. Roller perpendicular to long axis of the switch | DT, MT | 3,18 mm [0.125 in] | 35,7 mm [1.406 in] | 37,69 mm [1.484 in] |
| MCD7711 | High overtravel plunger. Panel mount | DT, MT | 18,26 mm [0.719 in] | 69,1 mm [2.719 in] | 71,42 mm [2.812 in] |

* Except where stated ±1,14 mm [±0.045 in]

NOTE: All actuators are for use with pin plunger types only, except catalog listing JR.

OPERATING CHARACTERISTICS

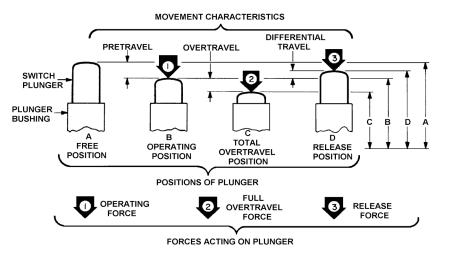

Table 22. Operating Characteristics Definitions

| Characteristic | Description |
|------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Differential Travel-DT | Plunger or actuator travel from point where contacts "snap-over" to point where they "snap-back." |
| Free Position-FP | Position of switch plunger or actuator when no external force is applied. |
| Full Overtravel Force | Force required to attain full overtravel of actuator. |
| Operating Position-OP | Position of switch plunger or actuator at which point contacts snap from normal to operated position. With flexible or adjustable actuators, the operating position is measured from the end of the lever or its maximum length. Location of operating position measurement shown on mounting dimension drawings. |
| Operating Force-OF | Amount of force applied to switch plunger or actuator to cause the contact "snap-over." Note in the case of adjustable actuators, the force is measured from the maximum length position of the lever. |
| Overtravel-OT | Plunger or actuator travel safely available beyond operating position. |
| Pretravel-PT | Distance or angle traveled in moving plunger or actuator from free position to operating position. |
| Release Force-RF | Amount of force still applied to switch plunger or actuator at the moment contacts snap from operated position to non-operated position. |
| Total Travel | Distance from actuator free position to overtravel limit position. |

ADDITIONAL MATERIALS

The following associated literature is available on the Honeywell web site at sensing.honeywell.com:

- Product installation instructions
- Product application-specific information
 - Sensors and switches for potential HVAC/R applications
 - Sensors and switches for valve monitors and valve indicators
 - Sensors and switches in oil rig applications
 - Sensors and switches in sanitary valves
- Applying basic switches
- Low energy switching guide
- Product range guide

A WARNING PERSONAL INJURY

DO NOT USE these products as safety or emergency stop devices or in any other application where failure of the product could result in personal injury.

Failure to comply with these instructions could result in death or serious injury.

▲ WARNING MISUSE OF DOCUMENTATION

- The information presented in this product sheet is for reference only. Do not use this document as a product installation guide.
- Complete installation, operation, and maintenance information is provided in the instructions supplied with each product.

Failure to comply with these instructions could result in death or serious injury.

Warranty/Remedy

Honeywell warrants goods of its manufacture as being free of defective materials and faulty workmanship. Honeywell's standard product warranty applies unless agreed to otherwise by Honeywell in writing; please refer to your order acknowledgement or consult your local sales office for specific warranty details. If warranted goods are returned to Honeywell during the period of coverage, Honeywell will repair or replace, at its option, without charge those items it finds defective. **The foregoing is buyer's sole remedy and is in lieu of all other warranties, expressed or implied, including those of merchantability and fitness for a particular purpose. In no event shall Honeywell be liable for consequential, special, or indirect damages.**

While we provide application assistance personally, through our literature and the Honeywell web site, it is up to the customer to determine the suitability of the product in the application.

Specifications may change without notice. The information we supply is believed to be accurate and reliable as of this printing. However, we assume no responsibility for its use.

Find out more

Honeywell serves its customers through a worldwide network of sales offices, representatives and distributors. For application assistance, current specifications, pricing or name of the nearest Authorized Distributor, contact your local sales office. To learn more about Honeywell's sensing and switching products, call **+1-815-235-6847 or 1-800-537-6945,** visit **sensing.honeywell.com,** or e-mail inquiries to **info.sc@honeywell.com**
