Duplex Singlemode 8.3/125 Fiber Patch Cable (LC/LC), Push/Pull Tabs, 1 m (3 ft.)

MODEL NUMBER: **N370-01M-T**

Premium singlemode fiber optic cabling transmits fast, clear data signals through your LAN with data transfer speeds up to 10 Gbps.

Description

The N370-01M-T Duplex Singlemode 8.3/125 Fiber Patch Cable (LC/LC) transmits fast, clear data signals through your LAN with data transfer speeds up to 10 Gbps. Designed for network equipment that requires singlemode fiber optic patch cables, this one-meter (three-foot) cable has attenuation loss that meets or exceeds current standards. It has 8.3/125 duplex (zipcord) fiber made from glass, instead of polymer.

The sturdy LC male connectors meet stringent insertion loss standards and feature beveled edges on their glass ends for easy insertion into a patch panel or switch. Push/pull tab connectors are easily accessible in high-density data center applications and make the FDDI-rated cable easy to install and remove with one hand. The OFNR-rated PVC jacket is yellow to easily identify it as a singlemode cable.
