Duplex Singlemode 8.3/125 Fiber Patch Cable (LC/SC), 7 m (23 ft.)

MODEL NUMBER: **N366-07M**

Premium singlemode fiber optic cabling transmits fast, clear data signals through your LAN with twice the bandwidth throughput of multimode cable.

Description

The N366-07M Duplex Singlemode 8.3/125 Fiber Patch Cable transmits fast, clear data signals through your LAN with a higher bandwidth than multimode cable for up to twice the throughput. Designed for network equipment that requires singlemode fiber optic patch cables, this seven-meter (23-foot) cable has attenuation loss that meets or exceeds current standards.

The N366-07M has 8.3/125 duplex (zipcord) fiber made from glass, instead of polymer. The sturdy LC and SC male connectors meet stringent insertion loss standards and feature beveled edges on their glass ends for easy insertion into a patch panel or switch. The FDDI- and OFNR-rated PVC jacket is yellow to easily identify it as a singlemode cable.
