## : ©hipsmall

Chipsmall Limited consists of a professional team with an average of over 10 year of expertise in the distribution of electronic components. Based in Hongkong, we have already established firm and mutual-benefit business relationships with customers from,Europe,America and south Asia,supplying obsolete and hard-to-find components to meet their specific needs.

With the principle of "Quality Parts,Customers Priority,Honest Operation, and Considerate Service",our business mainly focus on the distribution of electronic components. Line cards we deal with include Microchip,ALPS,ROHM,Xilinx,Pulse,ON,Everlight and Freescale. Main products comprise IC,Modules,Potentiometer,IC Socket,Relay,Connector.Our parts cover such applications as commercial,industrial, and automotives areas.

We are looking forward to setting up business relationship with you and hope to provide you with the best service and solution. Let us make a better world for our industry!

## Miniature Power Relays MY

## New Latching Levers for Circuit Checking <br> Added to Our Best-selling MY General-purpose Relays

- Now lead-free to protect the environment.
- VDE certification (Germany).
- Different colors of coil tape for AC and DC models to more easily distinguish them.
- MY(S) models with latching levers added for easier circuit checking.

Refer to the Common Relay Precautions.

Note: These are initial values
*1. Measurement conditions: 1 A at 5 VDC using the voltage drop method
*2. Measurement conditions: With rated operating power applied.
Ambient temperature condition: $23^{\circ} \mathrm{C}$
*3. Measurement conditions: For 500 VDC applied to the same location as for dielectric strength measurement
*4. Ambient temperature condition: $23^{\circ} \mathrm{C}$
$* 5$. This value was measured at a switching frequency of 120 operations per minute.

Models with built-in diodes
The diode absorbs surge from the coil. This type is best suited for applications with semiconductor circuits. With Diode

Without Diode

Note: 1. Make sure that the polarity is correct.
2. The release time will increase, but the $20-\mathrm{ms}$ specification for standard models is satisfied
3. Diode properties:The diode has a reversed dielectric strength of $1,000 \mathrm{~V}$. Forward current: 1 A

## Detailed Information on Models Certified for Safety Standards, MY2Z, MY3, MY $\square-02$, and MY $\square$ F

- Refer to Model Number Structure on page 1 for a list of applicable models.
- The standard models are certified for UL and CSA standards.
- The rated values for safety standard certification are not the same as individually defined performance values. Always check the specifications before use.

Note: 1. The rated current and coil resistance are measured at a coil temperature of $23^{\circ} \mathrm{C}$ with tolerances of $+15 \% /-20 \%$ for the AC rated current and $\pm 15 \%$ for the DC coil resistance.
2. The AC coil resistance and inductance values are reference values only
3. Operating characteristics were measured at a coil temperature of $23^{\circ} \mathrm{C}$.
4. The maximum voltage capacity was measured at an ambient temperature of $23^{\circ} \mathrm{C}$.
*1. There is variation between products, but actual values are $80 \%$ max.
To ensure operation, apply at least $80 \%$ of the rated value
*2. There is variation between products, but actual values are $30 \%$ minimum for AC and $10 \%$ minimum for DC. To ensure release, use a value that is lower than the specified value
