NCS20081/2/4, NCV20081/2/4

1.2 MHz, 42 μ A Low Power Operational Amplifier

The NCS20081/2/4 is a family of single, dual and quad Operational Amplifiers (Op Amps) with 1.2 MHz of Gain-Bandwidth Product (GBWP) and draws only 42 μ A of Quiescent current. The NCS2008x has Input Offset Voltage of 4 mV and operates from 1.8 V to 5.5 V supply voltage over a wide temperature range (-40°C to $+125^{\circ}\text{C}$). The Rail-to-Rail In/Out operation allows the designers to use the entire supply voltage range while taking advantage of the 1.2 MHz GBWP. Thus, this family offers superior performance over many industry standard parts. These devices are AEC-Q100 qualified which is denoted by the NCV suffix.

NCS2008x's low current consumption and low voltage performance in space saving packages, makes them ideal for sensor signal conditioning and low voltage current sensing applications in Automotive, Consumer and Industrial markets.
