

Chipsmall Limited consists of a professional team with an average of over 10 year of expertise in the distribution of electronic components. Based in Hongkong, we have already established firm and mutual-benefit business relationships with customers from,Europe,America and south Asia,supplying obsolete and hard-to-find components to meet their specific needs.

With the principle of "Quality Parts,Customers Priority,Honest Operation,and Considerate Service",our business mainly focus on the distribution of electronic components. Line cards we deal with include Microchip,ALPS,ROHM,Xilinx,Pulse,ON,Everlight and Freescale. Main products comprise IC,Modules,Potentiometer,IC Socket,Relay,Connector.Our parts cover such applications as commercial,industrial, and automotives areas.

We are looking forward to setting up business relationship with you and hope to provide you with the best service and solution. Let us make a better world for our industry!

Ultra-Low Power Audio CODEC for Headphone/Headsets Application With 124dB Class G Headphone Drive and Advanced Headset Features

Description

The NAU88L25 is an ultra-low power high performance audio codec designed for headphone or headset application in smartphone, tablet PC, Chromebooks, laptop, game controller, Bluetooth headphones and other portable devices. It includes one I2S/PCM interface, one high quality stereo DACs, one mono ADC, a Class G stereo headphone amplifier, and industry leading advanced headset features.

Advanced on-chip signal processing engine including dynamic range compressor (DRC), programmable bi-quad filters, sidetone and dital mixers, can maximize audio quality enhancements and eliminate the undersirable frequency components. A frequency locked loop(FLL) is also integrated in the design to support various clocks with less external components.

The NAU88L25 has powerful headset detection mechanism, which detects jack insertion / ejection, microphone presence, speaker impedance, and up-to 8 user defined buttons with long/short key press debouce circuit. It also supports headphone crosstalk detection/suppression, and automatic microphone & ground detection / switching to work automatically with different audio jack formats without using external chips or components.

The NAU88L25 operates with analog supply voltages from 1.6V to 1.8V, while the digital core can operate from 1.1V to 1.98V to conserve power. The NAU88L25 is specified for operation from -40°C to +85°C, and is available in QFN 32 or CSP package with 0.4mm pitch.

Features

- DAC with auto attenuate : 124dB SNR; without auto mute: 113dB SNR, (A-weighted) @ 0dB gain, 1.8V and -89dB THD @ 20mW and RL= 32Ω, DAC playback to headphone output mode
- ADC : 101dB SNR (A-weighted) @ 0dB MIC gain, 1.8V, Fs = 48kHz and -91dB THD , 1.8V, MIC gain 0dB, OSR 128x
- 1 Digital I2S/PCM I/O port
- Dynamic Range Compressor (DRC)
- Programmable Biquad filter
- 1 Headset Mic, 1 Differential Analog Mic input, Line-input, or two single-ended Mic input
- Class G Headphone Amplifier(28mW @ 32Ω, 1% THD+N)

- Sampling rate from 8K to 192 KHz
- Headset Detection & Auto Headset switch for MIC and Ground
- Jack Insertion and Ejection Detection
- Distinct Keys Detection
- Package : 32 Pin QFN package, and Optional 42 Balls WLCSP with 0.4mm Pitch

Applications

- Gaming Controller
- Ultra-Portable Laptop
- Mobile Device
- Wireless Headset
- Smart Remote Controller
